Fuller Middle School

Executive Summary

Project Overview Update:

The finish installation have now started to become the predominant portion of the job as drywall and MEP rough have been substantially completed. Flooring, Specialties and Glazing subcontractors have already mobilized or are set to mobilize in the coming weeks to begin the final scopes, as the last areas are now becoming ready for them.

Financial Status Update:

Change Order #20 was presented at the SBC meeting on March 15th in the amount of \$85,739.71. This change order brings the new contract amount to \$78,599424.08.

Schedule Summary Update:

With the drywall scope substantially complete in the atrium, a good deal of progress has occurred for finish installation. Railings have been installed on 5/6 stairs and finish subcontractors are taking their final field measurements at the B.O. Spaces throughout the atrium.

The rooftop units have been set and now the electrical and HVAC subcontractors are making final connections to those. Gym/Linoleum Flooring is scheduled to be delivered in the coming weeks as the necessary overhead/wall work has been completed.

The main finish subcontractors including millwork, ceilings and paint have moved to the 2nd/1st Floors as work continues to progress. As these trades start to finish areas out, the specialties/flooring subcontractors are set to mobilize behind.

Roadblocks Update:

There are currently no roadblocks to date.

Quality Update:

Testing has been completed for the Windows/Skylights. It is ongoing for soil compaction, concrete and rebar now as the site elements start to take shape. Field visits are being made continuously by all architect engineers/consultants. The weekly architectural field walks help to resolve issues in real time as the entire construction team works together to achieve solutions. The finish subcontractors have been receptive to mockup review and have been working hand in hand with the project team to achieve architectural intent. This creates a collaborative atmosphere where quality of work is a high priority.

Safety Update:

Safety continues to be excellent; Through March, we have exactly 650 days onsite without a lost time incident and this month's safety score was 97.7%.
