

Proposed \$385 M bond

I'm not convinced that the current location of Edison is the best investment. I urge you to look at other locations and the potential for a land swap within the city. A better location would include room for growth and parking as well as better bus access. Further, the existing building has insurmountable barriers to creating ~~greater~~ equitable access.

Glad you're considering just
Renovating NHS and just adding to
Gilham Elementary. This would cut the
project down and not displace other schools like:
Y6, Corridor and Kelly. Renovating can work well.
Grant HS is doing that in Portland, OR. Yes, the cost
of renovating is the same as a new building but
you maybe saving cost long-term with the
other ^{displaced} schools.

Thank you for this forum.

Please keep in mind how many senior citizens
are having a difficult time paying ^{their} property
taxes now! This won't help those people that
is also true for many low income people. That
many will not be able to stay in their homes. Also, rental
property will be higher as well. (\$1.85 million)

Alternative \$275 million bond

A brand new North is the only viable option for the school. Renovating is not a good use of resources - it is more expensive, does not give Value Engineering in a way that will continue to hurt N.E. Students, Families, & businesses.

North needs a rebuild instead of renovation to fit its current & near future population
