

Basic Functions Notes

Function Basics:

1 to 1

A function is a rule that assigns each element in the domain (x) to exactly one element in the range (y)

Functions as Graphs:

The vertical line test will help determine whether a graph represents y as a function of x .

State whether or not each of the following graphs represents a function.

no

yes ☺

Basic Functions Notes

Use the graph to evaluate the following:

a) Find the domain of $f(x)$:

$[-3, 3]$

b) Find the range of $f(x)$:

$[-2, 1]$

c) Evaluate $f(-3)$ $f(-1)$ $f(0)$ and $f(1)$
 " $x = -3$ " $y = ?$ " $= -1$ " $= 1$ " $= 0$ " $= 1$

d) For what value(s) of x is $f(x) = -2$?
 " $y = -2, x = ?$ " $[3]$

Finding x and y intercepts:

The x -intercept is the value for x such that $f(x) = 0$

The y -intercept is the value for y such that $f(0) = y$.

Plug in, Solve!

Example:

Without graphing, identify the x and y intercepts for

a) $f(x) = 4 - x^2$

b) $f(x) = 3x - 21$

x -int
 $0 = 4 - x^2$
 $\sqrt{x^2} = \pm\sqrt{4}$
 $x = \pm 2$
 $(-2, 0)$
 $(2, 0)$

y -int
 $y = 4 - (0)^2$
 $y = 4$
 $(0, 4)$

x -int
 $0 = 3x - 21$
 $21 = 3x$
 $7 = x$
 $(7, 0)$

y -int
 $(0, -21)$

Basic Functions Notes

Increasing/Decreasing Functions

A function f is said to be increasing on I if functional values $f(x)$ increase as x increases on the interval I . In this case, the graph of f rises as x increases on the interval I .

A function f is said to be decreasing on I if functional values $f(x)$ decrease as x increases on the interval I . In this case, the graph of f falls as x increases on the interval I .

Identify the intervals that f is increasing and f is decreasing.

$f(x)$ is increasing:

$$(-\infty, 0) \cup (1, \infty)$$

$f(x)$ is decreasing:

$$(0, 1)$$

Basic Functions Notes

largest y-value
smallest y-value

Maximum and Minimum Values:

State the minimum and maximum of the graph below

- 1. Relative/Local
- 2. Absolute

(x, y)
"When" value of max/min
Max(0, 3)
Min(1, 1)

Example:

For the function f whose graph is shown above, answer the following questions.

- (a) On what interval(s) is f increasing? (b) On what interval(s) is f decreasing?
- (c) Does the function have a maximum value? If so, what is the maximum value?
- (d) Does the function have a minimum value? If so, what is the minimum value?

- a. (0, 1)
- b. $(-2, 0) \cup (1, \infty)$
- c. (1, 4)
- d. no absolute min.

Basic Functions Notes

Positive / Negative

A function f is called **positive** on an interval I if $f(x) > 0$ for all x in I .

Positive

A function f is called **negative** on an interval I if $f(x) < 0$ for all x in I .

Negative

Describe "when" x -values

Example:

Positive

Where is the $f(x) > 0$?

$(-\infty, -4) \cup (-1, 1) \cup (3, \infty)$

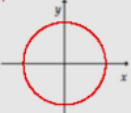

Where is the $f(x) < 0$?

Negative

$(-4, -1) \cup (1, 3)$

Basic Functions Practice

Determine whether each of the graphs represents a function.

1. 

2. 

3.

4.

5.

6.

7.

8.

15. The graph of $y = f(x)$ is shown below.

- (a) Find the domain of the function. Write your answer in interval notation.
- (b) Find the range of the function. Write your answer in interval notation.
- (c) Find the y -intercept(s) of the function.
- (d) Find the following function values:
 $f(-2)$; $f(0)$; $f(4)$; $f(6)$
- (e) For what value(s) of x is $f(x) = 9$?
- (f) On what interval(s) is f increasing?
- (g) On what interval(s) is f decreasing?
- (h) What is the maximum value of the function?
- (i) What is the minimum value of the function?

Basic Functions Practice

16. The graph of $y = g(x)$ is shown below.

- (a) Find the domain of the function. Write your answer in interval notation.
- (b) Find the range of the function. Write your answer in interval notation.
- (c) Find the y -intercept(s) of the function.
- (d) Find the following function values:
 $g(-2)$; $g(0)$; $g(1)$; $g(3)$; $g(6)$
- (e) For what value(s) of x is $g(x) = -2$?
- (f) On what interval(s) is g increasing?
- (g) On what interval(s) is g decreasing?
- (h) What is the maximum value of the function?
- (i) What is the minimum value of the function?
- (j) On what interval is the graph positive? Negative?

Basic Functions Practice

17. The graph of $y = g(x)$ is shown below.

- (a) Find the domain of the function. Write your answer in interval notation.
- (b) Find the range of the function. Write your answer in interval notation.
- (c) How many x -intercept(s) does the function have?
- (d) Find the following function values:
 $g(-2)$; $g(0)$; $g(2)$; $g(4)$; $g(6)$
- (e) Which is greater, $g(-2)$ or $g(3)$?
- (f) On what interval(s) is g increasing?
- (g) On what interval(s) is g decreasing?
- (h) On what interval is the graph positive? Negative?

Basic Functions Practice

18. The graph of $y = f(x)$ is shown below.

- Find the domain of the function. Write your answer in interval notation.
- Find the range of the function. Write your answer in interval notation.
- Find the x -intercept(s) of the function.
- Find the following function values:
 $f(-3)$; $f(-2)$; $f(-1)$; $f(1)$; $f(4)$
- Which is smaller, $f(0)$ or $f(3)$?
- On what interval(s) is f increasing?
- On what interval(s) is f decreasing?
- On what interval is the graph positive? Negative?
