

# Weeding

Weeding is a constant but necessary chore to maintaining the ATA Garden. We have worked hard to take preventative measures by layering cardboard, weed fabric, mulching & straw and adding hardscape such as pavers, spool tables, etc. However, the weeds continue. Just five minutes a day with a group can keep the weeds under control.

Weed trays (*soda bottle trays*) and hand rakes are available under the shelter. Be sure it's a weed before you dig and remember tool safety tips! Shake out the good soil back into the ground, then throw the weed into a weed tray. All weeds can then be scattered into the boggy marsh area outside the garden between the sidewalk and outer fence.
