

From PowerTeacherPRO Help section:

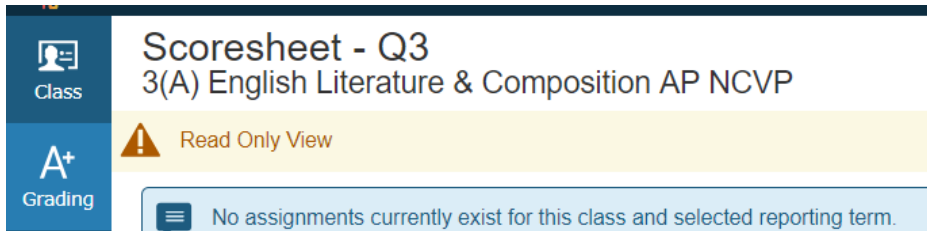

Recalculate Final Grades

Use this feature to recalculate final grades for one or more classes.

Although final grades in PowerTeacher Pro are calculated automatically, you can force a recalculation, if necessary. Use the recalculate tool after making significant changes, such as adding multiple assignment scores for students who transferred from another class. Also, recalculate grades when your PowerSchool administrator changes a setting that affects PowerTeacher Pro, such as the grade calculation formula.

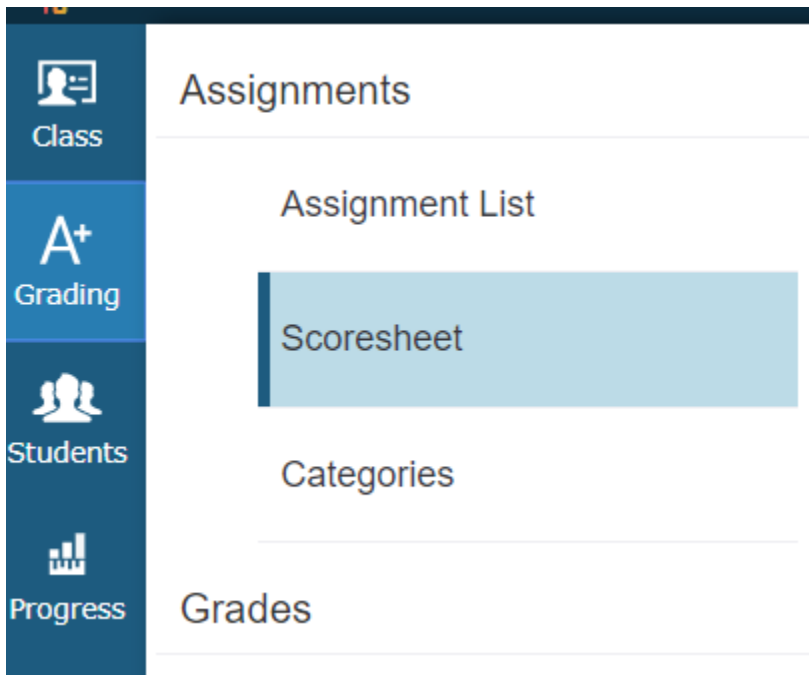

1. From the **Grading** menu, select: Scoresheet, Categories, Traditional, Standards, Comment Verification, Category Totals, or All Reporting Terms.
2. From the **Students** menu, select: Assignments, Standards Progress, or Comment Log.
3. Select the gear , and then choose **Recalculate Final Grades**.
4. Use the Select Classes menu to select one or more classes.
2. Check the type of grades you want recalculated.
3. Select **Recalculate**.
