High School Teachers: Finding GT Students

Expand Ad Hoc Reporting > Filter Designer

Expand the Teacher High group. Click on a filter and click the SEARCH button.
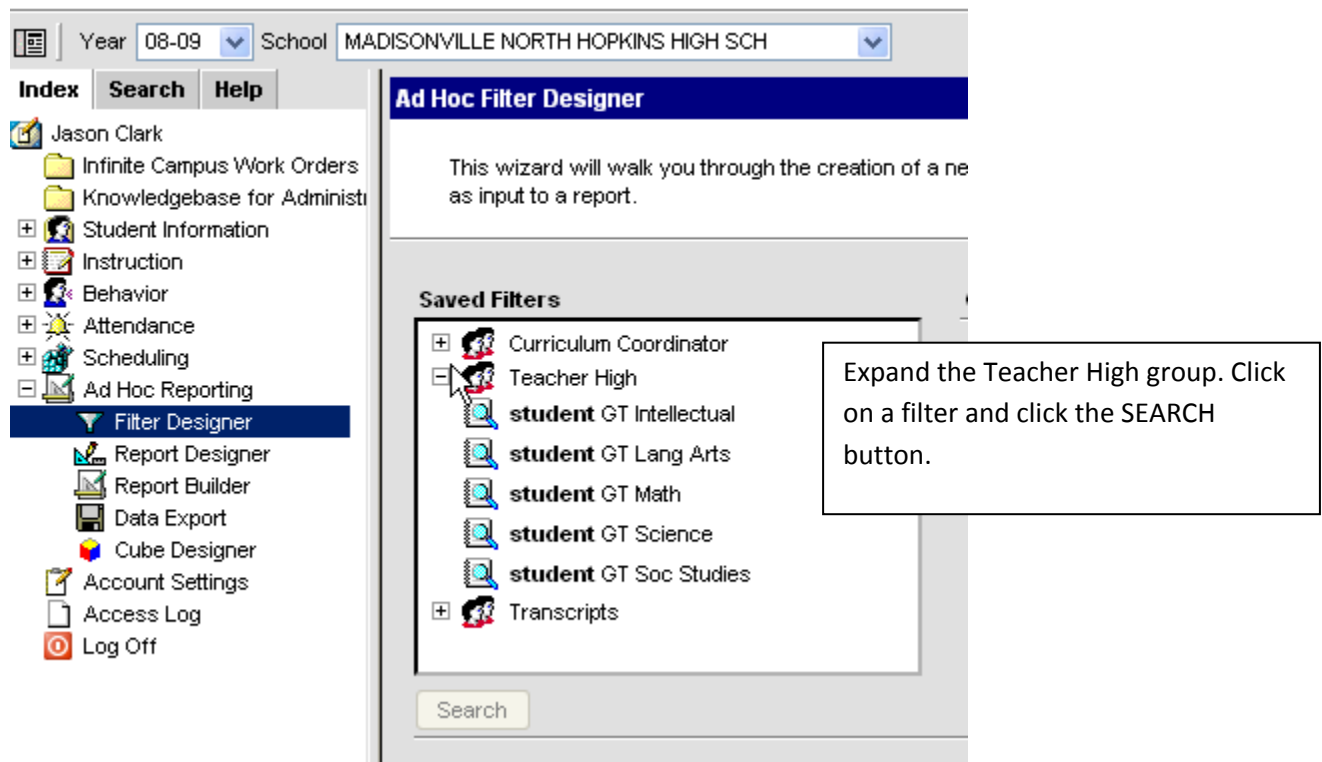

The names of students who qualify in that subject area will appear in the Search pane.
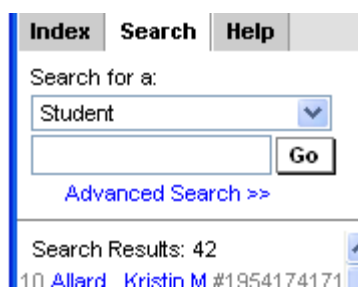

If you would like to print a list of students OR sort them by grade in a list, you will need to select Data Export instead of Filter Designer.

Select the filter, pick and export format (such as CSV to open in Excel), and click the Export button.
