Re: Notification of Asbestos Re-inspection

In compliance with the U. S. Environmental Protection Agency (EPA) Asbestos Hazard Emergency Act (AHERA), an initial inspection of Davies High School was conducted in 1998 to determine if any building materials contained asbestos. The (EPA) requires a re-inspection that must be performed by an accredited asbestos inspector every three years, and this notice is to report to you that the most recent re-inspection was conducted during the months of December 2017 through June of 2018.

An accredited management planner provided a summary of the findings and recommendations for the building materials containing asbestos.

- All building materials found to contain asbestos are encapsulated or present no danger.
- All building materials have been deemed in good condition.
- Continual monitoring will occur by the accredited management planner that oversees the (AHERA).

In conclusion, the findings and recommendations of the re-inspection are outlined in the school's Asbestos Management Plan located in the school's administrative office. Everyone is welcome to view the summary anytime during normal school hours (Monday through Friday, 8:30 a.m. – 2.30 p.m.) by scheduling an appointment with the Asbestos Program Manager, Mr. Renato Oliveira, at (401) 728-1500, ext. 328 who will be able to answer any questions you may have about the asbestos in the building.

Sincerely yours,

William M. Davies, Jr. Career and Technical High School
