

Bridgehampton
Oceanography Club

BRIDGEHAMPTON SCHOOL DISTRICT

What is the Bridgehampton Oceanography Club?

It is a club that explores the beautiful marinescape that surrounds our area. The club looks at the important roles that local marine animals play in our surrounding ecosystem. Using a variety of data, and experiences, students will be able to observe the habits of key local marine species.

Students will also be contributing to the local scientific community in a variety of different ways.

1. Developing and managing a data system for shark data
2. Use technology to accumulate and disseminate data
3. Explore local marine environments
4. Researching methods of tagging and tracking sharks

The club will meet once a month. However there is plenty of opportunity for students to be involved much more than that.

Who: Grades 7-12

When: The last Monday of each month.

The sea, once it casts its spell, holds one in its net of wonder forever.

-Jacques Yves Cousteau
