Theodore Roosevelt Middle School

School Accountability Report Card, 2008–2009
Glendale Unified School District

This School Accountability Report Card (SARC) provides information that can be used to evaluate and compare schools. State and federal laws require all schools to publish a SARC each year.

The information in this report represents the 2008–2009 school year, not the current school year. In most cases, this is the most recent data available. We present our school's results next to those of the average middle school in the county and state to provide the most meaningful and fair comparisons. To find additional facts about our school online, please use the [DataQuest](#) tool offered by the California Department of Education.

If you are reading a printed version of this report, note that words that appear in a smaller, bold typeface are links in the online version of this report to even more information. You can find a master list of those linked words, and the Web page addresses they are connected to, at:

http://www.schoolwisepress.com/sarc/links_2009_en.html

Reports about other schools are available on the [California Department of Education Web site](#). Internet access is available in local libraries.

If you have any questions related to this report, please contact the school office.

Theodore Roosevelt Middle School

School Accountability Report Card, 2008–2009
Glendale Unified School District

» Principal's Message

At Roosevelt Middle School, all staff members are committed to supporting a safe and secure learning environment that promotes equity, fairness, and respect, and where every student can be successful. Teachers and staff collaborate with parents and students to create and maintain a school environment where students will prosper academically, emotionally and socially. Teachers actively seek out new programs and best-practice strategies that illustrate to students how to apply the knowledge they gain every day at school. At Roosevelt, all staff strives to prepare all students for future success in postsecondary educational and career opportunities.

Roosevelt has created partnerships with outside organizations to help our students succeed in the 21st century. As a result, Roosevelt is a NASA Explorer School in partnership with NASA and the Jet Propulsion Laboratory. We also have a partnership with California State University, Los Angeles and their MESA, (Mathematical, Engineering, Science, Achievement) Program. Both of these programs are only available at Roosevelt and nowhere else in Glendale. We are constantly looking to create additional partnerships that will help motivate our students to be successful.

School Expenditures

A combination of state and federal funding is used to cover all aspects of our instructional program. All Glendale Unified schools benefit from the support of the Glendale Educational Foundation, which offers enhanced programs in visual and performing arts, science and technology, and health and fitness.

Safety

Safety of students and staff is a primary concern of Roosevelt Middle School. Administrators, teachers, parents, and campus supervisors monitor students at breaks, lunch, and before and after school. Our security team works with students during the day and a series of security cameras monitor our campus continuously 24 hours a day. All visitors to the campus must report to the front office, sign in, and obtain a visitor's pass that must be displayed at all times.

The School Site Safety Plan is evaluated and revised each spring by members of the Site Safety Committee; all revisions are shared immediately with staff members. Key elements of the plan include procedures for reporting child abuse, notifying teachers of dangerous pupils, disaster response, and safe ingress and egress from school as well as a sexual harassment policy and dress code policy. The school is always in compliance with the laws, rules, and regulations pertaining to hazardous materials and state earthquake standards. We share the plan with all staff during school wide staff meetings and with parents at Coffee With the Principal meetings and at School Site Council meetings. We practice fire, earthquake, and lockdown drills three times a year and hold trainings for staff on emergency preparedness twice a year.

Buildings

Roosevelt Middle School, originally constructed in 1922, is currently situated on six acres and comprised of 50 classrooms, a library, two computer labs, a gymnasium, a fitness center, an auditorium, a cafeteria, an outdoor lunch court, administrative offices, grassy fields, and a blacktop playground. Measure K modernizations were completed in 2004 and included installation of campus-wide air conditioning, connecting all classrooms to the Internet, construction of a new science lab and nine modern science classrooms, and surfacing of the court. Additionally, the administrative offices were refurbished with the main entrance moved to Acacia Avenue in order to improve student safety.

Roosevelt Middle School provides a safe and clean environment for students, staff, and volunteers. The district governing board has adopted cleaning standards for all schools in the district. Basic cleaning operations are performed on a daily basis throughout the school year with emphasis on classrooms and rest rooms. A joint effort between students and staff helps keep the campus clean and litter-free. The principal works daily with the custodial staff to develop sanitation schedules that ensure a clean, safe, and functional learning environment.

A scheduled maintenance program is administered by Roosevelt Middle School's custodial staff on a regular basis, with heavy maintenance functions occurring during vacation periods. Additionally, a scheduled maintenance program is administered by Glendale Unified School District to ensure that school grounds and facilities remain in excellent repair. A work order process is used when issues arise that require immediate attention. Emergency repairs are given the highest priority; repair requests are completed efficiently and in the order in which they are received.

The State School Deferred Maintenance Budget Program provides state matching funds on a dollar-for-dollar basis to assist school districts with expenditures for major repair or replacement of existing school building components. Typically, this includes roofing, plumbing, heating, air conditioning, electrical systems, interior or exterior painting, and floor systems.

Parent Involvement

Parents can join our School Site Council (SSC), English Language Advisory Committee (ELAC), Monthly Coffee With the Principal meetings, and NASA Explorer School Council. Parents and community members are encouraged to volunteer time at Roosevelt working with students or helping teachers. We ask all parents to attend Back-to-School Night in the fall, Parent University, Open House in the spring, and parent-teacher conferences throughout the year. For information about getting involved at our school, please contact Mrs. Marso or one of Roosevelt's assistant principals, Mrs. Narek Kassabian, Mr. Maurice James, or Mrs. Carmen Labreque, at (818) 242-6845.

MEASURES OF PROGRESS

Academic Performance Index

The Academic Performance Index (API) is California’s way of comparing schools based on student test scores. The index was created in 1999 to help parents and educators recognize schools that show progress and identify schools that need help. A school’s API determines whether it receives recognition or sanctions. It is also used to compare schools in a statewide ranking system. The California Department of Education (CDE) calculates a school’s API using student test results from the California Standards Tests and, for high schools, the California High School Exit Exam (CAHSEE). APIs range from 200 to 1000. The CDE expects all schools to eventually obtain APIs of at least 800. [Additional information on the API](#) can be found on the CDE Web site.

CALIFORNIA API ACADEMIC PERFORMANCE INDEX	
Met schoolwide growth target	Yes
Met growth target for prior school year	Yes
API score	754
Growth attained from prior year	+11
Met subgroup* growth targets	No

Roosevelt’s API was 754 (out of 1000). This is an increase of 11 points compared with last year’s API. All students took the test. You can find three years of detailed API results in the Data Almanac that accompanies this report.

API RANKINGS: Based on our 2007–2008 test results, we started the 2008–2009 school year with a base API of 743. The state ranks all schools according to this score on a scale from 1 to 10 (10 being highest). Compared with all middle schools in California, our school ranked 5 out of 10.

SIMILAR SCHOOL RANKINGS: We also received a second ranking that compared us with the 100 schools with the most similar students, teachers, and class sizes. Compared with these schools, our school ranked 7 out of 10. The CDE recalculates this factor every year. To read more about the specific elements included in this calculation, refer to the [CDE Web site](#).

API GROWTH TARGETS: Each year the CDE sets specific API “growth targets” for every school. It assigns one growth target for the entire school, and it sets additional targets for ethnic groups, English Learners, special education students, or socioeconomic subgroups of students that make up a significant portion of the student body. Schools are required to meet all of their growth targets. If they do, they may be eligible to apply for awards through the California School Recognition Program and the Title I Achieving Schools Program.

We did not meet some or all of our assigned growth targets during the 2008–2009 school year. Just for reference, 50 percent of middle schools statewide met their growth targets.

SOURCE: API based on spring 2009 test cycle. Growth scores alone are displayed and are current as of December 2009.
*Ethnic groups, English Learners, special ed students, or socioeconomic groups of students that make up 15 percent or more of a school’s student body. These groups must meet AYP and API goals.
R/P - Results pending due to challenge by school.
N/A - Results not available.

API, Spring 2009

SOURCE: API based on spring 2009 test cycle. State average represents middle schools only.
NOTE: Only groups of students that represent at least 15 percent of total enrollment are calculated and displayed as student subgroups.

Adequate Yearly Progress

In addition to California’s accountability system, which measures student achievement using the API, schools must also meet requirements set by the federal education law known as **No Child Left Behind** (NCLB). This law requires all schools to meet a different goal: **Adequate Yearly Progress** (AYP).

We met 21 of 25 criteria for yearly progress. Because we fell short in four areas, we did not make AYP.

To meet AYP, middle schools must meet three criteria. First, a certain percentage of students must score at or above Proficient levels on the California Standards Tests (CST): 46 percent on the English/language arts test and 47.5 percent on the math test. All ethnic and socioeconomic subgroups of students also must meet these goals. Second, the schools must achieve an API of at least 650 or increase the API by one point from the prior year. Third, 95 percent of the student body must take the required standardized tests.

If even one subgroup of students fails to meet just one of the criteria, the school fails to meet AYP. While all schools must report their progress toward meeting AYP, only schools that receive federal funding to help economically disadvantaged students are actually penalized if they fail to meet AYP goals. Schools that do not make AYP for two or more years in a row in the same subject enter **Program Improvement** (PI). They must offer students transfers to other schools in the district and, in their second year in PI, tutoring services as well.

FEDERAL AYP ADEQUATE YEARLY PROGRESS	
Met AYP	No
Met schoolwide participation rate	Yes
Met schoolwide test score goals	Yes
Met subgroup* participation rate	Yes
Met subgroup* test score goals	No
Met schoolwide API for AYP	Yes
Program Improvement school in 2009	Yes

SOURCE: AYP is based on the Accountability Progress Report of December 2009. A school can be in Program Improvement based on students’ test results in the 2008–2009 school year or earlier.

*Ethnic groups, English Learners, special ed students, or socioeconomic groups of students that make up 15 percent or more of a school’s student body. These groups must meet AYP and API goals. R/P - Results pending due to challenge by school. N/A - Results not available.

Hispanic/Latino	●	●	●	●
White/Other	●	●	●	●

SOURCE: AYP release of September 2009, CDE.

The table at left shows our success or failure in meeting AYP goals in the 2008–2009 school year. The green dots represent goals we met; red dots indicate goals we missed. Just one red dot means that we failed to meet AYP.

Note: Dashes indicate that too few students were in the category to draw meaningful conclusions. Federal law requires valid test scores from at least 50 students for statistical significance.

Program Improvement, a Federal Intervention Program

A BRIEF HISTORY OF OUR SCHOOL’S PLACEMENT IN PROGRAM

IMPROVEMENT: Roosevelt was placed on the list of schools needing improvement (also known as Program Improvement, or PI) for the first time in 2009. In California, 185 middle schools were in stage 1 of PI as of December 2009.

THE STAGES OF PROGRAM IMPROVEMENT: Program Improvement is a five-stage process for monitoring, improving, and, if necessary, reorganizing any school that receives federal money under the Title I section of No Child Left Behind (NCLB). Schools in PI get extra attention from their district office to help them improve.

When a school misses even one of its goals for Adequate Yearly Progress, it is at risk of entering PI. If a school misses the same AYP goals two years in a row, it enters stage 1 of PI. Each subsequent year that a school misses any of its AYP goals, it goes one stage deeper into the process. Each stage results in increasingly severe consequences. The first stage gives parents the right to choose another school. In the second stage, students have the right to free tutoring in addition to the option to change schools. The last three stages can result in a change of staff and leadership, the conversion of the school to charter status, transferring the school to another district, or even the school’s closure.

FEDERAL INTERVENTION PROGRAM	
PI	
PROGRAM IMPROVEMENT	
In PI since	2009
Stage of PI	1 of 5
Change in 2009	Entered PI

SOURCE: PI status is based on the Accountability Progress Report of February 2010. A school can be in Program Improvement based on students’ test results in the 2008–2009 school year or earlier.

YEAR	PI STAGE	SUMMARY OF EVENTS FOR THIS YEAR	AYP GOALS NOT MET ■ AYP GOALS MET ■
2008	Not in PI	Roosevelt met 20 of the 21 criteria for Adequate Yearly Progress established by the federal law known as No Child Left Behind (NCLB).	
2009	1	We met 21 of the 25 criteria for Adequate Yearly Progress, causing the school to enter the first stage of Program Improvement.	

SOURCE: PI status is based on the Accountability Progress Report of February 2010. A school can be in Program Improvement based on students’ test results in the 2008–2009 school year or earlier. Some schools were in Program Improvement prior to the passage of No Child Left Behind, when the definition of PI was significantly modified.

CONSEQUENCES

PARENTS: Because Roosevelt is in stage (year) 1 of PI, parents of students have just one option. They can enroll their children in different schools in the district. To see the list of these schools, parents can contact either the principal or the district office staff.

SCHOOL: The school’s staff is revising its improvement plan. The staff is also using as much as ten percent of the school’s Title I (federal) funds for coaching teachers.

DISTRICT: The district is establishing a peer review group to evaluate the school’s annual improvement plan.

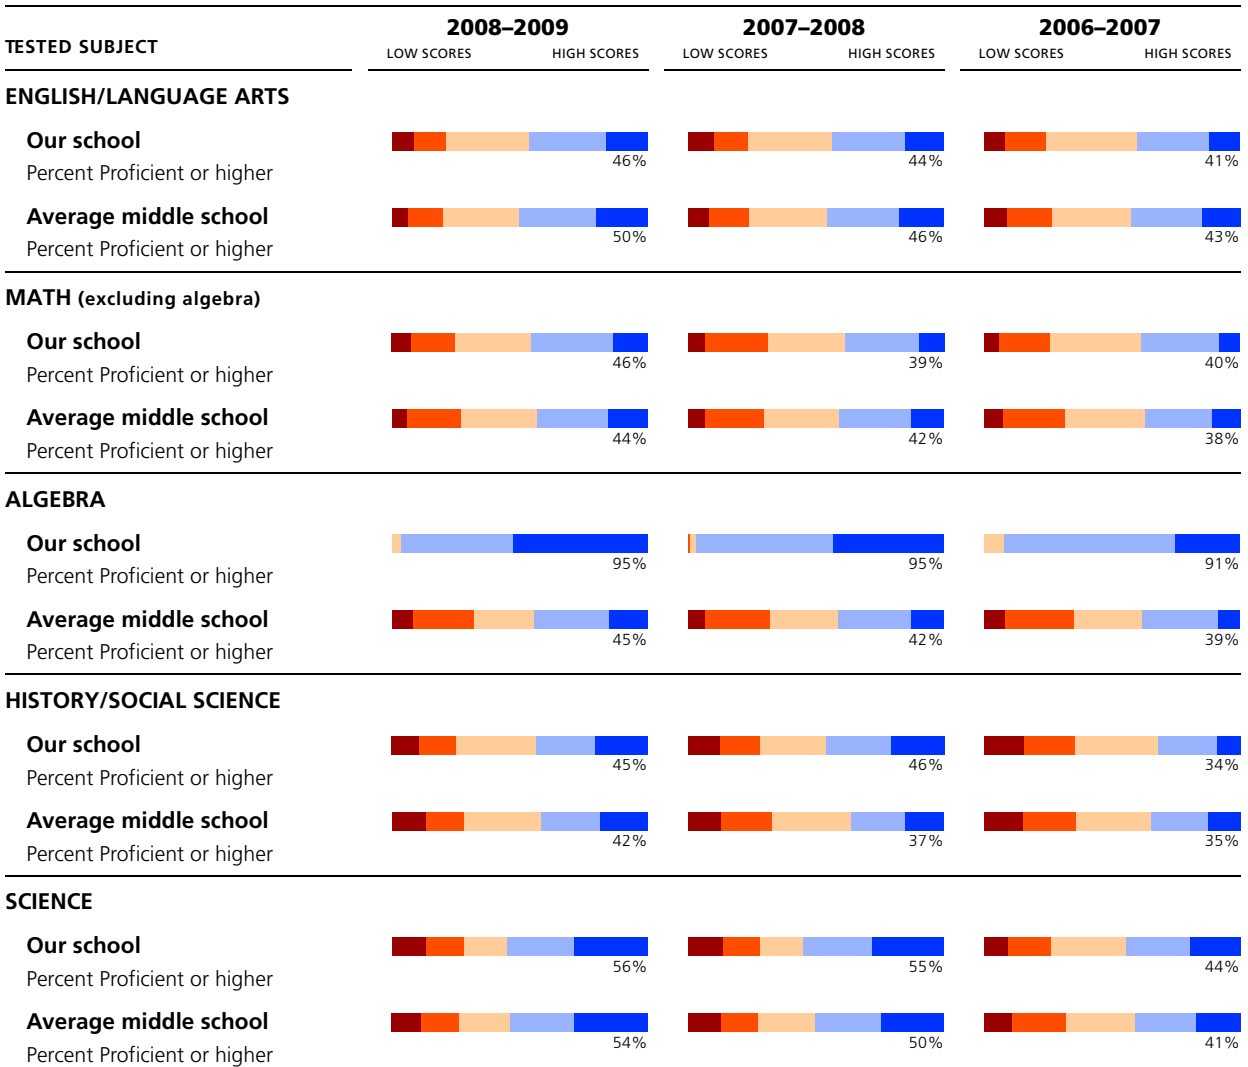

STUDENT ACHIEVEMENT

Here you'll find a three-year summary of our students' scores on the California Standards Tests (CST) in selected subjects. We compare our students' test scores with the results for students in the average middle school in California. On the following pages we provide more detail for each test, including the scores for different subgroups of students. In addition, we provide links to the California Content Standards on which these tests are based. If you'd like more information about the CST, please contact our principal or our teaching staff. To find [grade-level-specific scores](#), you can refer to the Standardized Testing and Reporting (STAR) Web site. Other tests in the [STAR program](#) can be found on the California Department of Education (CDE) Web site.

California Standards Tests

BAR GRAPHS BELOW SHOW THESE PROFICIENCY GROUPS (LEFT TO RIGHT):

■ FAR BELOW BASIC ■ BELOW BASIC ■ BASIC ■ PROFICIENT ■ ADVANCED

SOURCE: The scores for the CST are from the spring 2009 test cycle. State average represents middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.

Frequently Asked Questions About Standardized Tests

WHERE CAN I FIND GRADE-LEVEL REPORTS? Due to space constraints and concern for statistical reliability, we have omitted grade-level detail from these test results. Instead we present results at the schoolwide level. You can view the results of far more students than any one grade level would contain, which also improves their statistical reliability. Grade-level results are online on the [STAR Web site](#). More information about student test scores is available in the Data Almanac that accompanies this report.

WHAT DO THE FIVE PROFICIENCY BANDS MEAN? Test experts assign students to one of these five proficiency levels, based on the number of questions they answer correctly. Our immediate goal is to help students move up one level. Our eventual goal is to enable all students to reach either of the top two bands, Advanced or Proficient. Those who score in the middle band, Basic, have come close to attaining the required knowledge and skills. Those who score in either of the bottom two bands, Below Basic or Far Below Basic, need more help to reach the Proficient level.

HOW HARD ARE THE CALIFORNIA STANDARDS TESTS? Experts consider California's standards to be among the most clear and rigorous in the country. Just 53 percent of elementary school students scored Proficient or Advanced on the English/language arts test; 59 percent scored Proficient or Advanced in math. You can review the [California Content Standards](#) on the CDE Web site.

ARE ALL STUDENTS' SCORES INCLUDED? No. Only students in grades two through eleven are required to take the CST. When fewer than 11 students in one grade or subgroup take a test, state officials remove their scores from the report. They omit them to protect students' privacy, as called for by federal law.

CAN I REVIEW SAMPLE TEST QUESTIONS? Sample test questions for the CST are on the [CDE's Web site](#). These are actual questions used in previous years.

WHERE CAN I FIND ADDITIONAL INFORMATION? The CDE has a wealth of resources on its Web site. The STAR Web site publishes detailed reports for schools and districts, and assistance packets for parents and teachers. This site includes explanations of [technical terms](#), scoring methods, and the [subjects](#) covered by the tests for each grade. You'll also find a [guide](#) to navigating the STAR Web site as well as help for understanding how to [compare test scores](#).

English/Language Arts (Reading and Writing)

BAR GRAPHS BELOW SHOW THESE PROFICIENCY GROUPS (LEFT TO RIGHT):

FAR BELOW BASIC **BELOW BASIC** **BASIC** **PROFICIENT** **ADVANCED**

Subgroup Test Scores

BAR GRAPHS BELOW SHOW TWO PROFICIENCY GROUPS (LEFT TO RIGHT):

FAR BELOW BASIC, BELOW BASIC, AND BASIC **PROFICIENT AND ADVANCED**

GROUP	LOW SCORES	HIGH SCORES	PROFICIENT OR ADVANCED	STUDENTS TESTED	COMMENTS
Boys			44%	498	GENDER: About five percent more girls than boys at our school scored Proficient or Advanced.
Girls			49%	509	
English proficient			59%	717	ENGLISH PROFICIENCY: English Learners scored lower on the CST than students who are proficient in English. Because we give this test in English, English Learners tend to be at a disadvantage.
English Learners			16%	289	
Low income			43%	832	INCOME: About 21 percent fewer students from lower-income families scored Proficient or Advanced than our other students.
Not low income			64%	175	
Learning disabled			3%	86	LEARNING DISABILITIES: Students classified as learning disabled scored lower than students without learning disabilities. The CST is not designed to test the progress of students with moderate to severe learning differences.
Not learning disabled			50%	921	
Asian American	DATA STATISTICALLY UNRELIABLE		N/S	24	ETHNICITY: Test scores are likely to vary among students of different ethnic origins. The degree of variance will differ from school to school. Measures of the achievement gap are beyond the scope of this report.
Filipino			80%	85	
Hispanic/Latino			36%	468	
White/Other			50%	410	

SOURCE: The scores for the CST are from the spring 2009 test cycle. County and state averages represent middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.
 N/A: Not applicable. Either no students took the test, or to safeguard student privacy the CDE withheld all results because very few students took the test in any grade.
 N/S: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

The graph to the right shows how our students' scores have changed over the years. We present each year's results in a vertical bar, with students' scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

You can read the California standards for [English/language arts](#) on the CDE's Web site.

Hispanic/Latino	DATA STATISTICALLY UNRELIABLE		N/S	12	
White/Other	DATA STATISTICALLY UNRELIABLE		N/S	26	

SOURCE: The scores for the CST are from the spring 2009 test cycle. County and state averages represent middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.
 N/A: Not applicable. Either no students took the test, or to safeguard student privacy the CDE withheld all results because very few students took the test in any grade.
 N/S: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

We report our students’ algebra results separately because of the central importance of algebra in the California math standards. It is also a gateway course for college-bound students, who should start high school ready for geometry.

The graph to the right shows how our students’ scores have changed over the years. We present each year’s results in a vertical bar, with students’ scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

About seven percent of our seventh and eighth grade students took the algebra CST, compared with 30 percent of all middle school students statewide. You can review the **math** standards on the CDE’s Web site.

Not low income			54%	71	
Learning disabled			8%	38	LEARNING DISABILITIES: Students classified as learning disabled scored lower than students without learning disabilities. The CST is not designed to test the progress of students with moderate to severe learning differences.
Not learning disabled			48%	383	
Asian American	DATA STATISTICALLY UNRELIABLE		N/S	12	ETHNICITY: Test scores are likely to vary among students of different ethnic origins. The degree of variance will differ from school to school. Measures of the achievement gap are beyond the scope of this report.
Filipino			77%	39	
Hispanic/Latino			38%	192	
White/Other			43%	173	

SOURCE: The scores for the CST are from the spring 2009 test cycle. County and state averages represent middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.
 N/A: Not applicable. Either no students took the test, or to safeguard student privacy the CDE withheld all results because very few students took the test in any grade.
 N/S: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

The graph to the right shows how our eighth grade students' scores have changed over the years. We present each year's results in a vertical bar, with students' scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

You can read the [history/social science standards](#) on the CDE's Web site.

Although we teach science at all grade levels, only our eighth graders took the California Standards Test in this subject. You can read the **science standards** on the CDE's Web site.

Three-Year Trend: Science

STUDENTS

Students’ English Language Skills

At Roosevelt, 74 percent of students were considered to be proficient in English, compared with 81 percent of middle school students in California overall.

LANGUAGE SKILLS	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
English-proficient students	74%	78%	81%
English Learners	26%	22%	19%

SOURCE: Language Census for school year 2008–2009. County and state averages represent middle schools only.

Languages Spoken at Home by English Learners

Please note that this table describes the home languages of just the 264 students classified as English Learners. At Roosevelt, the language these students most often speak at home is Spanish. In California it’s common to find English Learners in classes with students who speak English well. When you visit our classrooms, ask our teachers how they work with language differences among their students.

LANGUAGE	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Spanish	52%	89%	86%
Vietnamese	0%	1%	2%
Cantonese	0%	2%	1%
Hmong	0%	0%	1%
Filipino/Tagalog	5%	1%	1%
Korean	1%	1%	1%
Khmer/Cambodian	0%	0%	1%
All other	42%	6%	7%

SOURCE: Language Census for school year 2008–2009. County and state averages represent middle schools only.

Ethnicity

Most students at Roosevelt identify themselves as Hispanic/Latino or White/European American/Other. The state of California allows citizens to choose more than one ethnic identity, or to select “multiethnic” or “decline to state.” As a consequence, the sum of all responses rarely equals 100 percent.

ETHNICITY	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
African American	1%	10%	8%
Asian American/Pacific Islander	11%	11%	11%
Hispanic/Latino	48%	62%	48%
White/European American/Other	40%	18%	34%

SOURCE: CBEDS census of October 2008. County and state averages represent middle schools only.

Family Income and Education

The free or reduced-price meal subsidy goes to students whose families earned less than \$39,220 a year (based on a family of four) in the 2008–2009 school year. At Roosevelt, 82 percent of the students qualified for this program, compared with 55 percent of students in California.

FAMILY FACTORS	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Low-income indicator	82%	64%	55%
Parents with some college	35%	47%	55%
Parents with college degree	25%	27%	31%

SOURCE: The free and reduced-price lunch information is gathered by most districts in October. This data is from the 2008–2009 school year. Parents’ education level is collected in the spring at the start of testing. Rarely do all students answer these questions. County and state averages represent middle schools only.

The parents of 35 percent of the students at Roosevelt have attended college and 25 percent have a college degree. This information can provide some clues to the level of literacy children bring to school. One precaution is that the students themselves provide this data when they take the battery of standardized tests each spring, so it may not be completely accurate. About 96 percent of our students provided this information.

CLIMATE FOR LEARNING

Average Class Sizes

The table at the right shows average class sizes for core courses. The average class size of all courses at Roosevelt varies from a low of 24 students to a high of 27. Our average class size schoolwide is 27 students. The average class size for middle schools in the state is 27 students.

AVERAGE CLASS SIZES OF CORE COURSES	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
English	24	25	25
History	27	28	28
Math	27	27	27
Science	27	29	28

SOURCE: CBEDS census, October 2008. County and state averages represent middle schools only.

Discipline

At times we find it necessary to suspend students who break school rules. We report only suspensions in which students are sent home for a day or longer. We do not report in-school suspensions, in which students are removed from one or more classes during a single school day. Expulsion is the most serious consequence we can impose. Expelled students are removed from the school permanently and denied the opportunity to continue learning here.

KEY FACTOR	OUR SCHOOL	DISTRICT AVERAGE	STATE AVERAGE
Suspensions per 100 students			
2008–2009	44	23	19
2007–2008	48	28	20
2006–2007	38	23	19
Expulsions per 100 students			
2008–2009	0	0	0
2007–2008	0	0	0
2006–2007	0	0	1

SOURCE: Data is from the California Department of Education, SARC research file. Data represents the number of incidents reported, not the number of students involved. District and state averages represent middle schools only.

During the 2008–2009 school year, we had 444 suspension incidents. We had three incidents of expulsion. To make it easy to compare our suspensions and expulsions to those of other schools, we represent these events as a ratio (incidents per 100 students) in this report. Please note that multiple incidents may involve the same student.

LEADERSHIP, TEACHERS, AND STAFF

Teacher Experience and Education

KEY FACTOR	DESCRIPTION	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Teaching experience	Average years of teaching experience	14	12	12
Newer teachers	Percentage of teachers with one or two years of teaching experience	11%	13%	12%
Teachers holding an MA degree or higher	Percentage of teachers with an MA or higher from a graduate school	49%	42%	36%
Teachers holding a BA degree alone	Percentage of teachers whose highest degree is a BA degree from a four-year college	51%	58%	64%

SOURCE: Professional Assignment Information Form (PAIF), October 2008, completed by teachers during the CBEDS census. County and state averages represent middle schools only.

About 11 percent of our teachers have fewer than three years of teaching experience, which is about the same average for new teachers in other middle schools in California. Our teachers have, on average, 14 years of experience. About 51 percent of our teachers hold only a bachelor’s degree from a four-year college or university. About 49 percent have completed a master’s degree or higher.

Credentials Held by Our Teachers

KEY FACTOR	DESCRIPTION	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Fully credentialed teachers	Percentage of staff holding a full, clear authorization to teach at the elementary or secondary level	96%	94%	95%
Trainee credential holders	Percentage of staff holding an internship credential	2%	5%	4%
Emergency permit holders	Percentage of staff holding an emergency permit	2%	1%	2%
Teachers with waivers	Lowest level of accreditation, used by districts when they have no other option	0%	0%	1%

SOURCE: PAIF, October 2008. This is completed by teachers during the CBEDS census. County and state averages represent middle schools only. A teacher may have earned more than one credential. For this reason, it is likely that the sum of all credentials will exceed 100 percent.

About 96 percent of the faculty at Roosevelt hold a full credential. This number is close to the average for all middle schools in the state. About two percent of the faculty at Roosevelt hold a trainee credential, which is reserved for those teachers who are in the process of completing their teacher training. In comparison, four percent of middle school teachers throughout the state hold trainee credentials. About two percent of our faculty hold an emergency permit. Very few middle school teachers hold this authorization statewide (just two percent). About 94 percent of the faculty at Roosevelt hold the secondary (single-subject) credential. This number is above the average for middle schools in California, which is 82 percent. You can find three years of data about teachers’ credentials in the Data Almanac that accompanies this report.

Indicators of Teachers Who May Be Underprepared

KEY FACTOR	DESCRIPTION	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Core courses taught by a teacher not meeting NCLB standards	Percentage of core courses not taught by a “highly qualified” teacher according to federal standards in NCLB	17%	N/A	0%
Out-of-field teaching	Percentage of algebra and science courses taught by a teacher who lacks the appropriate credential for the course	57%	25%	30%
Teachers lacking a full credential	Percentage of teachers without a full, clear credential	4%	6%	5%

SOURCE: Professional Assignment Information Form (PAIF) of October 2008. Data on NCLB standards is from the California Department of Education, SARC research file.

“HIGHLY QUALIFIED” TEACHERS: The federal law known as No Child Left Behind (NCLB) requires districts to report the number of teachers considered to be “[highly qualified](#).” These “highly qualified” teachers must have a full credential, a bachelor’s degree, and, if they are teaching a core subject (such as reading, math, science, or social studies), they must also demonstrate expertise in that field. The table above shows the percentage of core courses taught by teachers who are considered to be less than “highly qualified.” There are exceptions, known as the [High Objective Uniform State Standard of Evaluation](#) (HOUSSE) rules, that allow some veteran teachers to meet the “highly qualified” test who wouldn’t otherwise do so.

TEACHING OUT OF FIELD: When a teacher lacks a subject area authorization for a course she is teaching, that course is counted as [out-of-field](#). The students who take that course are also counted. For example, if an unexpected vacancy in a biology class occurs, and a teacher who normally teaches English literature (and who lacks a subject area authorization in science) fills in to teach for the rest of the year, that teacher would be teaching out of field. See the detail for algebra and science in the Out-of-Field Teaching table. About 57 percent of our core courses were taught by teachers who were teaching out of their field of expertise, compared with 30 percent of core courses taught by such middle school teachers statewide.

CREDENTIAL STATUS OF TEACHERS: Teachers who lack full credentials are working under the terms of an emergency permit, an internship credential, or a waiver. They should be working toward their credential, and they are allowed to teach in the meantime only if the school board approves. About four percent of our teachers were working without full credentials, compared with five percent of teachers in middle schools statewide.

Out-of-Field Teaching, Detail by Selected Subject Areas

CORE COURSE	DESCRIPTION	OUR SCHOOL	COUNTY AVERAGE	STATE AVERAGE
Algebra	Percentage of algebra courses taught by a teacher lacking the appropriate subject area authorization	40%	21%	25%
Science	Percentage of science courses taught by a teacher lacking the appropriate subject area authorization	63%	26%	33%

SOURCE: PAIF, October 2008. This is completed by teachers during the CBEDS census. County and state averages represent middle schools only.

In this more detailed analysis, you’ll find the percentage of algebra courses taught by teachers who lack subject-area authorization in math. While algebra teachers in some middle schools might not formally be required to hold this math subject-area authorization, it is better if they do. We have applied the same criteria to science courses taught at all middle school grade levels. Note that school board policy determines which grade levels are secondary grade levels and require teachers to hold a secondary (single-subject) credential, and which are primary grade levels requiring an elementary (multiple-subject) credential.

Districtwide Distribution of Teachers Who Are Not “Highly Qualified”

Here, we report the percentage of core courses in our district whose teachers are considered to be less than “highly qualified” by NCLB’s standards. We show how these teachers are distributed among schools according to the percentage of low-income students enrolled.

The CDE has divided schools in the state into four groups (quartiles), based on the percentage of families who qualify and apply for free or reduced-price lunches. The one-fourth of schools with the most students receiving subsidized lunches are assigned to the first group. The one-fourth of schools with the fewest students receiving subsidized lunches are assigned to the fourth group. We compare the courses and teachers assigned to each of these groups of schools to see how they differ in “highly qualified” teacher assignments.

DISTRICT FACTOR	DESCRIPTION	CORE COURSES NOT TAUGHT BY HQT IN DISTRICT
Districtwide	Percentage of core courses not taught by “highly qualified” teachers (HQT)	7%
Schools with the most low-income students	First quartile of schools whose core courses are not taught by “highly qualified” teachers	13%
Schools with the fewest low-income students	Fourth quartile of schools whose core courses are not taught by “highly qualified” teachers	5%

SOURCE: Data is from the California Department of Education, SARC research file.

The average percentage of courses in our district not taught by a “highly qualified” teacher is six percent, compared with one percent statewide. For schools with the highest percentage of low-income students, this factor is 13 percent, compared with zero percent statewide. For schools with the lowest percentage of low-income students, this factor is five percent, compared with zero percent statewide.

Specialized Resource Staff

Our school may employ social workers, speech and hearing specialists, school psychologists, nurses, and technology specialists. These specialists often work part time at our school and some may work at more than one school in our district. Their schedules will change as our students’ needs change. For these reasons, the staffing counts you see here may differ from the staffing provided today in this school. For more details on [statewide ratios of counselors, psychologists, or other pupil services](#) staff to students, see the California Department of Education (CDE) Web site. [Library facts](#) and frequently asked questions are also available there.

ACADEMIC GUIDANCE COUNSELORS: Our school has two full-time equivalent academic counselors, which is equivalent to one counselor for every 505 students. Just for reference, California districts employed about one academic counselor for every 608 middle school students in the state. More information about [counseling and student support](#) is available on the CDE Web site.

STAFF POSITION	STAFF (FTE)
Counselors	2.0
Librarians	0.0
Psychologists	0.8
Social workers	0.0
Nurses	0.0
Speech/language/hearing specialists	0.0
Resource specialists	0.0

SOURCE: CBEDS census, October 2008.

TECHNICAL NOTE ON DATA RECENCY: All data is the most current available as of December 2009. The CDE may release additional or revised data for the 2008–2009 school year after the publication date of this report. We rely on the following sources of information from the California Department of Education: California Basic Education Data System (CBEDS) (October 2008 census); Language Census (March 2009); California Achievement Test and California Standards Tests (spring 2009 test cycle); Academic Performance Index (September 2009 growth score release); Adequate Yearly Progress (September 2009).

DISCLAIMER: School Wise Press, the publisher of this accountability report, makes every effort to ensure the accuracy of this information but offers no guarantee, express or implied. While we do our utmost to ensure the information is complete, we must note that we are not responsible for any errors or omissions in the data. Nor are we responsible for any damages caused by the use of the information this report contains. Before you make decisions based on this information, we strongly recommend that you visit the school and ask the principal to provide the most up-to-date facts available.

rev20091216_19-64568-6057715m/17253

» Adequacy of Key Resources

Here you'll find key facts about our teachers, textbooks, and facilities during the school year in progress, 2009–2010. Please note that these facts are based on evaluations our staff conducted in accordance with the Williams legislation.

This section also contains information about 2008–2009 staff development days, and, for high schools, percentages of seniors who met our district's graduation requirements.

TEACHERS

Teacher Vacancies

KEY FACTOR	2007–2008	2008–2009	2009–2010
TEACHER VACANCIES OCCURRING AT THE BEGINNING OF THE SCHOOL YEAR			
Total number of classes at the start of the year	177	285	285
Number of classes which lacked a permanently assigned teacher within the first 20 days of school	0	0	0
TEACHER VACANCIES OCCURRING DURING THE SCHOOL YEAR			
Number of classes where the permanently assigned teacher left during the year	0	1	1
Number of those classes where you replaced the absent teacher with a single new teacher	0	0	1

NOTES:

There are two general circumstances that can lead to the unfortunate case of a classroom without a full-time, permanently assigned teacher. Within the first 20 days of the start of school, we can be surprised by too many students showing up for school, or too few teachers showing up to teach. After school starts, however, teachers can also be surprised by sudden changes: family emergencies, injuries, accidents, etc. When that occurs, it is our school's and our district's responsibility to fill that teacher's vacancy with a qualified, full-time, and permanently assigned replacement. For that reason, we report teacher vacancies in two parts: at the start of school, and after the start of school.

Teacher Misassignments

A “misassigned” teacher is one who lacks the appropriate subject-area authorization for a class she is teaching. Under the terms of the Williams settlement, schools must inform the public of the number of their teachers who are misassigned. It is possible for a teacher who lacks the authorization for a subject to get special permission—in the form of an emergency permit, waiver, or internship authorization—from the school board or county office of education to teach the subject anyway. This permission prevents the teacher from being counted as misassigned.

KEY FACTOR	DESCRIPTION	2007–2008	2008–2009	2009–2010
Teacher Misassignments	Total number of classes taught by teachers without a legally recognized certificate or credential	1	0	0
Teacher Misassignments in Classes that Include English Learners	Total number of classes that include English learners and are taught by teachers without CLAD/BCLAD authorization, ELD or SDAIE training, or equivalent authorization from the California Commission on Teacher Credentialing	3	2	1
Other Employee Misassignments	Total number of service area placements of employees without the required credentials	0	0	0

NOTES:

Staff Development

Teachers take some time each year to improve their teaching skills and to extend their knowledge of the subjects they teach. Here you'll see the amount of time each year we set aside for their continuing education and professional development.

YEAR	PROFESSIONAL DEVELOPMENT DAYS
2008–2009	3
2007–2008	3.00
2006–2007	3.00

TEXTBOOKS

The main fact about textbooks that the Williams legislation calls for described whether schools have enough books in core classes for all students. The law also asks districts to reveal whether those books are presenting what the California Content Standards call for.

This information was collected on 11/30/2009.

NOTES:

TAUGHT AT OUR SCHOOL?	SUBJECT	ARE THERE TEXTBOOKS OR INSTRUCTIONAL MATERIALS IN USE?		ARE THERE ENOUGH BOOKS FOR EACH STUDENT?	
		STANDARDS ALIGNED?	OFFICIALLY ADOPTED?	FOR USE IN CLASS?	PERCENTAGE OF STUDENTS HAVING BOOKS TO TAKE HOME?

California Physical Science	Prentice Hall	2007
SOCIAL SCIENCE		
World History: Ancient Civilizations	McDougal Littell	2006
World History: Medieval & Early Modern Times	McDougal Littell	2006
Creating America: Beginnings through WWI	McDougal Littell	2006

FACILITIES

To determine the condition of our facilities, our district sent experts from our facilities team to perform an inspection using a survey called the Facilities Inspection Tool, which is issued by the Office of Public School Construction.

Based on that survey, we've answered the questions you see on this report. Please note that the information reflects the condition of our buildings as of the date of the report. Since that time, those conditions may have changed.

INSPECTORS AND ADVISORS: This report was completed on 01/20/2010 by Luis Hernandez. The most recent facilities inspection occurred on 01/15/2010.

ADDITIONAL INSPECTORS: There were no other inspectors used in the completion of this form.

SCHOOL FINANCES, 2007–2008

We are required to report financial data from the 2007–2008 school year by the California Dept. of Education. More recent financial data is available on request from the district office.

Spending per Student

To make comparisons possible across schools and districts of varying sizes, we first report our overall spending per student. We base our calculations on our average daily attendance (ADA) for the 2007-2008 school year.

We've broken down expenditures by the type of funds used to pay for them. Unrestricted funds can be used for any lawful purpose. Restricted funds, however, must be spent for specific purposes set out by legal requirements or the donor. Examples include funding for instructional materials, economic impact aid, and teacher and principal training funds.

Next to the figures for the district and state averages, we show the percentage by which the school's spending varies from the district and state averages. For example, we calculate the school's variance from the district average using this formula:

$$\frac{(\text{SCHOOL AMOUNT} - \text{DISTRICT AVERAGE})}{\text{DISTRICT AVERAGE}}$$

TYPE OF FUNDS	OUR SCHOOL	DISTRICT AVERAGE	SCHOOL-TO-DISTRICT VARIANCE	STATE AVERAGE	SCHOOL-TO-STATE VARIANCE
Unrestricted funds (\$/student)	\$4,701.00	\$5,492.00	14%	\$5,495	14%
Restricted funds (\$/student)	\$974.00	\$3,411.00	71%	\$3,099	69%
Total (\$/student)	\$5,676.00	\$8,903.00	36%	\$8,594	33%

Compensation per Teacher

To make comparisons possible across schools and districts of varying sizes, we report our compensation per full-time equivalent (FTE) certificated staff.* A teacher/administrator/pupil services person who works full-time counts as 1.0 FTE. Those who work only half-time count as 0.5 FTE.

CERTIFICATED STAFF*	OUR SCHOOL	DISTRICT AVERAGE	SCHOOL-TO-DISTRICT VARIANCE	STATE AVERAGE	SCHOOL-TO-STATE VARIANCE
Salary (\$/certificated staff)	\$65,166.00	\$68,293.00	5%	\$72,020	10%
Benefits (\$/certificated staff)	\$19,402.00	\$21,115.00	8%	\$15,548	25%
Total (\$/certificated staff)	\$84,567.00	\$89,408.00	6%	\$87,568	4%

* A certificated staff person is a school employee who is required by the state to hold teaching credentials, including full-time, part-time, substitute, or temporary teachers and most administrators.

» Data Almanac

This Data Almanac provides more-detailed information than the School Accountability Report Card as well as data that covers a period of more than one year. It presents the facts and statistics in tables without narrative text.

STUDENTS AND TEACHERS

Student Enrollment by Ethnicity and Other Characteristics

The ethnicity of our students, estimates of their family income and education level, their English fluency, and their learning-related disabilities.

GROUP	ENROLLMENT

Teacher Credentials

The number of teachers assigned to the school with a full credential and without a full credential, for both our school and the district. We also present three years’ of data about the number of teachers who lacked the appropriate subject-area authorization for one or more classes they taught.

TEACHERS	SCHOOL			DISTRICT
	2006–2007	2007–2008	2008–2009	2008–2009
With Full Credential	51	46	45	1,191
Without Full Credential	1	2	2	40
Teaching out of field	8	9	9	N/A

SOURCE: CBEDS, October 2008, Professional Assignment Information Form (PAIF) section.

Physical Fitness

Students in grades five, seven, and nine take the California Fitness Test each year. This test measures students’ aerobic capacity, body composition, muscular strength, endurance, and flexibility using six different tests. The table below shows the percentage of students at our school who scored within the “healthy fitness zone” on four, five, and all six tests. More information about [physical fitness testing and standards](#) is available on the CDE Web site.

GRADE LEVEL	PERCENTAGE OF STUDENTS MEETING HEALTHY FITNESS ZONES		
	FOUR OF SIX STANDARDS	FIVE OF SIX STANDARDS	SIX OF SIX STANDARDS
Grade 5	N/A	N/A	N/A
Grade 7	18%	28%	26%
Grade 9	N/A	N/A	N/A

SOURCE: Physical fitness test data is produced annually as schools test their students on the six Fitnessgram Standards. Data is reported by Educational Data Systems.

STUDENT PERFORMANCE

California Standardized Testing and Reporting Program

The California Standards Tests (CST) show how well students are doing in learning what the state content standards require. The CST include English/language arts and mathematics in grades six through eight; science in grade eight; and history/social science in grade eight. Student scores are reported as performance levels. We also include results from the California Modified Assessment and California Alternative Performance Assessment (CAPA).

STAR Test Results for All Students: Three-Year Comparison

The percentage of students achieving at the Proficient or Advanced level (meeting or exceeding the state standards) for the most current three-year period.

SUBJECT	SCHOOL PERCENT PROFICIENT OR ADVANCED			DISTRICT PERCENT PROFICIENT OR ADVANCED			STATE PERCENT PROFICIENT OR ADVANCED		
	2007	2008	2009	2007	2008	2009	2007	2008	2009
English/ language arts	41%	44%	46%	58%	59%	63%	43%	46%	50%
History/social science	34%	46%	44%	48%	52%	57%	33%	36%	41%
Mathematics	43%	44%	48%	57%	58%	60%	40%	43%	46%
Science	45%	54%	56%	52%	62%	64%	38%	46%	50%

SOURCE: California Standards Tests (CST) results, spring 2009 test cycle, as interpreted and published by the CDE unit responsible for School Accountability Report Cards.

STAR Test Results by Student Subgroup: Most Recent Year

The percentage of students, by subgroup, achieving at the Proficient or Advanced level (meeting or exceeding the state standards) for the most recent testing period.

STUDENT SUBGROUP	PERCENTAGE OF STUDENTS SCORING PROFICIENT OR ADVANCED			
	ENGLISH/ LANGUAGE ARTS 2008–2009	HISTORY/ SOCIAL SCIENCE 2008–2009	MATHEMATICS 2008–2009	SCIENCE 2008–2009
African American	44%	N/A	19%	N/A
American Indian or Alaska Native	N/A	N/A	N/A	N/A
Asian	83%	67%	88%	92%
Filipino	80%	77%	76%	77%
Hispanic or Latino	35%	38%	35%	48%
Pacific Islander	N/A	N/A	N/A	N/A
White (not Hispanic)	50%	43%	57%	57%
Boys	43%	50%	49%	59%
Girls	49%	39%	48%	54%
Economically disadvantaged	43%	42%	46%	55%
English Learners	16%	21%	26%	28%
Students with disabilities	8%	8%	6%	18%
Students receiving migrant education services	N/A	N/A	N/A	N/A

NAEP: California’s 4th and 8th Graders Compared to Students Nationally

Federal education officials want parents to understand how their state’s students compare to students nationally. For this purpose, they created the test called the National Assessment of Educational Progress (NAEP). It is sometimes called the Nation’s Report Card. Students in grades four, eight, and twelve take this test in nine subject areas. The NAEP test results are not valid for schools or districts. For that reason, you only see results below for students statewide.

Reading and Math Results

This table shows the average NAEP score (scores range from zero to 500) for the state and the nation, and the percentage of California students grouped into each of three achievement levels (Basic, Proficient, and Advanced). We compare our state’s fourth and eighth graders with their peers in the U.S. in reading and math.

SUBJECT AND GRADE LEVEL	AVERAGE SCALE SCORE		PERCENTAGE OF CA STUDENTS AT EACH ACHIEVEMENT LEVEL		
	STATE	NATIONAL	BASIC	PROFICIENT	ADVANCED
Reading 2007, Grade 4	209	220	30%	18%	5%
Reading 2007, Grade 8	251	261	41%	20%	2%
Mathematics 2007, Grade 4	232	239	41%	25%	5%
Mathematics 2007, Grade 8	270	282	36%	18%	5%

SOURCE: School Accountability Report Card unit of the California Department of Education.

Participation Rates for Students with Disabilities and English Learners

This table shows the percentage of the nation’s and California’s students with disabilities and English Learners who took the test called the National Assessment of Educational Progress (NAEP).

SUBJECT AND GRADE LEVEL	STATE PARTICIPATION RATE		NATIONAL PARTICIPATION RATE	
	STUDENTS WITH DISABILITIES	ENGLISH LEARNERS	STUDENTS WITH DISABILITIES	ENGLISH LEARNERS
Reading 2007, Grade 4	74%	93%	65%	80%
Reading 2007, Grade 8	78%	92%	66%	77%
Mathematics 2007, Grade 4	79%	96%	84%	94%
Mathematics 2007, Grade 8	85%	96%	78%	92%

SOURCE: School Accountability Report Card unit of the California Department of Education.

For further information, you can read what the California Department of Education says about the [differences between the California Standards Tests and the National Assessment of Educational Progress](#). The NAEP Web site includes background information for parents about the [Nation’s Report Card](#). Educators can learn more by going to the [NAEP Web site](#).

ACCOUNTABILITY

California Academic Performance Index (API)

The Academic Performance Index (API) is an annual measure of the academic performance and progress of schools in California. APIs range from 200 to 1000, with a statewide target of 800. Detailed information about the API can be found on the CDE Web site at <http://www.cde.ca.gov/ta/ac/ap/>.

API Ranks: Three-Year Comparison

The state assigns statewide and similar-schools API ranks for all schools. The API ranks range from 1 to 10. A statewide rank of 1 means that the school has an API in the lowest 10 percent of all middle schools in the state, while a statewide rank of 10 means that the school has an API in the highest 10 percent of all middle schools in the state. The similar-schools API rank reflects how a school compares with 100 statistically matched schools that have similar teachers and students.

API RANK	2006–2007	2007–2008	2008–2009
Statewide rank	6	6	5
Similar-schools rank	9	8	7

SOURCE: The API Base Report from August 2009.

API Changes by Subgroup: Three-Year Comparison

API changes for all students and student subgroups: the actual API changes in points added or lost for the past three years, and the most recent API. Note: "N/A" means that the student group is not numerically significant.

SUBGROUP	ACTUAL API CHANGE			API
	2006–2007	2007–2008	2008–2009	2008–2009
All students at the school	+3	+9	+11	754
African American	N/A	N/A	N/A	N/A
American Indian or Alaska Native	N/A	N/A	N/A	N/A
Asian	N/A	N/A	N/A	N/A
Filipino	N/A	N/A	N/A	N/A
Hispanic or Latino	+4	+15	+2	700
Pacific Islander	N/A	N/A	N/A	N/A
White (non Hispanic)	+1	+5	+24	781
Economically disadvantaged	+3	+10	+11	739
English Learners	+14	+23	+22	747
Students with disabilities	N/A	N/A	N/A	N/A

SOURCE: The API Growth Report as released in the Accountability Progress Report in October 2009.

Federal Adequate Yearly Progress (AYP) and Intervention Programs

The federal law known as No Child Left Behind requires that all schools and districts meet all three of the following criteria in order to attain Adequate Yearly Progress (AYP):

- (a) a 95-percent participation rate on the state’s tests
- (b) a CDE-mandated percentage of students scoring Proficient or higher on the state’s English/language arts and mathematics tests
- (c) an API of at least 590 or growth of at least one point

AYP for the District

Whether the district met the federal requirement for AYP overall, and whether the school and the district met each of the AYP criteria.

AYP CRITERIA	DISTRICT
Overall	No
Graduation rate	Yes
Participation rate in English/language arts	Yes
Participation rate in mathematics	Yes
Percent Proficient in English/language arts	No
Percent Proficient in mathematics	No
Met Academic Performance Index (API)	Yes

SOURCE: The AYP Report as released in the Accountability Progress Report in September 2009.

Intervention Program: District Program Improvement (PI)

Districts receiving federal Title I funding enter Program Improvement (PI) if they do not make AYP for two consecutive years in the same content area (English/language arts or mathematics) and for each grade span or on the same indicator (API or graduation rate). After entering PI, districts advance to the next level of intervention with each additional year that they do not make AYP.

INDICATOR	DISTRICT
PI stage	Not in PI
The year the district entered PI	N/A
Number of schools currently in PI	1
Percentage of schools currently in PI	3%

SOURCE: The Program Improvement Report as released in the Accountability Progress Report in September 2009.

DISTRICT EXPENDITURES

According to the CDE’s SARC Data Definitions, “State certification/release dates for fiscal data occur in middle to late spring, precluding the inclusion of 2008–09 data in most cases. Therefore, 2007–08 data are used for report cards prepared during 2009–10.”

Total expenses include only the costs related to direct educational services to students. This figure does not include food services, land acquisition, new construction, and other expenditures unrelated to core educational purposes. The expenses-per-student figure is calculated by dividing total expenses by the district’s average daily attendance (ADA). More information is available on the [CDE’s Web site](#).

CATEGORY OF EXPENSE	OUR DISTRICT	SIMILAR DISTRICTS	ALL DISTRICTS
FISCAL YEAR 2007–2008			
Total expenses	\$225,716,392	N/A	N/A
Expenses per student	\$8,270	\$8,680	\$8,594
FISCAL YEAR 2006–2007			
Total expenses	\$208,246,634	N/A	N/A
Expenses per student	\$7,548	\$8,193	\$8,117

SOURCE: Fiscal Services Division, California Department of Education.

District Salaries, 2007–2008

This table reports the salaries of teachers and administrators in our district for the 2007–2008 school year. This table compares our average salaries with those in districts like ours, based on both enrollment and the grade level of our students. In addition, we report the percentage of our district’s total budget dedicated to teachers’ and administrators’ salaries. The costs of health insurance, pensions, and other indirect compensation are not included.

SALARY INFORMATION	DISTRICT AVERAGE	STATE AVERAGE
Beginning teacher’s salary	\$42,451	\$42,065
Midrange teacher’s salary	\$65,170	\$67,109
Highest-paid teacher’s salary	\$88,157	\$86,293
Average principal’s salary (middle school)	\$118,692	\$112,279
Superintendent’s salary	\$245,220	\$216,356
Percentage of budget for teachers’ salaries	43%	39%
Percentage of budget for administrators’ salaries	5%	6%
