

Flip Flop

Fact Families

This simple but effective introduction fact family activity is designed to help students understand that two math facts can easily be made from the same two numbers by simply reversing the numbers. Enjoy!

Supplies: Dominos)

Directions: Pick a domino and draw the dots in the two squares on top. Next, flip flop (reverse) the same domino and draw the dots in the bottom two squares. Add each math fact and write in the answers. Continue by picking a different domino for each of the six sections.

Discuss: What did you discover?
