

Jeopardy

From microorganisms to plants	Animals	The Human Body	Science Skills	Lab Skills
<u>\$100</u>	<u>\$100</u>	<u>\$100</u>	<u>\$100</u>	<u>\$100</u>
<u>\$200</u>	<u>\$200</u>	<u>\$200</u>	<u>\$200</u>	<u>\$200</u>
<u>\$300</u>	<u>\$300</u>	<u>\$300</u>	<u>\$300</u>	<u>\$300</u>
<u>\$400</u>	<u>\$400</u>	<u>\$400</u>	<u>\$400</u>	<u>\$400</u>
<u>\$500</u>	<u>\$500</u>	<u>\$500</u>	<u>\$500</u>	<u>\$500</u>

Final Jeopardy

1 - \$100

- The protein coat surrounding a virus.
- What is a capsid?

1 - \$200

- Very first eukaryotes.

- What are protists?

1 - \$300

- Plants use energy to carry out photosynthesis.
- What is sunlight?

1 - \$400

Dermal tissue in young plants consisting of a single layer of cells.

- What is epidermis?

1 - \$500

- Male parts of a flower.

- What is stamens?

2 - \$100

- Fewer than 5% of animal species.

- What is chordates?

2 - \$200

- Structures such as legs or antennas protruding from the body.
- What are appendages?

2 - \$300

- They feed on tissues or blood or other body fluids.
- What is parasites?

2 - \$400

- Information that causes an organism to react.

- What is a stimulus?

2 - \$500

- Acquired changes in the behavior during ones lifetime.
- What is learning?

3 - \$100

- Skin and lining of the stomach.
- What are epithelial tissues?

3 - \$200

- Spinal cord and brain used to create a proper response and deliver it to the appropriate body parts.
- What is central nervous system?

3 - \$300

- Upper chamber of the heart.

What is atrium?

3 - \$400

- Skeleton that supports the central axis of the body.
- What is axial skeleton?

3 - \$500

- Lower chamber of heart.

- What is ventricle?

4 - \$100

- A way to record what takes place during an experiment.
- What is a graph?

4 - \$200

- Circle charts.

- What are circle graphs?

4 - \$300

- Using one or more of the senses to gather information.
- What s observing?

4 - \$400

- Observations are usually followed by these.
- What is inferences?

4 - \$500

- Helps organize a topic that has many subtopics.

- What is a concept map?

5 - \$100

- The factor that scientists purposely change in an experiment.
- What is a hypothesis?

5 - \$200

- A possible explanation about an object or event in science.
- What is the metric system?

5 - \$300

Used to protect ones eyes during an experiment.

What is goggles?

5 - \$400

- Report immediately to the teacher.

- What is an accident?

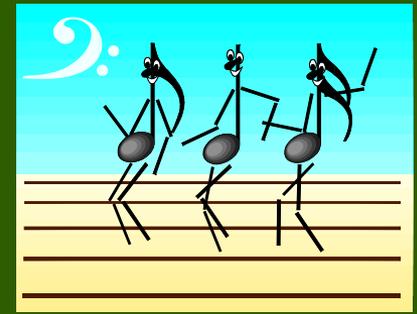

5 - \$500

- Used in most biology classes to see things microscopic.
- What is a microscope?

Final Jeopardy

- Placed on microscope slide to observe.
- What is a specimen?
