Mission Statement

To provide quality instruction in a safe, caring environment.

Vision Statement

Every student will graduate from high school, be globally competitive for work or postsecondary education, and be prepared for life in the 21st century.

Board of Education

Dr. Donald W. Phipps, Superintendent
Darrell Pennell, Chairman
Teresa Branch, Vice-Chairman
Chris Bumgarner

Joe Sims

All programs, activities and facilities of the Caldwell County School System are available to all on a non-discriminatory basis, without regard to race, color, creed, religion, sex, age, handicap, or national origin. The school system is an equal access, Equal Opportunity Employer. Questions pertaining to educational equity, equal opportunity, or equal access should be addressed to the Associate Superintendent for Human Resources.

Caldwell County Middle Schools recognize that the 21st Century presents remarkably different challenges for young adolescents than in the past. Our middle schools are designed for student success. Reflecting recommendations of the Association of Middle Level Educators (AMLE), Caldwell County Middle Schools are developmentally responsive, challenging, empowering, and equitable and exemplify the following characteristics:

In Curriculum, Instruction, and Assessment:

- Educators value young adolescents and are prepared to teach them.
- Students and teachers are engaged in active, purposeful learning.
- Curriculum is challenging, exploratory, integrative, and relevant.
- Educators use multiple learning and teaching approaches.
- Varied and ongoing assessments advance learning as well as measure it.

In Leadership and Organization:

- A shared vision developed by all stakeholders guides every decision.
- Leaders are committed to and knowledgeable about this age group, educational research, and best practices.
- Leaders demonstrate courage and collaboration.
- Ongoing professional development reflects best educational practices.
- Organizational structures foster purposeful learning and meaningful relationships.

In Culture and Community:

- The school environment is inviting, safe, inclusive, and supportive of all.
- Each student's academic and personal development is guided by an adult advocate.
- Comprehensive guidance and support services meet the needs of young adolescents.
- Health and wellness are supported in curricula, school-wide programs, and related policies.
- The school actively involves families in the education of their children.
- The school includes community and business partners.

The Importance of Middle Level Education and Young Adolescents

National Middle School Association. (2003). This We Believe: Successful Schools for Young Adolescents.
Westerville, OH: NMSA.

Young people undergo more rapid and profound personal changes between the ages of 10 and 15 than at any other time in their lives. Changes occur irregularly, and no two young adolescents enter puberty at the same time or progress at the same rate. Achieving academic success is highly dependent upon their developmental needs being met.

Changes in students' patterns of thinking become evident in the ideas they have about the world and how it functions. These shifts may be apparent in the questions they ask to each other and trusted adults, in reflections about personal experiences, their views on moral issues, and through their perceptions of the things around them. Because cognitive growth occurs gradually and irregularly, middle school students require ongoing, concrete, experiential learning in order to develop intellectually.

To read more about the developmental needs of 10 – 15 year olds and the goals of Middle Level Education, visit:

<http://amle.org/>.

Parent Involvement

As students begin to age and are able to handle more responsibility, parents will often step back and become less involved with their child's academics. We encourage parents to remain involved in their child's academic success. The moment you have a concern or question, immediately call your child's teacher, school counselor or principal. Should your schedule allow, we encourage you to volunteer at your child's school. Many opportunities are available for parents to volunteer. It truly takes all of us working together to ensure the success of our students.

We look forward to building a strong school community with you.

The Parent Power publication includes Annual Notices and other items of interest for parents and or guardians. These resources are located on the Caldwell County Schools website.

North Carolina Standard Course of Study

The link below will provide you with information on the North Carolina Standard Course of Study. To access the North Carolina Standard Course of Study utilize the following link:
<http://www.ncpublicschools.org/curriculum/>

Mathematics

The new K-8 mathematics standards were adopted by the North Carolina State Board of Education on June 1, 2017 for implementation in the 2018-2019 school year. The adoption of the North Carolina Standard Course of Study for Mathematics (NCSCoS) marks a new leap forward in the continual process of improving learning for all our students. These standards are based on a philosophy of teaching and learning mathematics that is consistent with the most current research and exemplary practices.

Within the NCSCoS are The Standards for Mathematical Content and Practice. The content standards provide a clear focus of content that must be mastered at each grade level, K-8. They are organized by conceptual categories or themes. Equally important are the Standards for Mathematical Practice, describing the behaviors or 'habits of mind' of mathematically proficient students.

Beginning 2018-2019, Math I will no longer be offered as a direct instruction course for eighth grade students. We will instead offer an extended curriculum for advanced eighth grade math students. This course will be an extension of the eighth grade curriculum with various integrated components of Math I. For more information visit the following link:
<https://tinyurl.com/yapa2jyx>

Students will build upon their previous instruction in math by learning the following concepts this year:

- Approximating Irrational numbers
- Radicals and Integer Exponents
- Connections between Proportional Relationships, Lines, and Linear Equations
- Solving Linear Equations
- Solving Systems of Linear Equations
- Define, Evaluate, and Compare Functions
- Use Functions to Model Relationships
- Understand Congruence and Symmetry
- Understand and Apply Pythagorean Theorem
- Real-world mathematical problems involving Volume of Cylinders, Cones, and Spheres
- Investigate Patterns of Association in Bivariate Data

Students will also use Eight Mathematical Practices as outlined by the North Carolina Standard Course of Study.

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.

7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning

8th Grade Math End of Grade Assessment Specifications

Domain	Percent of Test
The Number System, Expressions and Equations	24-28%
Functions	28-32%
Geometry	24-28%
Statistics and Probability	16-20%

In accordance with House Bill 986, students scoring a Level 5 on the Math End of Grade assessment in grades 3-8, when practicable, will be enrolled in an advanced math course. The curriculum for the middle level advanced math courses are provided online for your review. <https://www.caldwellschools.com/Page/1126>

English Language Arts

In April 2017, the North Carolina State Board of Education adopted new ELA standards for grades K-12. The Standard Course of Study describes what students should know, understand, and be able to do by the end of each grade level. How these standards are taught is decided at a district level.¹ Students will use oral language, written language, media and technology for expressive, informational, argumentative, critical, and literary purposes. Students will also study the structure of language and grammatical rules in order to speak and write effectively.

Informational text pieces will be emphasized in all classrooms. Additionally, there is a strong focus on vocabulary and language, including determining meanings of words and phrases in context.

For more information, please read the sixth grade English Language Arts Parent Guide published by the North Carolina Department of Instruction by following this link:

<https://ncdpi.instructure.com/courses/914/pages/parent-guides>

8th Grade English Language Arts End of Grade Assessment Specifications

Domain	Percent of Test
Reading for Literature	31-35%
Reading for Information	42-46%
Writing	NA
Speaking and Listening	NA
Language	20-24%

Accelerated Reader

Accelerated Reader (AR) is utilized in language arts classrooms to monitor reading comprehension of student self-selected literature, as well as promote strong reading habits. Follow this link to learn more about the AR program:

<http://www.renaissance.com/services/parent-resources/>

¹Source: NCDPI, <https://elavik.weebly.com/search.html/?dT=y&name=Parent%20Guide%20FINAL>

Eighth Grade Writing

It is the goal of Caldwell County Schools to strengthen students' abilities to produce and publish quality written work. Eighth grade students will practice narrative, explanatory, persuasive and argumentative writing throughout the school year in several content areas. Writing tasks occur in classes on a consistent basis in order to reinforce and assess classroom performance. Eighth grade students will also conduct research across multiple content areas and create written products. Students will continue to choose valid sources for information and to cite sources in their writing. This will prepare students for more comprehensive research writing products at the high school level. Students will be required to use correct grammar and spelling in their writing.

Social Studies

Students in eighth grade will continue to build on the fourth and fifth grade introductions to North Carolina and the United States by embarking on a more rigorous study of the historical foundations and democratic principles that continue to shape our state and nation. Students will begin with a review of the major ideas and events preceding the foundation of North Carolina and the United States. The main focus of the course will be the critical events, personalities, issues, and developments in the state and nation from the Revolutionary Era to contemporary times. Inherent in this study is an analysis of the relationship of geography, events and people to the political, economic, technological, and cultural developments that shaped our existence in North Carolina and the United States over time. Although the major focus is state and national history, efforts should also be made to include a study of local history. The standards are organized around five strands: history, geography and environmental literacy, economics and financial literacy, civics and governance and culture. The strands should not be taught in isolation, but woven together in an integrated study that helps to tell the complete story of our state and nation.¹

8th Grade Social Studies North Carolina Final Exam Specifications

Domain	Percent of Test
History	23-38%
Geography	10-17%
Economics	10-17%
Civics and Government	15-30%
Culture	10-17%

¹Source: NCDPI, <http://www.dpi.state.nc.us/docs/curriculum/socialstudies/scos/8.pdf>

Science

Eighth grade science is based on three instructional domains: Physical (P), Earth (E) and Life (L) science. Within physical science, students study properties and change of matter and the conservation and transfer of energy. Earth science includes the study of earth systems, structures and processes, and Earth history. Life science examines the structures and functions of living organisms, ecosystems, evolution and genetics, and molecular biology.

Science will be taught using inquiry-based instruction in order to help students build conceptual understandings of topics. Students will engage in scientific investigation and will use reasoning and problem-solving to demonstrate how science is constant, historic, probabilistic, and replicable. Science as Inquiry provides for “hands on/minds on” student activities and encourages students to think like scientists.

Eighth grade science assessments will measure students’ proficiency on the essential standards for Science.

8th Grade Science End of Grade Assessment Specifications

Domain	Percent of Test
Matter: Properties and Change	14-16%
Energy Conservation and Transfer	10-12%
Earth Systems, Structures and Processes	13-15%
Earth History	11-13%
Structure and Functions of Living Organisms	19-23%
Ecosystems	9-11%
Evolution and Genetics	11-13%
Molecular Biology	8-10%

Information and Technology

Standards for Information and Technology will be used throughout all content areas.

- Students will learn to analyze resources for relevance, reliability, bias, and intent of information.
- Students will use technology to gather, analyze, and present data.
- Students will learn to apply the research process to gather information and to properly cite sources of information.
- Students will apply responsible behaviors when using information and technology sources.

Effective use of the Information and Technology Essential Standards will become increasingly important for students as we move toward future assessments of the North Carolina Standard Course of Study.

Healthful Living

The focus areas for students in this grade level include the following focus areas: mental and emotional health, personal and consumer health, interpersonal communication and relationships, nutrition and physical activity, and alcohol, tobacco, and other drugs. The accompanying objectives and curriculums can be found at:

<http://www.ncpublicschools.org/docs/acre/standards/new-standards/healthful-living/6-8.pdf>

Virtual Public School Courses

Some students have the opportunity to participate in high school courses during their eighth grade year, pursuant to SBE Policy HSP-M-001. Students who successfully complete their coursework and assessments will meet the high school graduation requirements for those courses. However, the grades earned in these courses will not count toward their high school GPA.

Further information about these requirements can be found at:

<http://www.ncpublicschools.org/docs/accountability/testing/eoc/creditrecovfaq.pdf>

Student Accountability Standards

The state's Student Accountability Standards brought accountability measures for schools and families. The standards are designed to improve student achievement and increase the number of students performing at grade level. For this plan to work, however, parents must remain involved in and informed about their child's education. The standards for accountability are important because they promote:

- higher expectations for students and teachers as well as higher student achievement
- the opportunity for every student in North Carolina to receive a sound basic education
- an emphasis on workplace skills as being crucial for a student's future success
- For additional information about the North Carolina Testing Program, visit the

Accountability Services Division website at
<http://www.ncpublicschools.org/accountability/>.

Benchmarks and Universal Screenings

Caldwell County Schools will have Schoolnet benchmark assessments and/or NC Check-Ins this school year for students in grades six through eight. The benchmark assessments will assess students on the current English Language Arts and Mathematics curriculum for

grades six through eight and the Science curriculum for grade eight. Schools have been given a window of time to complete these assessments. Students will also take part in STAR Reading and Math assessments throughout the year. These assessments help teachers utilize data to drive instruction as part of the Multi-Tiered System of Support (MTSS) framework.

End of Grade Tests (EOGs)

Based on the North Carolina Standard Course of Study, state required End of Grade (EOGs) Tests, are given in May. EOGs are designed with an emphasis on assessing mastery of skills and higher level thinking skills. These assessments are used to ensure students are working at grade level in reading and math in grades 3-8. It is the goal of the state and CCS that all students score level III or higher. Student proficiency on the EOGs are scored at five levels:

- Level I - Students have limited command of knowledge and skills.
- Level II – Students have partial command of knowledge and skills.
- Level III – Students have sufficient command of knowledge and skills.
- Level IV – Students have solid command of knowledge and skills
- Level V – Students have superior command of knowledge and skills.

Examples of EOG test questions:

<http://www.ncpublicschools.org/accountability/testing/releasedforms>

NC Final Exams in Social Studies

The NC Final Exams in selected subjects and grades are part of the NC State Testing Program and measure growth in various subjects and grades. The goal is to capture students' knowledge and skills in an authentic way.

Assessment specifications files for the North Carolina Final Exams provide greater detail on the assessments, including background information, the prioritization of the standards, cognitive rigor, item complexity, item types, and assessment delivery modes. The following links will provide the exact information aligned to each NC Final Exam.

NC Final Exam in Social Studies for Grade 8

<http://www.ncpublicschools.org/docs/accountability/common-exams/specifications/678ssssecs16.pdf>

<http://www.ncpublicschools.org/docs/accountability/common-exams/released-items/g8ssrel1617.pdf>

Middle School Attendance Policy

Attendance in school and participation in class are integral parts of academic achievement and the teaching-learning process. Through regular attendance, students develop patterns of behavior essential to professional and personal success in life. Regular attendance by every student is mandatory. The State of North Carolina requires that every child in the State

between the ages of 7 (or younger if enrolled) and 16 attend school. Parents and legal guardians are responsible for ensuring that students attend and remain at school daily.

Middle School (6-8) Attendance Requirements

A. Attendance

In preparing students for the rigors of middle school and successful entry into high school, attendance is fundamental. The primary responsibility of school attendance rests with students and their parents, guardians, or custodians. In order to maintain a consistent academic environment, there will be consequences for excessive unexcused absences, tardies, and early dismissals. As stated previously, the principal may require documentation to verify reasons for absences.

A student in grades six through eight must be in attendance at least 94.4% of the school year or 170 days. Students having more than ten (10) unexcused absences may not be promoted to the next grade level.

The school attendance committee will review student absences at the end of the first three grading periods and in the middle of the last grading period. The attendance committee will submit, to the principal or his/her designee, the names of students who are in danger of not being promoted due to excessive unexcused absences.

B. Reporting Absences

1. After the third unexcused absence, the principal or designee will notify the student's parent, guardian or custodian of the excessive absences.
2. After the sixth unexcused absence, the principal or designee will notify the students' parents, guardian or custodian of the excessive absences and refer the student to the school social worker.
3. The school social worker will investigate the cause of the unexcused absences and provide intervention as needed.
 - A. The student will also be referred to the school's Student Success Team.
 - B. In coordination with the school's Student Success Team, the school social worker will continue to monitor student attendance.
4. After the tenth unexcused absence, the principal, in consultation with the school social worker and other members of the school's Student Success Team, will refer the student and his/her family to an outside intervention agency and may file a complaint with the juvenile court counselor pursuant to Chapter 7B of the General Statutes that the child is habitually absent from school without a valid excuse. Also note, the principal or social worker may notify the district attorney or director of social services, of the county where the child resides, if absences become extremely excessive. Students in danger of not being promoted due to missing the maximum number of days stated above will be reviewed by the school attendance committee. Each school will determine the consequences for students in excess of ten (10) unexcused absences.

High School Future-Ready Core Graduation Requirements

The North Carolina State Board of Education approved the Future -Ready Core Graduation requirements that became effective with the 9th grade class of 2009 - 2010. The Future-Ready Core will help ensure that students graduate with the academic foundation they need for success in the global economy. The core gives students the ability to tailor course concentrations to fit their interests and goals including opportunities for college-level work while building a strong academic foundation. The following units will be required under the future ready core.

Subject	Caldwell County Future Ready Core Graduation Requirements
English	5 credits: Communication Skills, English I, II, III, IV
Math	4 credits: Math I, Math II, Math III, and a fourth math aligned to post high school plans or Algebra I, Geometry, Algebra II, and a fourth math aligned to post high school plans
Science	3 credits: Earth/Environmental Science, Biology, and a physical science course
Social Studies	3 credits for students who entered 9th grade from 2009-2010 through 2011-2012: World History, Civics & Economics, and US History 4 credits for students who entered 9th grade in 2012-2013 and beyond: World History, Civics & Economics, and American History I and II <u>or</u> AP US History and a social studies elective
Health & PE	1 credit + Successful Completion of CPR Instruction (<i>graduating class of 2015 and beyond</i>)
World Languages	Not required for graduation. <i>2 credits in same language required to meet the minimum application requirements for UNC admission.</i>
Other Electives	12 credits required. 2 credits of any combination from: <ul style="list-style-type: none"> • Career & Technical Education, Arts Education, <u>or</u> World Languages 4 credits strongly recommended (4 course concentration) from one of the following: <ul style="list-style-type: none"> • Career & Technical Education, JROTC, Arts Education, <u>or</u> any subject area (i.e. English, math, science, etc.)
Total Credits	28 credits

Students will register for their high school courses in the spring of their eighth grade year.
Information concerning registration will be sent home with students.
