

Using the Making 10 Strategy

In order to use the Make 10 Strategy, use the double ten frames to help.

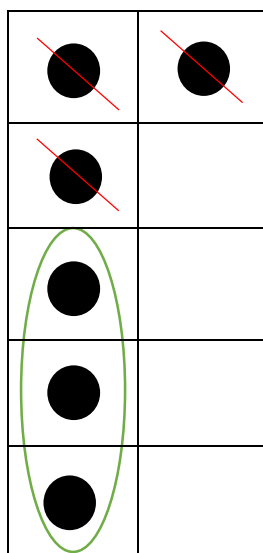

Let's add the following numbers:

$$7 + 6 = ?$$

Place 7 dots in this 10 Frame.

Now place 6 dots into this 10 Frame.

Then fill up the first 10 Frame with dots from the second 10 Frame. You will have 3 dots left over. So, if $10 + 3 = 13$, then

$$7 + 6 = 13.$$
