

Florida Department of Education

Comprehensive Health Education Secondary Toolkit

The Comprehensive Health Education Secondary Toolkit will assist classroom teachers, school nurses and others who are responsible for the delivery of health education. The toolkit is an electronic resource for the essentials of health education instruction. Each section highlights the component area and provides a litany of tools, websites, lessons and a variety of information. This document is available at the [FDOE Comprehensive Health Education webpage](#).

Health education is integral to the primary mission of schools. It provides students with a continuum of learning experiences to develop the knowledge and skills necessary to become successful learners and health literate adults. Health literacy is a fundamental part of the school health education program and is essential to the health and wellness of each student. Health Education provides students with the knowledge and skills they need to be healthy throughout their lifetime. The intent of a comprehensive health education program is to motivate students to maintain and improve their social, emotional and physical health, prevent disease and avoid or reduce health related risk behaviors.

Comprehensive health education addresses 12 required component areas for K-12 instruction under section [1003.42](#) (2)(n), Florida Statutes. Teen dating violence is **only** required in grades 7 - 12.

1. Community health
2. Consumer health
3. Environmental health
4. Family life
5. Injury prevention and safety
6. Internet safety
7. Mental and emotional health
8. Nutrition
9. Personal health
10. Prevention and control of disease
11. Substance use and abuse
12. Teen dating violence

The required concepts may be offered in a traditional health education course. However, low enrollment prompted the integration of health education benchmarks in 2012, where appropriate. These integrated benchmarks can be found in other content areas courses such as English language arts, fine arts, JROTC, peer counseling, physical education, science and social studies. The Florida Department of Education's (FDOE) [Course Directory](#) is a great resource for locating the current course listings. The [CPALMS website](#) is the best resource for the current standards,
