

Helpful Math Websites to Use at Home

1. “Figure This!”

If you're looking for a math challenge that you can work on together as a family, then this site might be fun for you. There are 80 math challenges that students can choose from. Many are open-ended, so they keep your child thinking. These challenges promote working together as a family. There is a parent section where you can print the challenges and the website offers hints and related problems.

One example is: How fast does your heart beat? How long would it take for your heart to beat 1000 times? 1,000,000 times?

2. “Splash Math”

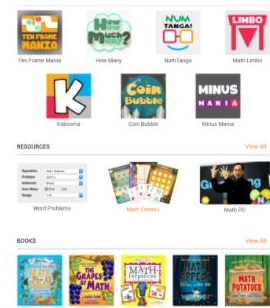

Splash math is a free site where students can use games to practice skills that they need to become more fluent with. The curriculum link takes you to grade level appropriate games that are aligned to the math standards. You are also able to access games to practice skills below or above your child's grade level.

4. "Raft Race"

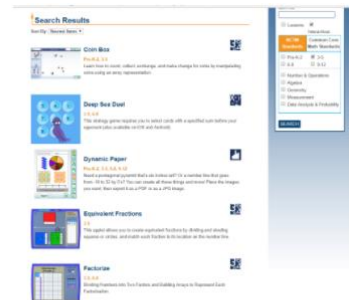

This is a site that presents several math challenges for students to solve. The challenge is presented in "comic book" style and is engaging for children. Some of the skills that students practice on this site are not directly related to North Carolina math standards, but many students are motivated about solving math problems on this site.

In mid-April site address is changing to:
nctm.org/illuminations

6. "Thinking Blocks"

At the Thinking Blocks site students are given the opportunity to create models to solve word problems. So often, students struggle with knowing which operation to use in word problems. This site can help students see the model and guides them step-by-step with prompts at the bottom. There is a read-aloud option for students as well. Students can use this site to practice creating models for addition, subtraction, multiplication, fractions and decimals.
