

How to Develop a Science Fair Project

Step 1.
Question: What do I want to know?

Start with an area of interest and move toward a specific question.

Make certain your question is doable and there is enough time to answer your question.

Carefully choose the appropriate method to answer your question.

1. Labeled Drawings
2. Models/Dioramas
3. Demonstrations

4. Scientific Investigations or Observational reports
5. Create an invention to solve a problem
6. Research Projects
