Total by Region	4689	5974		743	2028

*ELEM- 27 students per room;The smaller capacity number is figured allowing 2 rooms for special ed., 2 flex rooms and a title room if title, the higher capacity only allows for two flex/sped ed rooms.

**MIDDLE SCHOOL-30 students per room;The capacity numbers are based on allowing four flex rooms. The smaller is based on classrooms used only 3/4 of the day in a 4 period day. The larger capacity is considering all classrooms are used each period.

***HIGH SCHOOL-32 students per room;Classroom space at high schools is used very differently. Some schools have 4 rooms for support programs while other have 21 rooms used in this manner. So capacity varies greatly with number of periods and usage of rooms. The smaller is based on classrooms used only 3/4 of the day in a 4 period day. The larger capacity is considering all classrooms are used each period.
