Choice of dentists

While your dental plan lets you choose any dentist, you may end up paying more for a service if you visit an out-of-network dentist.

Here's why:

In-network dentists have agreed to payment rates for various services and cannot charge you more. On the other hand, out-of-network dentists don't have a contract with us and are able to bill you for the difference between the total amount we allow to be paid for a service – called the "maximum allowed amount" – and the amount they usually charge for a service. When they bill you for this difference, it's called "balance billing."

How Anthem dental decides on maximum allowed amounts

For services from an out-of-network dentist, the maximum allowed amount is determined in one of the following ways:

- Out-of-network dental fee schedule/rate developed by Anthem, which may be updated based on such things as reimbursement amounts accepted by dentists contracted with our dental plans, or other industry cost and usage data
- Information provided by a third-party vendor that shows comparable costs for dental services
- In-network dentist fee schedule

Here's an example of higher costs for out-of-network dental services

This is an example only. Your experience may be different, depending on your insurance plan, the services you receive and the dentist who provides the services.

Ted gets a crown from an out-of-network dentist, who charges \$1,200 for the service and bills Anthem for that amount.

Anthem's maximum allowed amount for this dental service is \$800. That means there will be a \$400 difference, which the dentist can "balance bill" Ted.

Since Ted will also need to pay \$400 coinsurance, the total he'll pay the out-of-network dentist is \$800.

Here's the math:

- Dentist's charge: \$1,200
- Anthem's maximum allowed amount: \$800
- Anthem pays 50%: \$400
- Ted pays 50% (coinsurance): \$400
- Balance Ted owes the provider: $\$1,200 - \$800 = \$400$
- Ted's total cost: $\$400$ coinsurance + $\$400$ provider balance = $\$800$

In the example, if Ted had gone to an in-network dentist, his cost would be only \$400 for the coinsurance because he would not have been "balance billed" the \$400 difference.
