

SAFETY PROGRAM

The superintendent will establish procedures in an effort to offer reasonable protection for the safety of students, employees, visitors, and others present on school property or at school-sponsored events. The practice of safety shall be taught in educational programs in traffic and pedestrian safety, driver education, fire prevention, emergency procedures, disaster preparedness, etc., appropriately geared to students in different grade levels. Areas of emphasis shall include, but not be limited to, in-service training, accident record keeping, plant inspection, driver and vehicle safety programs, fire prevention, and emergency procedures in traffic safety problems relevant to students, employees, and the community.

Not later than October 1 of each school year, each school district site shall select a Safe and Healthy School Committee composed of at least six members including an equal number of teachers, parents or the children affected, and students.

The committee will study and make recommendations to the principal concerning unsafe conditions, possible strategies for students to avoid harm at school, student victimization, crime prevention, school violence, bullying, and other issues which prohibit the maintenance of a safe school.
