Notes:

- Your plan requires the selection of a Primary Care Physician (PCP). Choosing a PCP is an important decision. Call us at the number on your ID card and we'll help you pick a doctor. Additionally, a referral from your Primary Care Physician (PCP) is required for Specialist care and most other providers for select covered services.
- If you have an office visit with your Primary Care Physician or Specialist at an Outpatient Facility (e.g., Hospital or Ambulatory Surgical Facility), benefits for Covered Services will be paid under “Outpatient Facility Services”.
- Costs may vary by the site of service. Other cost shares may apply depending on services provided. Check your Certificate of Coverage for details.
- Coverage includes standard fertility preservation services as a basic healthcare service including but are not limited to, injections, cryopreservation and storage for both male and female members when a medically necessary treatment may cause iatrogenic infertility. Member cost share for fertility preservation services is based on provider type and service rendered.

This summary of benefits is a brief outline of coverage, designed to help you with the selection process. This summary does not reflect each and every benefit, exclusion and limitation which may apply to the coverage. For more details, important limitations and exclusions, please review the formal Evidence of Coverage (EOC). If there is a difference between this summary and the Evidence of Coverage (EOC), the Evidence of Coverage (EOC), will prevail.

Anthem Blue Cross HMO benefits are covered only when services are provided or coordinated by the primary care physician and authorized by the participating medical group or independent practice association (IPA); except OB/GYN services received within the member's medical group/IPA, and services for mental and nervous disorders and substance abuse. Benefits are subject to all terms, conditions, limitations, and exclusions of the EOC.

Please have your doctor call Express Scripts at 1-800-753-2851 to go through a clinical review on your medication if it is subject to prior authorization.

Prior Authorization is a program that helps you get the prescription drugs you need ***with safety, savings and — most importantly — your good health in mind.*** It helps you get the most from your healthcare dollars with ***prescription drugs that work well for you and that are covered by your pharmacy benefit***. It also helps control the rising cost of prescription drugs for everyone in your plan.

The program monitors certain prescription drugs to ensure that you are getting the appropriate drugs for your disease state. It works much like healthcare plans that approve certain medical procedures before they're done, to make sure you're getting tests you need: If you're prescribed a certain medication, that drug may need a "prior authorization." ***It makes sure you're getting a cost-effective drug that works for you.*** For instance, prior authorization ensures that covered drugs are used for treating medical problems rather than for other purposes.

Drug Quantity Limits

The Drug Quantity Management program manages prescription costs by ensuring that the quantity of units supplied for each copayment are consistent with clinical dosing guidelines as recommended by the Food & Drug Administration (FDA). The program is designed to support safe, effective, and economic use of drugs while giving patients access to quality care. Express Scripts clinicians maintain a list of quantity limit drugs, which is based upon manufacturer-recommended guidelines and medical literature. Online edits help make sure optimal quantities of medication are dispensed per copayment and per days' supply.
