**High School Awards Nomination Material:
May 15th, 2021 Deadline**

Dear Karol,

I am writing to invite your school to participate in RIT's 2021 High School Junior Awards program.

The awards program includes the RIT Computing Medal Award and the RIT Innovation and Creativity Award. For each award, schools may nominate **one male and one female** student (single-gender institutions may submit two nominees) from the **junior class** who meet the award criteria listed in the enclosed brochure, and online at www.rit.edu/admissions/high-school-awards-program.

Please pay careful attention and adhere closely to the award criteria.

Due to the volume of nominations received, we require that all nominations are submitted online. The online nomination forms can be found at www.rit.edu/admissions/high-school-awards-program and the submission deadline is May 15, 2021.

Please include as much information as possible on your nominees, as this will expedite the review process. Note that birthdates are mandatory in order to accurately submit and track recipients in our database. Nominations will be reviewed and, **if approved**, awards will be mailed for presentation at your annual awards ceremony. Each approved nominee will have their application fee waived and receive a scholarship valued at \$32,000 (\$8,000 per year), if they are accepted and enroll at RIT in the fall following graduation from high school.

Enclosed is a brochure with more specific information regarding nomination criteria. This information can also be found at www.rit.edu/admissions/high-school-awards-program.

Please feel free to contact me at meladm@rit.edu or (585) 475-2612, should you have any questions. Thank you for your participation.

Sincerely,

Molly Lane
Assistant Director Undergraduate Admissions
