

Technology Plan:
Hopkins County School District
Madisonville, KY 42431

<http://www.hopkins.kyschools.us>

Prepared Date: October 1, 2009
Update to Plan Date: Fall 2009
Plan Start Date: July 1, 2010
Plan Expiration Date: September 30, 2011
Approved Date: May 20, 2010

Acknowledgments

District Technology Staff

Director of Technology, Director of Technology
Dee McQueen Administrative Departmental Secretary
Darlene Crabtree, Technology Integration Specialist
Laura James, Technology Integration Specialist
Alex Skinner, Systems Administrator
Stephen Russell, Network Specialist
Willis Holmes, Computer Maintenance Specialist
Drew Taylor, Computer Maintenance Specialist
Chad Greer, Computer Maintenance Technician
Jarriot Storie, Computer Maintenance Technician
Richard Hibbs, Computer Network Technician

School Technology Coordinators

Crystal Ramsey, Earlington Elementary
Dawn Graham, Grapevine Elementary
Melissa Taylor, Hanson Elementary
Debra Brumfield, Jesse Stuart Elementary
Kellie Cotton, Pride Elementary
Krista Teel, Southside Elementary
Jeanne Cleveland, West Broadway Elementary
Tiffany Hobgood, West Hopkins Elementary
Robert Bryant, Browning Springs Middle
Len Young, James Madison Middle
Jed Killough, South Hopkins Middle
Debbie Groves, Hopkins Central High
Eddie Milum, Madisonville North Hopkins High

Technology Integration Specialists

Amy Gamblin, Madisonville North Hopkins High
Michael Zimmer, Hopkins Central High

Executive Summary

This plan highlights the goals, vision, needs, priorities, and solutions in place to ensure the effective use of technology in Hopkins County Schools.

Our district has a fiber WAN in place with over 5500 gigabit Ethernet ports to network our schools to the world. The appendices illustrate the abundance of tools we have acquired for our students over the years. Careful planning ensures these tools are used to promote engaged student learning and accomplish the academic goals set forth in our District Comprehensive Improvement Plan.

Planning Process / Methodology

Technology planning is a on-going process that must be flexible to accommodate changes in the budget. This plan assumes that technology funding will remain consistent as in past years, but it is understood that in a time of slow economy, some projects in this plan may not receive adequate funding and may not be accomplished while others projects are only partially funded.

Furthermore, as new technologies emerge, purchasing priorities may be realigned to take advantage of newer technologies. Nonetheless, the district is committed to continued progress in expanding opportunities for students using a strategy to maximize cost effectiveness in our planning efforts.

The District Comprehensive Improvement Planning Committee maps out district-wide planning efforts. This committee examined school assessment data to determine district-wide needs. Once needs were determined, the group worked on a targeted areas. During these planning sessions, technology components were embedded into this district-wide plan. This technology plan, however, breaks specific goals and strategies down even further to give a clearer picture of where the district is going in terms of technology acquisition, training, and its impact on teaching and learning.

This detailed technology plan was drafted by the technology department and is reviewed by stakeholders in the district who make suggestions and expand upon the basic premise of the plan.

The school district will continue to review relevant research which will lead to improvements in student academic achievement as measured by challenging state academic content and student academic achievement standards. This will involve ongoing, sustained professional development for teachers, principals, administrators, and school library media personnel serving the district, to further the effective use of technology in the classroom.

Technology Vision and Goals

Goal 1: Engaged Learning

Students and will become in engaged in learning using the latest technology.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Promote student-initiated learning activities through collaborative learning projects using technology	Engaged student learning	Observation, school walk-through	July 1, 2010 through September 30, 2011	Director of Technology TIS	EETT Local
Utilize student/teacher interaction tools within hosted web environment	Progressive collaboration between teachers, students, and community	Evidence of utilization on school website	July 1, 2010, ongoing	School Webmasters who train teachers	E-Rate Local
Continue to look for Web 2.0 resources that can add value to the learning experience	Engaged student learning	Observations, school walk-through	July 1, 2010 through September 30, 2011	Technology Integration Specialists	Local
Continued implementation of district assessments: Grade, Gmade, Thinklink, Dibels etc.	Continuous progress can be tracked and used for design of instructional interventions	Analysis of scores and implementation of RTI as needed	July 1, 2010 through September 30, 2011	District instructional team	Local
Create interactive district formative assessments for each grade level to utilize clicker sets	Formative assessment with immediate results	Assessment results	July 1, 2010 through September 30, 2011	District instructional team	Local
Continue to train teachers to utilize web resources and interactive tools	Evidence of an increased use of technology in schools	Observations, school walk-through	July 1, 2009 through September 30, 2010	Technology Integration Specialists	Local

Add wireless devices in schools	More abundant access to web resources	Inventory records	July 1, 2009 through September 30, 2010	Director of Technology TIS	Local
---------------------------------	---------------------------------------	-------------------	---	-------------------------------	-------

Goal 2: Up-to-Date Resources

The district will improve the networking infrastructure district-wide which will provide high speed data transfer necessary for distance applications and collaborative learning. Schools will have modern equipment, software, materials and technical support to provide students with the most suitable technology environment.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Continue to provide fiber connectivity from school sites to Central Office hub	Ability to use more bandwidth-intensive applications across the WAN	Clean, fast network	July 1, 2010, ongoing	Director of Technology Systems Administrator	Local E-Rate
Upgrade school networking electronics to accommodate 10Gb WAN links	Ability to implement 10Gb WAN	Clean, fast network	July 1, 2010, ongoing	Director of Technology Systems Administrator	Local E-Rate
Upgrade phone systems in all schools as funding allows to incorporate local VoIP using WAN bandwidth	Ability to dial extensions across the LAN, bring calls into the district using cheaper PRI lines, utilize functionality of IP handsets, etc.	Monitoring of availability and service	July 1, 2010, ongoing as budget permits	Director of Technology Systems Administrator	E-Rate Local KETS
Replace incoming copper phone links with PRI lines for new Central Office phone system	Reduce monthly recurring costs and available phone lines in the district	Observation/monitoring	July 1, 2010, ongoing	Director of Technology Systems Administrator	E-Rate Local KETS
Provide voice and data cellular service to school and district	Access to administrators via voice and email 24/7	Observation	July 1, 2010 through September 30, 2011	Director of Technology Computer Technicians	E-Rate Local

administrators					
Continue to refresh school computer inventories as funding permits	Adequate computing power for instructional and student use	Monitoring of inventory	July 1, 2010 through September 30, 2011	Director of Technology Tech Staff	KETS Local
Continue to develop a large scale backup solution	No downtime as a result of network disasters	Monitoring of backup solution documentation and verification of data	Ongoing	Systems Administrator	KETS Local
Research a one to one solution for teachers and students	Connectivity with resources throughout school day		Ongoing	Director of Technology TIS	KETS Local
Update school surveillance security camera systems (servers and cameras) as needed	Create an environment with less distractions as a result of inappropriate conduct or violence	Inventory records	Ongoing	Director of Technology Systems Administrator	KETS Local

Student Technology Literacy Skills

Goal 1: Creativity, Innovation, Communication, and Collaboration

Students will demonstrate creative thinking, construct knowledge, and develop innovative products and processes using technology. They will use digital media and environments to communicate and work collaboratively, including at a distance, to support individual learning and contribute to the learning of others.

Students will:

- Apply existing knowledge to generate new ideas, products, and processes.
- Create original work as a means of personal or group expression.
- Use models and simulations to explore complex systems and issues.
- Identify trends and forecast possibilities.
- Interact, collaborate, and publish with peers, experts, or others employing a variety of digital environments and media.
- Communicate information and ideas effectively to multiple audiences using a variety of media and formats.
- Develop cultural understanding and global awareness by engaging with learners of other cultures.
- Contribute to project teams and produce original works or solve problems.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Provide a TIS to work with middle school teachers and students on literacy skills one day per week	Increase in 8 th grade literacy skills	TBD	July 1, 2009 through June 30, 2011	Director of Technology Technology Integration Specialists Amy Gamblin Michael Zimmer	EETT Local
Create a district student technology literacy assessment for 8 th grade literacy skills *using Turning Points	Measure student technology literacy skills	Assessment results	Test will be administered to 8 th graders in spring 2010 and every fall thereafter	Technology Integration Specialists	EETT
Determine an assessment tool for 12 th grade literacy skills	Measure gains over time	Assessment results	July 1, 2010 through June 30, 2011	Director of Technology Technology Integration Specialists	Local

Goal 2: Research, Information Fluency, Critical Thinking, Problem Solving, and Decision Making

Students apply digital tools to gather, evaluate, and use information. They will manage projects, solve problems, and make informed decisions using appropriate digital tools and resources.

. Students:

- Plan strategies to guide inquiry.
- Locate, organize, analyze, evaluate, synthesize, and ethically use information from a variety of sources and media.
- Evaluate and select information sources and digital tools based on the appropriateness to specific tasks.
- Process data and report results.
- Identify and define authentic problems and significant questions for investigation.
- Plan and manage activities to develop a solution and/or make informed decisions.
- Collect and analyze data to identify solutions and/or make informed decisions.
- Use multiple processes and diverse perspectives to explore alternative solutions.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Teachers and students will be trained to utilize KET Encyclomedia	Less searching for instructional resources online	KET Encyclomedia logs	July 1, 2009 through September 30, 2010	Technology Integration Specialists	Local
Utilize World Book Encyclopedia online	Provide research tools to students	World Book Encyclopedia logs	July 1, 2009 through September 30, 2010	Supervisor of Instruction	Title II Part A
Provide online instructional courses (such as Plato, Novel Stars, etc) for targeted learners	Course enhancement	Reports within each product	July 1, 2009 through September 30, 2010	Supervisor of Instruction	TBD
Implementation of Achieve 3000 (Teen Biz) in schools	Increased student achievement and exposure to online learning	Reports within program	July 1, 2009 through June 30, 2012	Supervisor of Instruction	ARRA

Goal 3: Digital Citizenship

Students will understand human, cultural, and societal issues related to technology and practice legal and ethical behavior.

Students:

- Advocate and practice safe, legal, and responsible use of information and technology.
- Exhibit a positive attitude toward using technology that supports collaboration, learning, and productivity.
- Demonstrate personal responsibility for lifelong learning.
- Exhibit leadership for digital citizenship.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Schools will utilize School Resource Officers in teaching digital citizenship and internet safety	Students will develop a responsible attitude about online safety and use of resources	Documentation of event or lesson plans	July 1, 2009 through September 30, 2010	Technology Integration Specialists	School Funds
Elementary computer lab assistants will receive information on how to teach digital citizenship in the labs	Students will begin to learn about internet safety in the early years - proactively	Evidence of lesson plans	July 1, 2009 through September 30, 2010	Technology Integration Specialists and Computer Lab Assistants	Local
Technology Integration Specialists will develop a website with resources for teaching digital citizenship	Teachers will spend less time searching for viable resources and more time integrating ideas	Evidence in websites	July 1, 2009 through September 30, 2010	Technology Integration Specialists	Local
Library Media Specialists will utilize plagiarism components developed during joint planning sessions in curriculum	Students will become more aware of avoiding plagiarism	Evidence of lesson plans	July 1, 2009 through September 30, 2010	Library Media Specialists	N/A
Middle School students will utilize a Cyber Citizenship	Students will learn basic online citizenship	Evidence of blog on TIS websites	July 1, 2009 through September 30, 2010	High School Technology Integration	Title II Part D Competitive

blog.	expectations.			Specialists	
All students are required to sign an Acceptable Use Policy each year. The policy supports the safe, professional and academic usage of email and the internet.	Computer use by students will be safer and more focused.	Evidence of signed AUP and record keeping within Infinite Campus	July 1, 2009 through September 30, 2010	Director of Technology School Technology Coordinators	N/A
Develop a district policy on social media Web 2.0 acceptable use for staff	Raise awareness of appropriate online behavior	Policy or guidelines provided to staff	July 1, 2009 through September 2010	Director of Technology	N/A
Develop a mandatory training presentation for school principals to deliver to staff at start of school year	Raise awareness of the AUP and expectations	Policy or guidelines provided to staff	July 1, 2009 through September 2010	Director of Technology	N/A

Goal 4: Technology Operations and Concepts

Students will demonstrate a sound understanding of technology concepts, systems, and operations.

Students:

- Understand and use technology systems.
- Select and use applications effectively and productively.
- Troubleshoot systems and applications.
- Transfer current knowledge to learning of new technologies.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Explore the possibility of creating a student-run help desk at the	School to work experience while teaching critical	Completion of work orders	July 1, 2010, Ongoing	Director of Technology	Local

high schools	troubleshooting skills				
Continue to offer the A+ Networking Course for high school students	Basic hardware troubleshooting skills	Course assessments	July 1, 2010, Ongoing	MNHHS Staff	Local
Teach keyboarding skills beginning in the elementary school	Create an early foundation for proper keyboarding techniques	Monitoring of course/curriculum	July 1, 2010, Ongoing	Elementary lab assistants	Local
Encourage middle schools to integrate keyboarding curriculum into their careers courses	Create a keyboarding foundation so that it becomes unnecessary to teach keyboarding in the high schools	Monitoring of course/curriculum	July 1, 2010, Ongoing	Director of Technology	Local
Work with district staff on developing a career path for IT in the new Career & Technical Center	Opportunity for furthering technical skills	TBD	July 2009, Ongoing	Superintendent	TBD

Integration of Technology into Curricula and Instruction

Goal 1: Implementation of Technology

Teachers will use technology to support instruction; access and manipulate data; enhance professional growth and productivity; communicate and collaborate with colleagues, parents, and the community; and conduct research.

Action Plan: Projects/Activities

Project/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Provide TIS at each high school to assist teachers in utilizing technology as an instructional tool	Increased use of interactive tools in instruction	Evaluated through EETT grant	July 1, 2009 through June 30, 2011	Director of Technology Technology Integration Specialists Amy Gamblin Michael Zimmer	EETT
Require training for interactive technology equipment ordered and assigned to teachers	Up-front training will provide direction for use and reduce support calls and other barriers to use	Increased inventory of items in schools, less support requests for assistance of these items	July 1, 2009 through June 30, 2011	Technology Integration Specialists	Local
Work with teachers to design better placement of projectors, interactive boards, etc.	Remove physical barriers to instructional use of technology	School walk-throughs	July 1, 2009 through June 30, 2011	Director of Technology Technology Integration Specialists Technicians	Local
Conduct school walkthroughs each year to observe instructional technology in use	Identify teachers who may need assistance or more resources	Anecdotal records during walkthrough	July 1, 2010, Ongoing	Director of Technology Technology Integration Specialist	Local

Staff Training/ Professional Development Goals

Goal 1: School Level Technology Training and Support

Each school will have in place technology leaders who can provide support to school staff in technology planning and implementation.

Action Plan: Strategies/Activities

Strategy/Activity	Instructional Outcome	Evaluation	Timeline	Person(s) Responsible	Funding Source
Train School Technology Coordinators to assist in the schools	Better school-level support for technology	STC Stipend logs	July 1, 2010 through September 30, 2011	Director of Technology STCs	EETT
Provide PD opportunities for school leaders via conferences, web-delivered courses, etc.	Better knowledge of technology resources	Course participation	July 1, 2010 through September 30, 2011	District and School Staff	EETT Local
Re-organize technology staff to provide better work flow through district help desk	Better flow of work orders	Observation, work order reports	July 1, 2010 through September 30, 2011	Technology staff	Local
Send district technology staff to Kentucky Dataseams workshop	Allow for a smoother transition to the Macintosh environment in designated labs	Success in mac implementation	February 2010 through September 30, 2011	Director of Technology	EETT KETS Local
Send TIS to KySte Conference	Bring back integration ideas and strategies to teachers	Conference evaluation and evidence in lesson plans	March 2010 through September 30, 2011	Director of Technology TIS	EETT Local

Current Technology and Resources

Currently the district technology department includes a staff of 10 at the Central Office: Director of Technology, Technology Administrative Secretary, two Technology Integration Specialists, Systems Administrator and five specialized technicians. Technical support is streamlined to the appropriate staff through an online work order submission process. Since 2009, we have been able to add two Technology Integration Specialists to our staff; both report to their designated high school each day. They spend four days a week at their high school and one day each week at their designated middle schools. These high school Technology Integration Specialists are able to maintain all of our technology staff training in the high schools and accomplish much of the training for the middle schools. Our other two integration specialists at the board office are available to train staff at our eight elementary schools and pick up much training in the middle schools, as well. The increase in technology specialists has made a tremendous impact in our district.

All district schools are connected to the Central Office hub through 1GB fiber backbone. All servers have been consolidated at the Central Office in a virtual environment. The servers utilize shared storage via Equallogic arrays. The move towards virtualization and shared storage has simplified the deployment of new servers and has allowed us to better manage storage capacity as needs change over time.

In the fall of 2009, wireless access points were updated at the two high schools. We now have 186 wireless N access points combined at these two schools. The existing 186 a/b/g access points replaced at the high schools were distributed out to the middle and elementary schools to provide approximately 35 per middle school and 12 per elementary school. Mini devices were purchased for our middle schools to help with Response to Intervention (RTI). The middle school students will utilize a program called Teen Biz for Reading and Plato for Math RTI needs.

All technology is maintained through an online work order system which is integrated with current technology inventory. The technology department places the orders for all technology equipment regardless of funding. Equipment is delivered to the Central Office where the items are properly coded in MUNIS and are tracked through our system.

We are able to track history on each device and also associate required training for items assigned to users such as airliners, document cameras, clicker sets, etc. Streamlining all of our technical needs through an integrated system has allowed us to better address both support and training of items in our district.

Evaluation

Hopkins County Schools will conduct ongoing evaluations to monitor the progress of telecommunications services, hardware, software, and instructional use of technology.

Performance Goal 1: Technology-Infused Environment

Monitor the use of technology and make adjustments as needed to create a technology-rich and better learning environment.

Action Plan: Strategies/Activities

Indicator	Target	Tools/Methods Used	Timeline	Person(s) Responsible	Funding Source
School principals will evaluate the technology skills of each staff member.	Teachers	Professional Growth & Evaluation of Certified Staff	Annually for non-tenured teachers; Minimum of once every three years for tenured teachers	School Principal	N/A
The district instructional team will conduct walk-thrus to monitor instructional practices including the effective use of technology by teachers and students	School staff	Technology Walk Through Document	TBD	Director of Technology Technology Integration Specialists	N/A
Monitor district technology equipment so that aging equipment is identified and refreshed each year	All schools	District technology inventory	Annually at the onset of each school year so that we can budget accordingly	Director of Technology	N/A

Budget Summary

The Hopkins County School District will secure the financial resources needed to achieve the goals outlined in this plan, including professional development and training, software, and other related items that might not be eligible for E-rate discounts. The general fund, federal funds, and state funds are used to acquire and support all technology elements in the district (e-rate discounted and non-discounted).

The following sources can and are being utilized:

- **General Fund** – General fund money up to \$250,000 each year (excluding salaries and benefits) is allocated to unrestricted state and local funding. This fund is used to cover the majority of the district's ongoing operations such as computer repair, network management, audio visual equipment purchase and repair, telephone purchase and repair, computers and related equipment, instructional and administrative equipment, travel, and general supplies.
- **Federal Funds**
 - Title II Part D – At least 25% of these funds are used for professional development.
 - Competitive 2009 – The grant award for July 2009-September 2011 was \$60,000.00 each year. This money supports the salaries of two *Technology Integration Specialists*. General funds are used to pick up the remaining portion of their salary and benefits not picked up by the grant.
 - Formula ARRA 4859 – We have been awarded \$42,784.00 in the formula AARA grant which will be used to provide equipment to the schools in conjunction with the competitive grant listed above.
 - Formula 4250 - The grant award for July 2009-September 2010 was \$19,832.00. This money is used to pay stipends to the School Technology Coordinators. (Next year's tentative formula 4251 will be \$7,346.)
- **State KETS Funds** – Although we cannot anticipate the state offer of assistance for FY2010, the state offers were accepted and matched locally annually which indicate a sustained commitment both from the state and local district in advancing technology initiatives. The total KETS budget for each year is noted below.

HISTORICAL KETS OFFERS OF ASSISTANCE			
Year	MUNIS CODE	KETS Offers	Total KETS Budget
2004	1625	1 st Offer - \$43,289 2 nd Offer - \$44,563	\$175,704
2005	1626	1 st Offer - \$82,490 2 nd Offer - \$22,843	\$210,666
2006	1627	1 st Offer - \$76,098 2 nd Offer - \$19,659 Coal Severance - \$60,647	\$312,808
2007	1628	1 st Offer - \$82,655 2 nd Offer - \$61,184 Coal Severance - \$1450	\$289,578
2008	1629	1 st Offer - \$71,708 2 nd Offer - \$65,334	\$274,084
2009	1620	1 st Offer - \$94,005 2 nd Offer - \$62,670	\$313,350
2010		Projected	(\$25 ADA)

**School Year: 2010-2011
Annual Budget Summary**

The items highlighted in grey will be completed pending e-rate funding.

Acquired Technologies and Professional Development	Ed Tech Competitive Title IID	Ed Tech Formula Title IID	ARRA Formula Title IID	E-Rate	KETS	Local	TOTAL
