

SNOW DAY INSTRUCTIONS (February 21, 2020)

Hope you all enjoyed the snow! Here's the tasks that are due by Monday.

1. **Study for the Rational Functions Test.** Work all the review problems. View some of the videos on concepts you might have struggled with (on my website). Work that Delta Math (see note below if you haven't joined Delta Math yet) assignment on Synthetic Division. Evaluate your homework by checking all the answer keys to make sure you got 100% correct. Email me any questions.
2. Use the Exponential Functions Note sheet (handed out on Thursday) to **complete the Desmos Exploration on Exponential Functions**. You won't be able to fill in all the notes (we will finish them Monday after test) but you can go through the graphing part at home. Use this link to go through it.
<https://student.desmos.com/?prepopulateCode=vd8a3u>
3. Complete the exponents $\frac{1}{2}$ sheet WITHOUT a calculator. If you don't remember how to compute the numbers without a calculator then view the 5-minute video. It will jog your memory.
<https://www.youtube.com/watch?v=wp2Ho985DyI>
4. Enjoy your 3-day weekend. Be safe. Hangout with your family. Have fun with your friends. Take care of each other. Maybe look at that Demos Contest I was telling you about.... You need an original piece of work. I'm happy to help you with the equations!
<https://blog.desmos.com/articles/art-contest-launch/> ☺ Top prize is \$500!!

** Didn't get a Delta Math account last week. Go to www.deltamath.com and create an account (or you can use a previous account if you did this in Math 3). Join my class – my teacher code is 419223

Make sure you join my 2nd Period Honors Pre-Calculus class to see the Synthetic Division assignment.

See you on Monday!
