

INTERSCHOLASTIC ATHLETICS

Interscholastic athletics for boys and girls is an integral and desirable part of the district's secondary school educational program. Individual and team sports shall be based upon comprehensive physical education instruction and intramural activities, seeking broad participation from all eligible secondary students. Lifetime or carry-over sports are to be particularly encouraged and supported. Parity in the number and kind of sports activities for girls and boys is a clear objective of the district.

Student eligibility for participation on interscholastic teams shall include:

1. authorization by the school physician;
2. written parent or guardian consent (the written consent will contain information for parents on mild traumatic brain injury (TBI) and will provide a link to the State Education Department's web page on TBI); and
3. endorsement by the Building Principal based on established rules and various league and State Education Department regulations.

Although the district will take reasonable care to protect student athletes, students may still sustain injuries. In order to most effectively ensure student safety, open communication between students, parents and coaches about the child's medical condition is critical. Coaches, and other appropriate staff, will receive guidance and training regarding recognition of injury and removal of the student athlete from play in the event of injury. Parents and/or students are expected to report injuries so that student health can be protected.

In the case of a suspected or actual head injury, a student must be removed from play immediately. In order to resume participation following injury, including head injury, the student needs to receive medical clearance. The Superintendent, in consultation with appropriate district staff, including the school physician, will develop regulations and procedures to guide the process of return to play.

In recognition of the importance of appropriately managing head injuries, the Board authorizes the creation of a Concussion Management Team (CMT). The CMT will be comprised of: the athletic director, a school nurse, the school physician, a coach of an interscholastic team, and other appropriate personnel designated by the Superintendent. The CMT is charged with overseeing compliance with state training requirements, developing guidelines for use by coaches and physical education teachers and developing information for distribution to parents and students.
