= Test School

*All fixtures must be tested except: custodial sinks, hose bibbs (hose connections), technical/science (CTE) sinks (grades 6-12 when signs indicate non-potable), mechanical spaces, showers, eyewash stations, irrigation sources, toilets/urinals.

** Fixtures in these schools are exempt as per OAR 333-061-0400 due to being lead-free construction, except those that initial testing resulted in more than 1 parts per billion (ppb). Fixtures with 2.0 ppb or more from initial testing are: ATA has 53, Education Center Annex - ECCO program has 1, Howard has 19, River Rd has 2, Roosevelt has 10, Willard has 22.

*** Represents actual amount of samples and testing cost from initial 2016-17 testing. This includes flush samples and follow up verification sampling across entire district from 2016-17 testing.

TBD = To Be Determined (new construction/building so counts are yet to be finalized)
