Rationale:

The goal of these purchases is to continue to replace our aging student use devices and to further update the technology needed to support the education of our students. The current Lenovo laptops are continuing to break down, cannot handle the requirements of our software, and are not reliable enough to comply with NYS testing requirements.

The overall impact of these purchases will benefit our students and staff by creating an educational environment geared toward success. These improvements are intended to enhance engagement and enthusiasm among students, improve teacher-student relationships, and promote 21st-century skills such as technological proficiency, collaboration, and problem solving.
