

# Masks, Face Shields and GLOVES, Oh my!

When I am at the store  
or at an appointment, I  
will see people wearing  
protective equipment.

Protective equipment keeps people safe from germs.

One piece of protective equipment is a mask.

I might see kids, adults, teachers, store workers, grandparents, doctors and nurses wear masks.

Some people wear bandanas, scarves or other face coverings instead of a mask.

FACE  
SHIELD

6

Another thing I might see is a face shield. This is a clear, plastic shield that covers someone's face.

7

Usually, a doctor, nurse or dentist will wear a face shield.

A face shield can protect from coughs and sneezes

Gloves can also protect people from germs.

I can try to remember  
that behind the protective  
equipment are people with  
noses and mouths.

They might even be  
smiling at me!

I will get used to seeing more protective equipment.

Masks, face coverings, face shields and gloves are just some of the things that help protect from germs.  
It's okay!
