Other activities

❖ Quiz Bowl

❖ Chess

Program evaluation

Evaluations were positive

Parent and administrator evaluations were 100% positive

Suggestions: more group work, announce opportunities for joining Chess and Quiz Bowl (we can do this through our announcement screen in the hallway and cafeteria), teachers should explain more, challenge us more and not make it as hard (standard answers) Parents appreciated the opportunities and the skills their students were developing. They feel these classes keep their children motivated.

All were pleased with the program and feel it prepares students for college

Goals

Continue to monitor all options by:

1. Monitoring Pre-AP lesson plans each nine weeks to check for differentiation
2. Continue to evaluate the possibility of adding more Pre-AP social studies and science classes.
3. Help students see connections between grades today and jobs tomorrow and responsibility and how it is tied to adulthood.
