- Static column to the right of the page, by the dynamic navigation menu.
 - Can be used for any component, but works best with resources like:
 - Links, Downloads, PDFs, Schedules, Academic Links, etc.
- Remains on the right side for the whole page, so Window 1 content will not be able to fill into that section.

Text Window [H](#) [H](#) [Edit](#) [Delete](#)

Cannot be deleted

1. Edit the page.

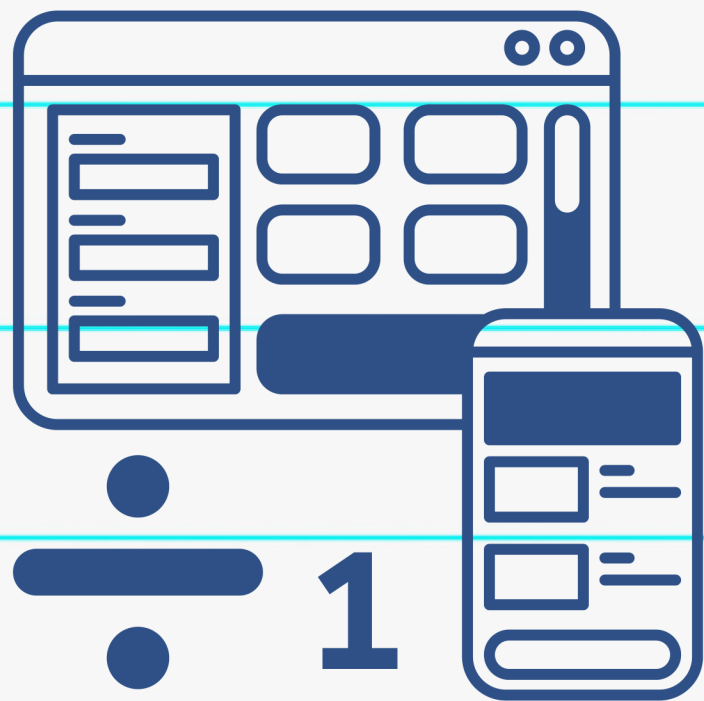

2. Click "+ Window" to add the second window.

3. A tab will appear for Window 2. You can add components and edit the window just like you do for Window 1.

4. If you want to delete Window 2, ensure no components are in the window that you want to keep. Then click "Delete Window".

COMPONENT VS WINDOW 2

100
2

A component lets you use the full page, divided into percentages. You are not tied to just two static columns.

The width of the webpage is 100% total with just one window; with two windows, it's about a 70-30 split.

Components take time to rearrange, reorganize and resize to fit the page well.

COLUMNS VS WINDOW 2

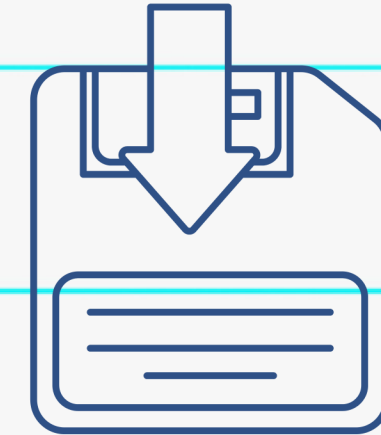

1

When you create a component, you can change how much of the webpage width it takes up.

2

A full horizontal line across the page must add up to 100% (so, 2 columns would be 50-50, etc.)

3

To change it, choose the value from the dropdown menu. Click "Save" after every change!

The screenshot shows a vertical list of four components in a design tool. Each component has a title, a 'Cannot be deleted' checkbox, a width dropdown menu, and 'Edit' and 'Delete' buttons. The components are: 'Text Window' (stay up to date title, 100%), 'Links' (20-21 Newsletters, 33%), 'Links' (19-20 Newsletters, 33%), and 'Links' (18-19 Newsletters, 33%). A red scribble highlights the width dropdowns and a horizontal line across the page. Three numbered callouts (1, 2, 3) point to the width dropdown, the horizontal line, and the dropdown menu respectively.

1

When you create a component, you can change how much of the webpage width it takes up.

2

A full horizontal line across the page must add up to 100% (so, 2 columns would be 50-50, etc.)

3

To change it, choose the value from the dropdown menu. Click "Save" after every change!
