

What questions do you have regarding our current or future budget?	What ideas or topics would you like to explore this year in DBAC?
The impacts of new state law and planning for the impacts	The impacts of new state law and planning for the impacts
Where is the money coming from to support an innovative Options Programs' school? What criteria does Capital Projects to determine realistic recommendations for future projects? When will the district be asking the voters of BI for the next bond levy?	to build the framework for a five year plan regarding McCleary mandate of smaller class size; What is the district's true commitment to funding the expansion of all Option Programs?
What is happening at the state level that impacts us next year?	How to promote the Citizen's Guide to the Budget, how to engage more people in the conversation about school funding.
How will we plan for ongoing fluctuations in school population? How can we continue to support and attract new teachers - a piece of the budget? How can you give confidence to the community that the maintenance of buildings will not be put in the backseat while new construction of other schools is happening?	Population, transparency with community, planning for changes so that we are not purely reactionary
None in particular, just excited to learn more!	Not sure, this is my first time on the committee, not sure what to expect yet.
I have questions specific to building-based FTE	Impact of state decisions about staff salaries.
Continued understanding of impact of state budget impact	Participation of employee group reps in full process rather than as observers in decision making activities. I understand the position of not wanting to participate in decisions that may impact others, but they are a needed participants in the decision making process.
Clear understanding of McCleary implications	5-10 year replacement   maintenance cycles
What are our financial goals for the future? It would be nice to have a list of things we would like to accomplish and see how we can afford to do them. It would be great to be proactive rather than reactive.	I'd like to see a good discussion of long-term financial goals.
How can we prevent budgetary crises and strengthen our financial stability?	Alternative revenue streams
