

# QUIZ CORRECTION PROCEDURE

You have one week to complete quiz corrections. The week begins on the day that your graded quiz is handed back to you.

You may get help from your classmates, parents, or teacher (please make an appointment before or after school). However, make sure **you** understand your errors enough to explain them clearly. You can earn back half credit for each problem that you have correctly answered by following the steps below.

## **DO NOT WRITE OR CHANGE ANYTHING ON THE ORIGINAL QUIZ PAPER!**

You must do the following **on a separate sheet of paper** for each incorrect question or problem on the quiz:

- 1) Number the problem/question and rewrite it.
- 2) Write at least two **complete sentences** explaining what your error was and what you need to do to correct it. Write enough to prove that you understand it now.
- 3) Show all work to correct the problem or question and include the right answer.

### EXAMPLE SENTENCES

“I made a mistake with the integer rules in the original problem. I should have subtracted the integers, but instead I added them.”

“My error was just a simple multiplication mistake. To find the volume for the rectangular prism I accidentally multiplied the height and area of the base incorrectly. I wrote that 6 times 4 was 48.”

---

I acknowledge that I can earn back half credit for each problem that I have correctly answered by following the steps above.
