Notes: McSymphony makes a good starter for the younger grades and the Unit 1&2 material can also start out the older grades who will move on to CMJ quickly  
The CMJ materials will need to be lightened a bit and tailored for the younger grades

Current upper grades will get less sessions over all so Units can be hand picked from the curriculum to hit more highlights.  
The above outlines can, and should be altered to accommodate this once we have the whole curriculum to look over.
