The iReady Reading and Math assessment is a computer adaptive assessment of general reading achievement, comprehension and math across all school years. iReady Reading provides nationally norm-referenced reading scores and criterion-referenced scores.

Amplify is a set of testing materials useful for determining the appropriate progress monitoring level, determining the instructional level, and setting goals for students who have missed the prior benchmark goals and continue to struggle in acquiring basic early literacy skills.

The ACAP Summative will be administered to grades 2-8, once a year, in the spring. The content areas to be addressed are math and English/Language Arts, to include a writing section.
