

Kuna High School

Course Description Guide 2024-2025

Information within this guide is designed to assist you in developing a Four-Year Educational Plan and selecting courses for the upcoming school year. Please read through the information carefully. The master schedule is dependent on state funding and is based on student pre-registration. Courses listed in this guide not receiving sufficient enrollment may be eliminated from the master schedule.

Registration Policies and Practices	2
Dual Credit and Advanced Opportunities	2
Graduation Requirements	3
CORE Areas	
Language Arts (including Speech/Debate)	4
Mathematics	7
Science	10
Social Science	14
Humanities	16
Physical Education and Health	17
KHS Career Clusters & Pathways	19
Agriculture Food and Natural Resources	20
Ag Science and Technology, Natural Resources, Ag Mechanics, Welding	
Arts, A/V Technology and Communications	24
Visual Arts, Performing Arts, World Languages	
Business/Administrative/Marketing/Accounting Pathways	32
Business and Marketing, Graphic Design, Administrative Support	
Engineering and Technology	36
Pre-Engineering, Computer Science, Programming, Media Productions	
Family Consumer Science and Human Service	38
Culinary Arts, Early Childhood and K-12 Education	
Government and Public Administration	41
Air Force JROTC	
Health Science and Public Safety	43
EMT, Nursing Assistant, Sports Med, Pharm Tech, Dental Assist, Law	
Trades	45
Welding, Automotive Tech, Diesel Tech, Construction	
Additional Elective Choices	48

REGISTRATION POLICIES AND PRACTICES

1. Students are not allowed to retake failed classes during traditional day school. If a student needs to retake a class due to receiving a failing grade, the student will be required to make up the credit through an alternative option or during Kuna Summer School. Students must pass all required classes in order to meet Kuna High School graduation credit requirements. **All outside credits must meet the standards of AdvancED and/or administrative approval.**
2. Classes may be changed only at the beginning of a semester. Changes will be for administrative error, misplacement or credit only. Students whose change requests meet this criterion will have 2 class periods to change classes at the beginning of each semester. Students wishing to withdraw from a class after the 2nd class period are required to meet with administration, counselor and parent/guardian and may result in a WF on official transcript.
3. All students are required to take at least six classes per semester, 3 each day. One credit (1.0) is assigned to each course where a passing grade of 60% (D) or better has been earned for each semester. One-half credit (0.5) is assigned to Teacher Aide.
4. Free period requests will be granted to juniors and seniors that have successfully completed all required courses their freshman and sophomore years. Free periods will be at the beginning and/or end of the day only. Freshmen and sophomores are not eligible for free periods. **See the counseling office for permission form.**
5. Graduating seniors must be in full-time attendance at Kuna High School during both semesters, unless they have applied for early graduation (see Student Handbook for application process). Full-time attendance may be met with a combination of enrollment at Kuna High School and other dual-enrollment opportunities.
6. If a student plans to transfer to another school, the parent or guardian must come to the high school counseling office and withdraw the student. A withdrawal form must be signed by all of the students' teachers. All books, materials, parking passes and equipment must be returned and all fines paid. **Students who have 10 consecutive absences can be automatically withdrawn from school.**
7. Please notify the office of any change of address or phone number as soon as it occurs so that we have current/accurate information for contact in case of an emergency.

DUAL CREDIT & ADVANCED OPPORTUNITIES

Participating in dual credit courses requires a dedication to college-level content and standards, demanding the same level of commitment, responsibility, and effort expected of a college student while meeting the requirements for high school courses and graduation standards. High school instructors are adjunct professors with their associated college or university; and are expected to meet the institutional standards along with district and school standards.

It is imperative to understand that the grades earned in these courses become permanent on your college transcript, so it's important that you are committed to providing your best effort. It is strongly recommended to seek advising from your dual credit teachers and counselors to determine the alignment of these courses with individual academic goals.

Additionally, the use of Advanced Opportunities funds to pay for college courses is contingent on passing the courses. Flagged accounts will require the student to pay out of pocket and pass another qualifying course before accessing further funds.

KUNA HIGH SCHOOL GRADUATION REQUIREMENTS

<u>Required Courses</u>	<u>Credits</u>
<u>Language Arts</u>	<u>9 Required</u>
Language Arts 1 (grade level 9)	2
Language Arts 2 (grade level 10)	2
Language Arts 3 (grade level 11)	2
Language Arts 4 (grade level 12)	2
Speech (grade level 11)	1
<u>Mathematics</u>	<u>6 Required</u>
Mathematics I and higher	
2 Math credits must be in Senior year **	
<u>Natural Science</u>	<u>6 Required</u>

<p><i>*Meets Idaho Colleges and Universities GEM English requirement</i> <i>**Meets Idaho Colleges and Universities GEM requirement – Humanity Elective GEM 5</i></p>			

LANGUAGE ARTS 1

Year (9)

Language Arts 1 is an integrated study of literature and writing. Novels, short stories, drama, poetry, and student free reading are presented and studied in this course to promote reading enjoyment, expand reading experience, and augment student vocabulary. In their writing, students will demonstrate clear communication and appropriate forms, voice, processes, and development. In order to ensure these learning processes succeed, students will work and study in cooperative groups as well as independently when they complete reading and writing projects.  **NCAA approved course**

LANGUAGE ARTS 2

Year (10)

Language Arts 2 provides opportunities for students to strengthen conventional use of written and oral English language via many genres: argumentative writing, fiction, poetry, drama, and informative writing requiring research. Required and personal choice readings and discussions will help students connect with the written word as a pathway to self-exploration and a broader global perspective.  **NCAA approved course**

LANGUAGE ARTS 3

Year (11)

Language Arts 3 focuses on composition and various thematic concepts in American literature. Extensive work in analyzing literature, research, logic, and argumentative writing will be included in the study of composition. All forms of American literature will be examined from colonial and Native American traditions to modern 21st century literature. Communication skills, discussions and oral presentations.  **NCAA approved course**

DC LA3 with ENG101: English Composition (CWI)

Year (11)

Prerequisite: None

Students read and analyze key works from American literature as they learn more about writing, with an emphasis on the process and strategies of writing with critical attention to purpose, audience, and style. Students write analytical essays based on reading, observations, and ideas; develop their inventiveness and voice; and edit for style conventions of standard usage. The course introduces students to academic writing conventions, including integrating sources and using a citation system. **DUAL CREDIT OPTION - CWI Writing and Rhetoric I ENGL 101**  **NCAA approved course**

LANGUAGE ARTS 4

Year (12)

The purpose of senior language arts class is to enable students to develop and extend reading, thinking and writing skills for post high school demands. A primary focus for all student reading and writing will be the application of those skills into the worlds of career and higher education. With this aim in mind, goals for this class include, but are not limited to, the following expectations. Students will master writing argumentative, research, narrative, and literary analysis essays. Students will master the critical analysis of British and/or world literature. Students will undertake a research project. Students will interpret the social, cultural, and historical significance of text through reading, research, and presentations. Students will also participate in collaborative discussions on class-related topics in order to improve skills of persuasion and expression.

 **NCAA approved course**

DC LA4 with ENG101: English Composition (CWI)

Year (12)

Prerequisite: None

Students read and analyze key works from British and world literature as they learn more about writing, with an emphasis on the process and strategies of writing with critical attention to purpose, audience, and style. Students write analytical essays based on reading, observations, and ideas; develop their inventiveness and voice; and edit for style conventions of standard usage. The course introduces students to academic writing conventions, including integrating sources and using a citation system. **DUAL CREDIT OPTION - CWI Writing and Rhetoric I ENGL 101**  **NCAA approved course**

DC LA4 with ENG102: English Composition 2

Semester (12)

Prerequisite: ENG 101

English 102 furthers the composition skills developed in English 101, focusing on critical reading, writing, and research. Students will write expository and persuasive essays, using literary and/or interdisciplinary materials. This course also requires a researched essay. **DUAL CREDIT OPTION - CWI: Writing and Rhetoric II: ENG102**  **NCAA approved course**

DC LA4 with ENG175: Literature and Ideas (CWI) GEM humanities

Year (12)

Prerequisite: ENG 101

This course introduces literary genres and provides the general student with the terminology and standard techniques of reading and communicating about literature. Students will apply the terminology and standard techniques of understanding literature as they analyze, discuss, and write about a combination of British and world literature, including short stories, poems, novels, and drama. **DUAL CREDIT OPTION - CWI Literature and Ideas ENGL 175**  **NCAA approved course**

Speech & Debate

SPEECH

Semester (11)

Prerequisite: None

Course requirement for graduation. The principles of the communication process will be studied including study of interpersonal communication and group dynamics. The course work will include delivery of several speeches, participation in group discussions, and a study of mass media. Emphasis will be upon gaining confidence in communication in a positive, logical manner.  **NCAA approved course**

DC ADVANCED SPEECH

Semester (11-12)

Prerequisite: None

DC Advanced Speech is similar to the Speech Communication class, with a greater analysis of the communication process. Dual credit for college credit is available. **DUAL CREDIT OPTION - CWI Fundamentals of Oral Communication COMM 101**

 **NCAA approved course**

DEBATE

Year (9-12)

Prerequisite: None

This class will take beginning concepts of communication that can then be studied emphasizing research, reasoning, logical inquiry within individual and team debate concepts. This class will also illustrate the 13 types of speech used in formal competition. Must compete in a minimum of one speech and debate tournament per semester or complete an alternate assignment. **Must PASS a full year of Debate in order to meet speech**

requirement for graduation.  **NCAA approved course**

Elective Language Arts

CREATIVE WRITING

Year (9-12) - **Elective Credit only**

Prerequisite: None

This is an elective study for those students who already have the passion to write. Students will focus on fiction, but poetry is also highlighted. Students will develop their creative writing skills through being involved in writing groups, as well as working independently. Students will participate in a modified National Novel writing contest (NANORIMO), which will function as a culmination spring activity for this course.

DC CREATIVE WRITING

Year (12) - **Elective Credit only**

Prerequisite: ENG 101

This is an elective study for those senior students who have a desire to write creatively. Students will focus on narrative writing, both fiction and nonfiction, and poetry writing; will learn the terminology and standard techniques of literary analysis, and will gain experience using the workshop experience while writing in the discipline. **DUAL CREDIT OPTION - CWI ENGL191: Introduction to Creative Writing**

Mathematics

Students are required to take 6 semester credits of mathematics for graduation and must show mastery of Algebra and Geometry concepts and skills. Idaho law requires students to take math in the senior year. Most students in Kuna School District take eight credits of mathematics.

Math Pathway	9th	10th	11th	12th
Accelerated	Math II/Math III	DC Pre-Calculus	DC Calculus	DC Stats Probability/Statistics
Advanced	Advanced Math II	Advanced Math III	DC Pre-Calculus	DC Calculus DC Stats Probability/Statistics
	Advanced Math II	Advanced Math III	Probability/Statistics	DC Stats DC MMS
	Advanced Math II	Advanced Math III	DC MMS	Math 095 Cons/Bus Math
Regular	Math I	Math II	Math III	DC Pre-Calculus DC MMS Probability/Stats Cons/Bus Math
	Math I	Math II	Cons/Bus Math	Math 095 (lab)
	Math I	Math II	Math 095 (lab)	Cons/Bus Math
Fundamental	Foundations of Algebra/Geometry	Principles Math 1	Principles Math 2	Cons/Bus Math Math 095 (lab)

9th grade placement for math is based on the following: previous math teacher's recommendation, last math class taken, previous math grades, math scores on the ISAT, and/or proficiency on a placement exam.

FOUNDATIONS OF ALGEBRA & GEOMETRY

Year (9)

Prerequisite: Teacher Approval

Algebra and Geometry Foundations courses reinforce general mathematics skills and extend these skills to include some pre-algebra topics. These skills are used in a variety of practical applications. Course topics include rationale numbers, measurement, basic statistics, ratio and proportion, basic geometry, formulas, and simple equations.

PRINCIPLES MATH 1

Year (10)

Prerequisite: Teacher approval

Fundamental Math 1 is a course for students who struggle to understand basic mathematical concepts. Math I Common Core State Standards are covered at a low level of rigor. In this section, students will study linear and exponential equations and functions. They will use linear regression and perform data analysis. They will also learn about geometry topics such as simple proofs, congruence, and transformations.

PRINCIPLES MATH 2

Year (11)

Prerequisite: Fundamental Math 1, Teacher approval

Fundamental Math 2 is a course for students who struggle to understand basic mathematical concepts. Math II Common Core State Standards are covered at a low level of rigor. In this section, students will study exponents, quadratic functions, probability, and triangle relationships.

MATH I

Year (9)

Prerequisite: None

The research-based integrated curriculum features a continual development of concepts that have been previously taught while integrating algebra, geometry, probability, and statistics topics throughout the course. In Math I, students will study linear and exponential equations and functions. Students will use linear regression and perform data analysis. They will also learn about geometry topics such as simple proofs, congruence, and transformations.  **NCAA approved course**

MATH II

Year (10)

Prerequisite: Math I

Math II expands the research-based integrated curriculum into quadratic, absolute value, and other functions. Students will also explore polynomial equations and factoring, and probability and its applications. Coverage of geometry topics extends to polygon relationships, proofs, similarity, trigonometry, circles, and three-dimensional figures.  **NCAA approved course**

ADVANCED MATH II

Year (9)

Prerequisite: Teacher approval

Advanced Math II challenges students with more rigor in topics including quadratic, absolute value, and other functions. Students will explore polynomial equations and factoring, and probability and its applications. Coverage of geometry topics extends to polygon relationships, proofs, similarity, trigonometry, circles, and three-dimensional figures. This course demands higher-level thinking.  **NCAA approved course**

ACCELERATED MATH II/MATH III

Year (9-10)

Prerequisite: Teacher approval

This is a fast-paced, high rigor class. Students will cover the state standards of Math II in semester one and the state standards of Math III in semester two. This course is intended for students who are self-driven and motivated to learn. It demands substantial independent work and exceptional study habits.  **NCAA approved course**

MATH III

Year (10-12)

Prerequisite: Math II

Math III challenges students to gain a deeper understanding of mathematics through inductive reasoning, engaging explorations, and rich thought-provoking exercises. Topics include geometric modeling, as well as polynomial, radical, logarithmic, rational, and trigonometric functions. In addition, students will explore how visual displays and statistics relate to different types of data and probability distributions. ***STRONGLY RECOMMENDED FOR ADMISSION TO 4-YEAR COLLEGE***

 **NCAA approved course**

ADVANCED MATH III

Year (10)

Prerequisite: Advanced Math II; teacher approval

Advanced Math III challenges students with more rigor in topics including geometric modeling, as well as polynomial, radical, rational, logarithmic, and trigonometric functions. Students will explore how visual displays and statistics relate to different types of data and probability distributions. This course demands higher-level thinking.  **NCAA approved course**

DC PRE-CALCULUS/TRIGONOMETRY

Year (10-12)

Prerequisite: Math III or Algebra 2

Pre-Calculus/Trigonometry is a college-level course. It is designed to expand the knowledge of advanced math students in exponential and logarithmic functions, conic sections, graphs and polynomials. Students will begin the study of trigonometric relationships and functions as well as polar functions and their graphs. This course is intended for students who are self-driven and motivated to learn. It demands substantial independent work and exceptional study habits.

DUAL CREDIT OPTION - CWI College Algebra & Trigonometry MATH 147  **NCAA approved course**

PROBABILITY AND STATISTICS

Year (11-12)

Prerequisite: Math III or Algebra 2

Probability and Statistics is a college preparatory course. It is an introduction to statistics. Topics studied include: number theory, data collection and analysis, probability distribution, and making an inference based on statistical analysis.

 **NCAA approved course**

DC ADVANCED STATISTICS

Year (11-12)

Prerequisite: Math III or Algebra 2

Advanced Statistics is a college-level course. Students will explore statistical terminology, as well as common uses and misuses of statistics. Topics include: experimental design, sampling, descriptive statistics, correlation and regression, probability, and tests of significance. This course is intended for students who are self-driven and motivated to learn. It demands exceptional independent work and study habits. **DUAL CREDIT OPTION - BSU Intro to Statistics MATH 254**

 **NCAA approved course**

DC CALCULUS

Year (11-12)

Prerequisite: Pre-Calculus/Trigonometry

Calculus is a college-level course. Students will cover topics including: limits, derivatives, integrals, and their applications. This course is intended for students who are self-driven and motivated to learn. It demands exceptional independent work and study habits - typically 5 hours/week minimum. **DUAL CREDIT OPTION - CWI Calculus I MATH 179**  **NCAA approved course**

CONSUMER/BUSINESS MATHEMATICS

Year (11-12)

Prerequisite: Math II

Consumer/Business Mathematics is a course designed for the following: students entering the workforce immediately following high school; students pursuing a professional technical degree; students pursuing an associate's degree at a community college. This course will cover topics that include the skill development of calculating earnings, taxes, interest, credit cards, bank accounts, savings, mortgages, and other personal finance areas. Students will also study professional business skills with culminating semester projects. **NOT NCAA approved**

DC MATH IN MODERN SOCIETY

Year (12)

Prerequisite: Math III

This course will use basic mathematical concepts to analyze problems in modern society. Topics may include voting systems, fair division, interpreting statistics, scheduling, routing, linear programming, population growth, patterns and symmetry.

DUAL CREDIT OPTION - CWI Math in Modern Society MATH 123  **NCAA approved course**

MATH 095

Year (11-12)

Prerequisite: Math II

Math 095 allows students to complete college-preparatory mathematics curricula in an instructionally-supported individualized learning-lab structure. The course helps students meet the prerequisites to enroll in transfer-level mathematics courses. **NOT NCAA approved**

Science

Science Progression	9th	10th	11th	12th
Required	Physical Science	Biology	Two elective science credits are required for graduation. See choices below.	
Advanced	Advanced Physical Science	DC Biology 111	YEAR LONG DC Biology 111 DC Environmental Science DC Introduction to Chemistry 101 DC General Chemistry 111 DC Anatomy 1 DC Anatomy 2 DC Physics 100	
Elective Sciences		DC Intro to Chem DC Physics 100 Anatomy DC Forensics	SEMESTER LONG Anatomy DC Forensics (CHEM 100) Genetics Meteorology & Oceanography Earth & Space Science Outdoor Natural Science A and/or B Ecology	

PHYSICAL SCIENCE

Year (9)

Prerequisite: None

SEMESTER ONE – Focus on basic physics

Learn about the physics behind driving a car, how Newton's laws apply to sporting events, and how energy and momentum impact collisions. You will be demonstrating knowledge of the basic physics of driving, recording a sports commentary, and making a car safe enough to prevent an egg from breaking during a collision. You will practice a variety of skills, including making careful and accurate observations, logging data, writing hypotheses, designing and performing experiments, interpreting data and sharing conclusions. Lab safety will be a priority in this class.

SEMESTER TWO – Focuses on basic chemistry

Learn about the chemistry behind movie special effects, the secrets of the periodic table, and how kinetic molecular theory impacts toys. You will be designing special effects for a movie scene, creating a chemistry-based game, and designing a chemistry-based toy. You will practice a variety of skills, including making careful and accurate observations, logging data, writing hypotheses, designing and performing experiments, interpreting data and sharing conclusions. Lab safety will be a priority in this class.

ADVANCED PHYSICAL SCIENCEYear (9) *This class can replace 9th grade PHYSICAL SCIENCE.*Prerequisite: Successful completion of Math 1 in 8th grade

During the 1st semester, students study mechanics, which includes motion, Newton's laws, momentum, energy, and more. The 2nd semester covers applications of physics/chemistry including properties of matter, waves and sound, light, electricity and magnetism, and more. Hands-on labs done during class will be a key component of the class. A strong math aptitude is an incredible help along with a desire to understand how things work.  **NCAA approved course**

BIOLOGY

NOTE: *Ag Plant/Soil Horticulture (Year) or Ag Zoology/Animal Science & Nutrition (Year) may be taken in place of Biology (Year). NOTE: For accelerated sophomores, DC Biology 111 can be taken in place of this course.

Year (10)

Prerequisite: None

This course incorporates laboratory investigations, problem solving in biology and critical creative thinking on biology related concepts and issues. The class is a lab science that will cover the following topics: inner functions of the cell including respiration and photosynthesis, nature of science, essential needs for life, genetic inheritance and the role of DNA in the maintenance and evolution of life, dynamics of an ecosystem, biomes, ecosystems, and environmental issues. This class will also provide opportunities to use various technological tools to enhance learning. Lab safety will also be a priority in this

class.  **NCAA approved course**

Advanced/Elective Science Courses

All classes listed in the following section are in general elective courses intended for juniors and seniors. Particularly dedicated sophomores are also able to take these courses, with the understanding that they are junior-level courses. They include a more focused curriculum intended to greatly increase the depth of understanding in the area of study. Students should expect a more rigorous curriculum than experienced in their freshman and sophomore years.

DC BIOLOGY 111

Year (10-12)

Prerequisite: Advanced Physical Science or Physical Science.

This course is designed to meet the curriculum of a first year college level course in biology. The topics covered will involve the study of molecules and cells, heredity, genetics and evolution, organisms and populations, ecology, and the structure and function of plants and animals. Currently also offered as a dual credit class (Bio 111/Bio 111L) through College of Western

Idaho. **Strongly Recommended:** DC Introduction to Chemistry 101  **NCAA approved course**

DC INTRODUCTION TO CHEMISTRY 101

Year (10-12)

Prerequisite: Successful completion of Mathematics 1, and Physical Science

Touch a flaming snowball, solve a crime, make multi-colored fire, eat ice cream, watch bubbles explode, and much more in Chemistry 101. This course is a lab based college-prep course; fifty to sixty percent of class time is devoted to laboratory activities. Through crime scene investigation, exciting demonstrations, cooking, and surprising reactions, you will learn about the topics of chemical formulas, chemical reactions, chemical bonding, thermodynamics, phases of matter, neutralization, equilibrium, entropy, combustion, and nuclear reactions. Highly recommended for students interested in pursuing a four-year college degree of any type. **DUAL CREDIT OPTIONAL - CWI Introduction to Chemistry**

and Lab (CHEM 101 & 101L)  **NCAA approved course**

DC GENERAL CHEMISTRY 111

Year (11-12)

Prerequisite: Math 3, Successful completion of DC Introduction to Chemistry 101

Currently offered as a two semester course. This course is designed to be an advanced chemistry course covering the topics of atomic structure, chemical bonding, states of matter, reactions and reaction rates, equilibrium principles, thermodynamics, oxidation and reduction, and an introduction to organic concepts. Laboratory activities in each area will be emphasized. Dual Credit Chemistry is available to fulfill a chemistry and lab requirement for physical science, engineering and

pre-medicine majors upon optional dual university enrollment. **DUAL CREDIT OPTION - CWI General Chemistry I & Lab CHEM 111 & 111L.** College Prerequisite: Successful completion of DC Introduction to Chemistry 101 and [MATH 143](#), [MATH 143P](#), or [MATH 147](#) (or higher math course).  **NCAA approved course**

DC ANATOMY 1

Year (11-12)

Prerequisite or Corequisite: DC Biology 111 with a C or above

Course is for majors courses for health occupations. This course is a challenging course utilizing multiple resources to discover the human body's major systems focusing on Integumentary, Skeletal, Muscle, Nervous, and Endocrine systems.

DUAL CREDIT OPTION - CWI Human Anatomy & Physiology I & Lab BIOL 227 & 227L. College Prerequisite: DC Bio 111  **NCAA approved course**

DC ANATOMY 2

Year (11-12)

Prerequisite: Successful completion DC Anatomy 1

Course is for majors courses for health occupations. This course is a continuation of Anatomy where students will take the knowledge from the first year and culminate the discovery of structure and function of the human body for the last 6 systems (Cardiovascular, Respiratory, Digestive, Immune, Reproductive and Lymphatic). **DUAL CREDIT OPTION - CWI Human**

Anatomy & Physiology II & Lab BIOL 228 & 228L. College Prerequisite: DC Anatomy 1: ANAT 227  **NCAA approved course**

DC PHYSICS 100

Year (10-12)

Prerequisite/Corequisite: None

This course is designed to meet the curriculum of the first semester and a half of a university course in Physics. Examples of some of the topics covered in this course include motion, Newton's Laws, energy, momentum, waves and optics, modern atomic structure, thermodynamics and Einstein's theory of relativity. Fifteen to twenty percent of class time is devoted to

laboratory experimentation. **DUAL CREDIT OPTION - CWI Introduction to Physics & Lab PHYS 100 & 100L.**  **NCAA approved course**

DC ENVIRONMENTAL SCIENCE 101

Year (11-12)

Prerequisite or Corequisite: Successful completion of Biology or DC Biology.

Environmental science is the study of how humans interact with their environment. We will use field research, lab experiments and class discussions to understand the impacts humans have on the earth. Topics will include air and water pollution, alternative energy, sources of food, why some human populations have gone extinct, endangered species, and environmental health. **DUAL CREDIT OPTION - CWI ENVI 101 & 101L.**  **NCAA approved course**

ANATOMY

Semester (10-12)

Prerequisite: None

This course is designed to review cell structure, biochemistry, and learn the curriculum for 5 (Skeletal, Muscular, Nervous, Cardiovascular, Respiratory and Digestion) of the 11 systems of the mammal body. An emphasis will be placed on Latin root knowledge used in the science and medical professions and an emphasis will be placed on homeostasis of these systems to promote knowledge of one's own human anatomy.  **NCAA approved course**

DC FORENSICS (CHEM 100)

Semester (10-12)

Prerequisite: None

This course is an introductory chemistry-based science course that studies forensics and touches upon many branches of science. It incorporates critical thinking and problem solving investigations, physical and chemical labs, psychology lessons, as well as criminology, sociology, and law. This course is designed to introduce the scientific strategies of forensics and crime scene investigation. Students take on the role of detectives, forensic scientists, and pertinent investigators, by collecting and interpreting data to solve cases. Many case studies will be involved. There will be guest speaker(s) from local law enforcement. The emphasis is placed upon biology and chemistry lab techniques and skills, written reports, and presentations. **DUAL CREDIT OPTION - CWI Concepts of Chemistry & Lab CHEM 100 & 100L.**  **NCAA approved course**

GENETICS

Semester (11-12)

Prerequisite or Corequisite: Successful completion of Biology or DC Biology 111

Use hands-on activities to learn about the structure and function of DNA through topics of your choice. The topics change every semester based on student interest. The options for topics include genes and addiction, personal genetics, eugenics, genetic technology, genetic engineering, sex determination, diabetes and genetic medicine, genetic abnormalities, reproductive genetics, viral genetics, bacterial genetics, ecological genetics, and space genetics. The course involves physical and chemical labs, critical and creative thinking, problem solving, and real-world case studies.  **NCAA approved course**

OUTDOOR NATURAL SCIENCE A

Semester (11-12). **Not required to take both semesters**

This class investigates local seasonal biodiversity topics through the scope of a naturalist to make connections to the natural environment of Idaho. Topics can include invasive grasses and wildfire, fall leaf science, stream health and Idaho Salmon. Outdoor activities, field journaling and project based learning are all a part of the class. By the end of the class, students should understand how observing and asking questions about our world is the basis of scientific study and understand the context of local issues we face in southern Idaho. Field trip to the Boise River with a river ecologist.  **NCAA approved course**

OUTDOOR NATURAL SCIENCE B

Semester (11-12) **Not required to take both semesters**

This class explores local resource issues through the lens of naturalists and resource managers. We will investigate birds of prey, geology, and water resources and use and explore how these resources are managed through local, state and federal agencies. Recreation and stewardship skills are also discussed as we work to conserve what makes our area unique. This class incorporates outdoor activities, field journaling, and project based learning. Field Trips to Dedication Point and Deer Flat Wildlife Refuge to speak with local agency managers.  **NCAA approved course**

IDAHO MASTER NATURALIST

Semester (11-12)

Prerequisite: Outdoor Natural Science

The Idaho Master Naturalist program is currently a post-secondary continuing education course that establishes a core of educated volunteers to help with conservation projects. public outreach and education, and work experience with local, state and federal agencies within Idaho. In the Idaho Master Naturalist class, students would go through the Idaho Master Naturalist curriculum as set forth by the Idaho Fish and Game as well as participate in 20 volunteer hours in community projects. Students would then receive a certification from the state which would help them in any outdoor or resource management field.

METEOROLOGY AND OCEANOGRAPHY

Semester (11-12)

Prerequisite: None

This class incorporates research-based learning, hands-on activities, critical and creative thinking. The curriculum is set up, to allow the student to think openly and challenge scientific inquiry in a safe, fun environment. The Earth's Systems,

helps students formulate an answer to the question: “How and why is Earth constantly changing?” The content is broken down into five sub-ideas: Earth materials and systems, plate tectonics and large-scale system interactions, the roles of water in Earth’s surface processes, weather and climate, and biogeology.  **NCAA approved course**

EARTH AND SPACE SCIENCE

Semester (11-12)

Prerequisite: None

This class incorporates research-based learning, hands-on activities, critical and creative thinking. The curriculum is set up, to allow the student to think openly and challenge scientific inquiry in a safe, fun environment. This course has two major content sections: Earth’s Place in the Universe, and Earth and Human Activity. Earth’s Place in the Universe, helps students formulate an answer to the question: “What is the universe, and what is Earth’s place in it?” The course is broken down into three sub-ideas: the universe and its stars, Earth and the solar system, and the history of planet Earth. Earth and Human Activity help students formulate an answer to the question: “How do Earth’s surface processes and human activities affect each other?” The curriculum is broken down into four sub-ideas: natural resources, natural hazards, human impact on Earth systems, and climate.  **NCAA approved course**

ECOLOGY

Semester (11-12)

Prerequisite: None

In Ecology you will focus on the relationships that organisms have with their habitats and surrounding areas. We will be learning in diverse methods such as labs, projects, research and hands-on activities to expand your understanding of this branch of Biology.  **NCAA approved course**

Social Science

Grade Level	Core Classes	Advanced	
9 th Grade			
10 th Grade	US History 1		
11 th Grade	US History 2 Economics or Personal Finance	DC US 2 History* MUST have GPA of 2.7	
12 th Grade	Government	DC Government* MUST have GPA of 2.7	
Electives	Psychology and/or Sociology	DC Psychology * and/or DC Sociology*	
<i>*Meets Idaho Colleges and Universities GEM Social and Behavioral requirement</i>			

US HISTORY 1

Semester (10)

Prerequisite: None

U.S. History 1 is a sophomore level, one semester course with a focus on late 19th and early 20th century history.  **NCAA approved course**

US HISTORY 1 - Dual Language (DL) option - course materials taught using primarily Spanish.

US HISTORY 2

Year (11)

Prerequisite: None

U.S. History 2 is a junior level, two semester course with a focus on the mid-20th Century to recent history ending with 9/11.

 **NCAA approved course. US HISTORY 2 - Dual Language (DL) option - course materials taught using primarily Spanish.**

DC US HISTORY 2

Year (11)

Prerequisite: **Minimum 2.7 GPA**

History 111: Surveys American society from pre-Columbian times through the Civil War era, with emphasis on the formative issues and conflicts that shape national politics and culture.

History 112: Surveys the issues and conflicts influencing American development from the Civil War to the present, including economic, military, political, international, and sociocultural factors. **DUAL CREDIT OPTION - BSU HISTORY 111/112**

ECONOMICS

Semester (11)

Prerequisite: None

Economics is an introductory course covering the basic theories of micro and macro economics and the free enterprise system. Further course work includes participation in the International Economic Summit, basic study of supply and demand, economic systems, business types, buying and selling of stocks and bonds, money and its development in the United States, and The Federal Reserve concentrating on its tools for economic stability.  **NCAA approved course**

PERSONAL FINANCE

Semester (11-12)

Prerequisite: None

A course designed to provide students with some personal finance skills and knowledge; to include goal setting, budgeting, saving, investing, borrowing, insuring, identity protection and retirement planning. It also counts as an economic credit for graduation. **This course meets the Economics requirement for graduation. NOT NCAA approved**

GOVERNMENT

Year (12)

Prerequisite: None

This course is a study of our federal system of government with an emphasis on the national level. It includes a study of the Constitution; the three branches of government—executive, legislative and judicial; the political party system; and American domestic policies.  **NCAA approved course. GOVERNMENT - Dual Language (DL) option - course materials taught using primarily Spanish.**

DC AMERICAN GOVERNMENT

Year (12)

Prerequisite: **C or better in U.S. History 2, minimum 2.7 GPA**

This basic course in political science introduces concepts and major structural elements of the national government. Many aspects of American government are introduced and discussed in a way that will make the study of government more a part of the students' world. This yearlong course is meant to give students a critical and in depth perspective on politics and the processes of the United States government. **DUAL CREDIT OPTION - BSU American National Government POLS 101**  **NCAA approved course**

Elective Social Science

PSYCHOLOGY

Semester (11-12)

Prerequisite: None

This course will compare and contrast the prevalent perspectives in the field of Psychology and examine how each approaches the study of development, as well as the analysis and treatment of disorders. The course will review the most historically influential theorists as well as examine common general practices and trends currently employed by professionals in the field. In addition, the course offers information and strategies for improving one's psychological health and well-being.

 **NCAA approved course**

DC PSYCHOLOGY

Semester (11-12)

Prerequisite: None

This survey course is an introduction to psychology. Psychology is the scientific study of thinking, emotion, and behavior. This course introduces students to the diverse research areas of psychology such as psychobiology, motivation, learning, cognitive and social processes, personality, and abnormality, emphasizing empirical findings of the discipline. **DUAL CREDIT**

OPTION - NNU Introduction to Psychology PSYC 101  **NCAA approved course**

SOCIOLOGY

Semester (11-12)

Prerequisite: None

This class will study human beings as a whole and how they rely on each other to satisfy their basic needs. We take an in-depth look at methods of sociological research, the nature of culture, conformity and deviance, social stratification, social institutions, minorities and discrimination.  **NCAA approved course**

DC SOCIOLOGY

Semester (11-12)

Prerequisite: None

An introduction to groups, organizations, and societies, and their impact on human behavior. Emphasis is on sociological perspectives, concepts, methods, and applications in areas such as organization, socialization, inequality, institutions, intergroup relations, change, etc. **DUAL CREDIT OPTION - BSU Introduction to Sociology SOC 101**  **NCAA approved course**

HISTORY OF MUSIC IN AMERICA

Semester (11-12)

Prerequisite: None

In this course, we explore the roots of American music from the early sounds of the colonies, the music brought over through the slave-trade, all the way to the top 20 sounds of the current year. If you love history and music, this is the class for you.

THIS CLASS COUNTS FOR A HUMANITIES CREDIT

Required Humanities

GLOBAL CONNECTIONS

Semester (09)

Prerequisite: None

Course requirement for graduation. Global Connections is a semester class taken during freshman year. Throughout this class we will use thematic-based units to study countries and cultures from around the world. The main studies of this class

will focus on six major themes—culture, geography, history, politics, current events and economics. We will use these six themes to discover how our complex world is connected to our everyday lives.

GLOBAL CONNECTIONS - Dual Language (DL) option - course materials taught using primarily Spanish.  **NCAA approved course**

Physical Education & Health

Students will not be allowed to take more than (2) physical education classes per semester
All 9th graders at KHS are required to take at least one semester of Physical Education.

PE FITNESS FOUNDATIONS

Semester (9)

Prerequisite: None

Fitness Foundations will give students a comprehensive and practical view of the importance of fitness in their lives. Students will learn the underlying fundamentals of fitness in terms of the components of fitness, assessing those components, training principles to improve fitness, and gaining skills to plan and participate in a physically active lifestyle. This information will be presented through both lecture and hands-on laboratory experiences which will provide students with an increased understanding of their own level of health and a motivation to develop habits for lifelong fitness and wellness.

PE AEROBIC FITNESS

Semester/Year (9-12)

Prerequisite: None

This course provides an introduction to basic personal health and wellness. Emphasis is placed on current health issues such as nutrition, mental health, and fitness. This course will introduce a variety of wellness activities, individual workout components, and dual **non-contact sports** such as: yoga, meditation, pilates, aerobics, dance, pickleball, golf, ping pong, and tennis.

PE TEAM SPORTS

Semester/Year (9-12)

Prerequisite: None

The purpose of this course is to develop the physical skills necessary to be competent in movement, knowledge of team sports concepts, techniques, and appropriate social behaviors within a team setting. The integration of fitness concepts throughout the content is critical to the success of this course. This course will teach the components of competitive team sports such as: flag football, floor hockey, volleyball, basketball, team handball, ultimate frisbee, soccer, lacrosse, and softball.

PE INTRODUCTION TO HUMAN PERFORMANCE

Semester/Year (9-12)

Prerequisite: None

This course is designed to give students the opportunity to learn weight training concepts and techniques used for obtaining optimal physical fitness. Students will benefit from comprehensive weight training and anaerobic endurance activities. Students will learn the basic fundamentals of **weight training, strength training, acceleration/agility training, and overall fitness training**. The course emphasizes technique work on compound AND introductory implementation of Olympic lifts built into a block periodization program. Students will be empowered to make wise choices, meet challenges, and develop positive behaviors in fitness, wellness, and movement activity for a lifetime.

PE ADVANCED HUMAN PERFORMANCE

Semester/Year (9-12)

Prerequisite(s): Successful completion of **Introduction to Human Performance** OR 70% or greater summer attendance with signature/approval from the course instructor.

Advanced Human Performance is an accelerated course that will focus on intensifying and progressing the proper fundamentals and techniques learned in the intro to human performance. The course is designed using a block periodization program that utilizes methods to develop **muscular strength, power, core strength, stability, mobility, speed, agility, and quickness**, as well as **decreasing the risk of injury**. A rigorous and accelerated approach will be utilized to enhance student achievement. This is a non-recreational course that demands a strong work ethic and is designed for the student who desires to perform at the highest level.

HEALTH

Semester (10) **REQUIRED**

Prerequisite: None

The Health curriculum focuses on the development of physical, mental, emotional, and social wellness. In this course, students will integrate a variety of health concepts, skills, and behaviors to plan for their personal, lifelong health goals. These include awareness and consequences of risky behaviors, disease prevention, overall wellness, and identification of community health resources. Course content includes instruction in healthy relationships, noninfectious and infectious diseases, stress management, CPR, and first aid. Course content supports decision-making that establishes a lifetime of health and will support the district's belief that abstinence is the only safe and responsible choice.

DC HEALTH & WELLNESS

Semester (10-12)

Prerequisite: None. **Can be taken in place of required Health class or as an elective credit.**

This course provides an overview of the domains of wellness and the impact of lifestyle choices on all aspects of personal health. The course will explore topics related to nutrition, physical fitness, stress management, substance abuse, healthy relationships, and disease as it relates to the quality of life, length of life, and prevention of disease. *(This CWI course meets Idaho State Board of Education GEM competency requirements for GEM 6 - Social and Behavioral Ways of Knowing. It has also been E-designated and will fulfill the Ethical Reasoning requirement.)* **DUAL CREDIT OPTION - CWI Health and Wellness EXHS 155**

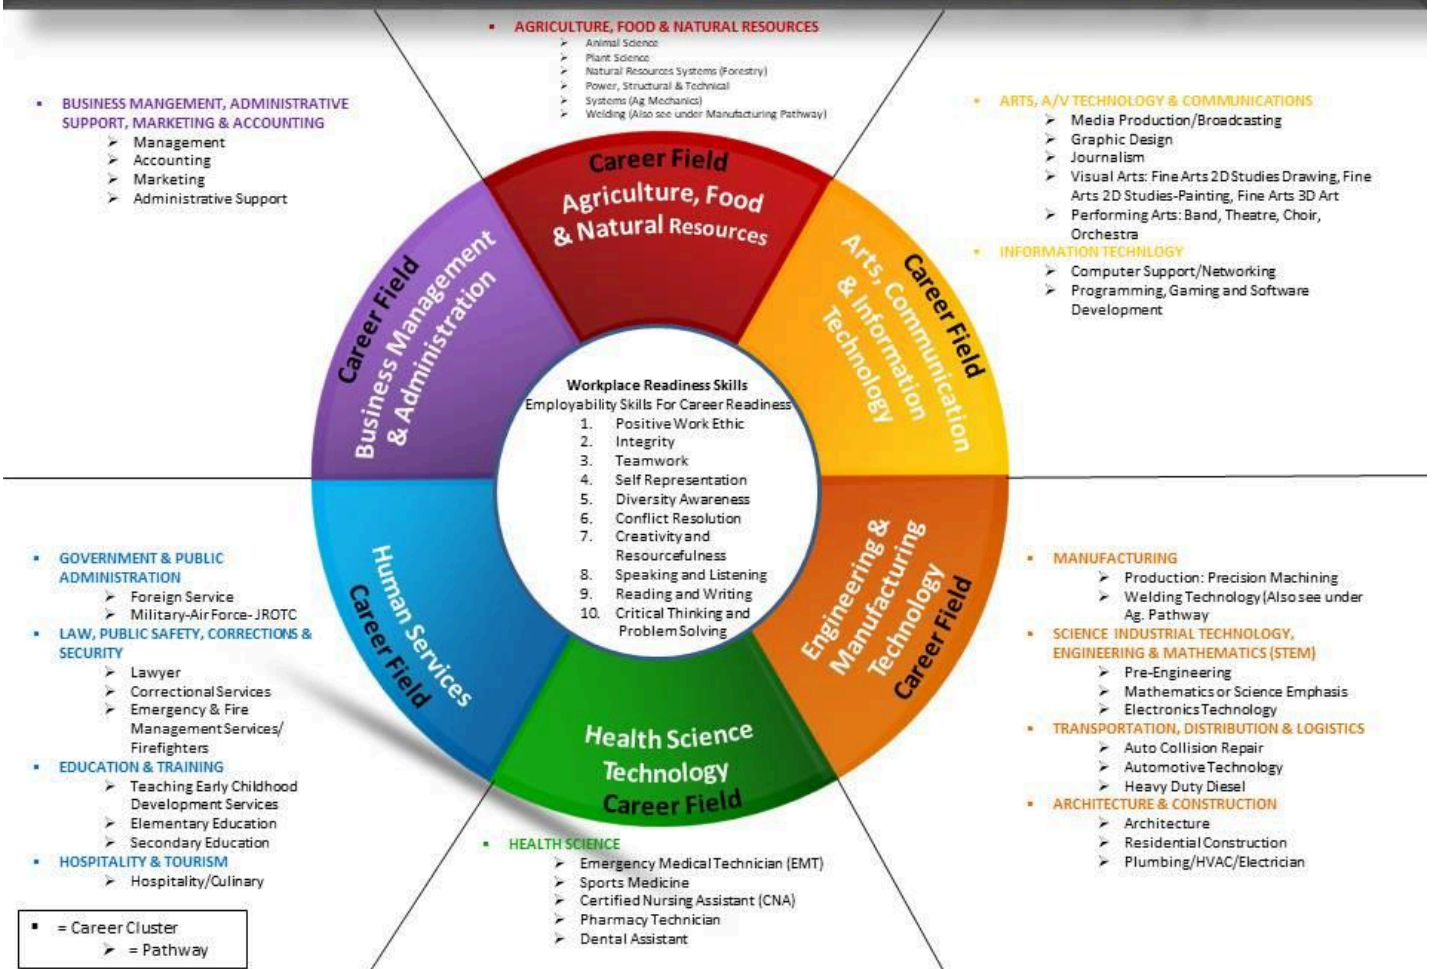

DC FUNDAMENTALS OF HEALTH PROFESSIONS

Year (10-11)

Prerequisite: **HEALTH PATHWAY ONLY. Successful completion of the full year counts as a Health graduation requirement.**

This course is for students who are interested in the Health Professions pathway and medical field. This course provides the student initial exposure and acquisition of knowledge, skills, and attitudes associated with a broad range of health-related careers. The student will learn medical terminology, infection control, human anatomy and physiology, and other related skills. This course will assist students in making informed decisions regarding their future academic and occupational interests in the health professions industry. **DUAL CREDIT OPTION - BSU Intro to Health Science and Public Health HLTH 110**

KHS Career Clusters and Pathways

Program of Study	Location	9th Grade	10th Grade	11th Grade	12th Grade

INTRODUCTION TO AGRICULTURE

Year (9-10) Preference given to freshmen

Prerequisite: None

This is a basic, introductory course designed to introduce students to the agricultural education program and to the overall food and fiber industry. This course will provide students with an overview of the FFA, agricultural record keeping practices, basic plant and animal science, and career opportunities. This course is designed to be a basic applied course to enhance students' perceptions of agriculture, its applications and related careers. This course is a gateway/prerequisite course to upper division agriculture classes.

DC AG ZOOLOGY/ANIMAL SCIENCE & NUTRITION

Year (10-12)

Prerequisite: Intro to Ag

The course is designed to prepare students for employment in the animal agriculture industry and to prepare them for further education in the specified area. The course will focus on the animal as an organism, the commonness among organisms, understanding the animal and its functions from the cellular level to the entire organism's systems and functions, nutritional requirements and ration formulation. Labs will include cellular structure and function, feed and ration mixing, and genetics exploration. ***This course will count as the 2 lab science biology credits toward high school graduation. IN ORDER TO EARN DUAL CREDIT OPTION - CWI Principles of Animal Science AGRI 109, STUDENTS MUST TAKE AG LIVESTOCK***

MANAGEMENT THE SAME YEAR  NCAA approved course

DC AG LIVESTOCK MANAGEMENT

Year (10-12)

Prerequisite: Intro to Ag

This course is designed to apply the livestock management concepts in a hands-on manner. It will allow students to work with live animals and apply learned management concepts. Students will be doing group work projects that bring to life the actual management processes that occur in beef, dairy, sheep, swine and horse operations. **IN ORDER TO EARN DUAL CREDIT OPTION - CWI Principles of Animal Science AGRI 109, STUDENTS MUST TAKE AG ZOOLOGY THE SAME YEAR**

DC AG FOOD SCIENCE

Semester (11-12)

Prerequisite: Intro to Ag or Instructor Approval. *Chemistry strongly recommended*

This course is a rigorous applied Science course in the science of food production, processing, transporting, storage, toxicology and quality control. Students apply the scientific method of discovery as they study the biological and chemical basis of food preparation, processing and preservation. Students develop writing and critical thinking skills through data collection, laboratory procedures, science-based experimentation, and written lab reports. This course is taught under the direction of a professor from the University of Idaho. **DUAL CREDIT OPTION - U of ID Introduction to Food Science FS 110**

AG EQUINE

Fall Semester (10-12)

Prerequisite: Intro to Ag. *Zoology and/or sophomore biology recommended*

A course of instruction designed to provide science and practical management instruction in the care of horses. The applied science curriculum component has a focus on physiology, anatomy, nutrition, genetics, health and reproduction.

DC AG PLANT AND SOIL HORTICULTURE SCIENCE

Year (10-12)

Prerequisite: Intro to Ag

Plant and Soil Science: This course is designed to be a science-based, advanced agriculture course, which will allow students to fulfill college-entrance science requirements and further their knowledge in scientific plant and soil agriculture. This course is designed to examine soil and plant relationships that affect the production of food and fiber and examine career opportunities in plant and soil science.

Horticulture Science: This course is designed to be a science-based, advanced agriculture course, which will allow students to fulfill college-entrance science requirements and further their knowledge in scientific horticulture. This course is designed to offer students hands-on experience with plant propagation and growth of nursery plants, plant and shrub identification, as well as grafting and pruning techniques. ***This course will count as a lab science biology credit for high school graduation.***

DUAL CREDIT OPTION - CWI Plant Science HRTC 110  **NCAA approved course**

AG LANDSCAPE DESIGN

Fall Semester (10-12) Preference given to juniors and seniors

Prerequisite: Intro to Ag

This is a course designed to prepare students to design, construct and maintain planted areas and devices for the beautification of home grounds and other areas of human habitation and recreation. ***Recommended to be paired with Greenhouse Management as a full year study.***

AG GREENHOUSE MANAGEMENT

Spring Semester (10-12) Preference given to juniors and seniors

Prerequisite: Intro to Ag

This is a course designed to prepare students in greenhouse and nursery operation and management. Topics will include greenhouse types, facilities, equipment, personnel management and training, greenhouse construction and maintenance, and business operation. ***Recommended to be paired with Landscape Design as a full year of study.***

AG FORESTRY AND WILDLIFE MANAGEMENT

Spring Semester (10-12) Preference given to juniors and seniors

Prerequisite: Intro to Ag

This is a course designed to examine the importance of forestry, wildlife and outdoor recreation with emphasis on efficient use of natural resources.

AG INTRODUCTION TO MECHANICS/WELDING

Year (10-12)

Prerequisite: Intro to Ag

Mechanics: Students will become familiar with basic mechanical theory and begin individual skill development. Approved shop safety practices will be emphasized and projects will include sharpening a twist drill, wood chisel, cold chisel, and screwdriver. They will also build a drill bit gauge, a tap and die project, and two plumbing projects with copper pipe and PVC. Tool identification and proper usage will also be emphasized.

Welding: This basic introductory course is designed to develop skills in Arc Welding, and Oxy-Acetylene welding, and Oxy-Acetylene cutting. Students will also be introduced to Gas Metal Arc Welding (wire-feed) and plasma cutting. **Shop safety is emphasized and students are required to provide coveralls and leather shoes.**

AG STRUCTURES/SMALL ENGINES

Year (11-12)

Prerequisite: Intro to Ag

Structures: Students will learn basic building techniques including: pouring and mixing concrete, wiring electrical circuits, building framing, and using a farm level to survey land. Safety in the construction and shop settings will be emphasized.

Small Engines: This course is designed to introduce students to basic engine theories of operation, including ignition, carburetion, compression, and governing. Students are encouraged to provide a Briggs and Stratton engine for overhaul. The engine overhaul will include disassembly, cleaning, measuring, honing cylinder, grinding valves and valve seats, and reassembling with new gaskets and replacing worn parts.

AG ADVANCED WELDING/FABRICATION

Year (12)

Prerequisite: Intro to Ag / Intro to Ag Mech/ Welding or Welding 1, 2

This course is designed to apply the previously taught agriculture mechanics skills in a hands-on setting. Students will learn advanced welding techniques and learn to apply them to an actual project. **Students need to provide their own coveralls and leather shoes.** The instructor must approve all projects before construction begins. Units to be included are: GMAW and GTAW welding, aluminum welding, metal identification and use.

DC AG PERSONAL SKILL DEVELOPMENT

Semester (10-12)

Prerequisite: Intro to Ag

This is a comprehensive semester course in developing agricultural leadership, citizenship, and cooperation. It includes topics in personal development, employer/employee relations, and group and individual interpersonal communication skills. ***This course will count as a speech credit toward high school graduation. DUAL CREDIT - U of I AGED 101 - Verbal Communication in Agriculture, Food, and Natural Resources. AGED 101 fulfills gen ed communication requirement at Idaho Colleges.***

DC AG BUSINESS/PERSONAL FINANCE

Semester (10-12) *Offered in conjunction with Personal Skill Development for a one-year class.*

Prerequisite: Intro to Ag

This is a semester course designed to introduce the student to agribusiness management in the free enterprise system. It will include the study of economic principles, budgeting, record keeping, finance, decision-making, risk management, business law, marketing, and careers in agribusiness. ***This course will fulfill the high school graduation requirement for Economics. DUAL CREDIT OPTION - CWI Farm and Agribusiness Management AGRI 278***

AG FLORAL DESIGN & MARKETING

Semester (10-12) Preference given to juniors and seniors

Prerequisite: Intro to Ag

This course is designed to give students an introduction to floral production, design, and marketing industries. The course is an open enrollment one-semester class designed to introduce concepts of floral plant growth and development, floral arrangement principles and design, floral identification, diagnosis and treatment of common floral plant disorders, and marketing and selling floral arrangements. Hands-on experiences will include designing and arranging greens and florals for local consumers and marketing and selling the in-class products.

AG ADVANCED FLORAL DESIGN

Semester (11-12) Preference given to juniors and seniors

Prerequisite: Ag Floral Design or Open Enrollment Floral Design

This is an advanced course that builds on the concepts and activities from floral design and marketing. Students will focus on floral identification, plant pests and diseases, floral business management, principles of design, and advanced floral designs. These types of designs will include but not be limited to weddings, funerals, parties, topiaries, and other projects and activities that may arise. Students will be expected to plan, order, price, and construct a variety of arrangements as well as conduct client interviews.

AG OCCUPATIONAL AND CAREER EXPERIENCE PROGRAM

Semester (11-12)

Prerequisite: Intro to Ag *Application required*

This course is designed to give students credit for extended job shadows, work in the agriculture department tool room, etc. The course can be specialized to the student enrolled. Course information will focus on employability skills, securing and maintaining employment, responsibility, etc. See one of the agriculture teachers if you are interested.

OPEN ENROLLMENT FLORAL DESIGN

Semester (10-12) Preference given to juniors and seniors

Prerequisite: None

This course is designed to give students an introduction to floral production, design, and marketing industries. The course is an open enrollment one-semester class designed to introduce concepts of floral plant growth and development, floral arrangement principles and design, floral identification, diagnosis and treatment of common floral plant disorders, and marketing and selling floral arrangements. Hands-on experiences will include designing and arranging greens and florals for local consumers and marketing and selling the in-class products.

OPEN ENROLLMENT SMALL ENGINES

Semester (10-12) Preference given to juniors and seniors

Prerequisite: None

This course is designed to introduce students to basic engine theories of operation, including ignition, carburetion, compression, and governing. Students are encouraged to provide a Briggs and Stratton engine for overhaul. The engine overhaul will include disassembly, cleaning, measuring, honing cylinder, grinding valves and valve seats, and reassembling with new gaskets and replacing worn parts. **Shop safety is emphasized and students are required to provide coveralls.**

CAPSTONE: PRE-VETERINARY MEDICINE

Semester: (11-12) **NOT A SCIENCE CREDIT**

Prerequisites: Zoology/Animal Science and Livestock Management

This class will focus on animal diseases, diagnosis and treatment. Also the use of tools used in animal health. Animal breeds, origins and breeding systems will be examined, along with animal welfare and public policy about animal use. Students will also prepare for the Animal Science Technical Skill Assessment.

CAPSTONE: ADVANCED PLANT/SOIL MANAGEMENT

Semester (11-12) **NOT A SCIENCE CREDIT**

Prerequisites: Plant and Soil Science and Greenhouse Management or Floral Design

This class will focus on emerging agriculture technology and how it relates to plant production. It will also include plant diseases and plant problem diagnosis. There will also be the availability of obtaining pesticide applicators certification. Students will also prepare for the Plant Science Technical Skills Assessment.

Arts, A/V Technology, and Communications

Visual Arts careers can include artists, graphic designers, multimedia artists and animators, and photographers. **Performing arts careers** can include actors, producers, directors, professors, musicians, and set designers. **Journalism and broadcasting careers** can include reporters, technical writers, authors, advertising, and public relations.

Recommendations: <ul style="list-style-type: none"> Job shadow, work-based learning, and courses in the GEM Certificate suggested for all pathways if you plan on a career that involves a 2 or 4 year degree. 				

Note: Two Humanities credits are required for graduation. **Global Connections**, taught through the Social Studies department to all 9th grade students counts as (1) humanities credit. Students are required to take at least one additional humanities credit for graduation.

Visual Arts

ART 1 -INTRO TO ART

Semester (9-12)

Prerequisite: None

Do you like Art? Do you want to like Art? –Then sign up for ART 1. This class is all about making art; no experience required. Painting, drawing, color, and mixed media –learn the elements of art by making art.

This class is an introduction to the mediums, techniques, and vocabulary of visual art. Students build their technical skills by using images that they see and observe to learn about the fundamental elements of visual art. Many of the students also gain their first experience in art history as they learn about the art of the past and how it affects the world we live in today. This foundation is essential in developing visual literacy, individual aesthetic, and creative problem solving.

ART 2 –DESIGN AND COLOR

Year (9-12)

Prerequisite: Art I or Completion of an Art class in Middle School

If you are excited about art and painting, Art 2 is the class for you. Learn the skills to make your art stand out and develop your ability to use color in your artwork. Incoming students are encouraged to have some experience in art class. This class seeks to build on a student's ability to use the basic Elements of Art to communicate with their art. Students also develop an understanding of Color Theory and refine their knowledge of the Principles of Visual Art. These tools will help them to make better critical judgments as they execute their own ideas and concepts using actual media and processes in art. This class also lays the foundation for students to work with paint and color in their work.

ART 3 - PAINTING

Year (10-12)

Prerequisite: Successful completion of Art 2 with a C or better.

This class is an introduction to painting. Students learn the skills and techniques for watercolor and acrylic painting. To be a successful painter, a student must be able to use what they know about color theory and value to render the effects of light in color. As these skills grow a student is also better able to recognize the use of color and painting in the visual spectrum they encounter daily.

ART 4 – OIL PAINTING

Year (11-12)

Prerequisite: Successful completion of Art 2 & 3 with a C or better OR Advanced Drawing 1 & 2 & Instructor Approval

This class is an extension of Art 3. Art 4 is a painting based class, but focuses on the medium of oil painting. Oil painting is considered the most versatile and dynamic of painting mediums. Art 4 furthers the development of critical thinking and problem solving as students continue to gain a higher level of visual literacy and mastery of their own art making abilities.

BEGINNING DRAWING

Semester (9-12)

Prerequisite: None

This class will provide students with the basic drawing techniques and skills that will enable them to present their ideas and communicate visually. Fundamentals of form and elements of design will be explored in and out of the classroom using a variety of drawing media.

INTERMEDIATE DRAWING

Semester (9-12)

Prerequisite: Successful completion of Beginning Drawing

The Intermediate Drawing class will build on the skills developed during the Beginning Drawing course with an exploration of different media. Shading skills will be refined as students practice observational drawing of humans, animals and other everyday items.

ADVANCED DRAWING 1 –FOUNDATIONS OF DRAWING

Year (10-12)

Prerequisite: Successful completion of Intermediate Drawing and teacher approval.

This class is for the dedicated art student. There will be a stronger emphasis on composition and the Elements and Principles of Design as they apply to drawing. A journal, final project and portfolio will be required. Students will also participate in at least one exhibition a year. Students will be encouraged to “think outside the box” and will participate in critiques for each project assigned. This class will be combined with Advanced Drawing II if numbers are low.

ADVANCED DRAWING 2

Year (11-12)

Prerequisite: ADVANCED DRAWING 1

This class is a continuation of Advanced Drawing 1, with an emphasis on abstract and conceptual art. A journal, final project and portfolio will be required. Students will also participate in at least one exhibition a year. Students will be encouraged to “think outside the box” and will participate in critiques for each project assigned. This class will be combined with Advanced Drawing I if numbers are low.

CERAMICS 1

Semester (10-12)

Prerequisite: Successful completion Beginning Drawing or Art 1/Instructor Approval

Ceramics I provides students with the opportunity to develop a basic knowledge of ceramics through handbuilding methods, an introduction to wheel throwing, glazing, and other techniques. Students will explore three dimensional design while developing both functional and sculptural forms. Working with clay is a process driven art form with a clear and concise process that must be followed to yield successful results. Ceramic vocabulary, art history, studio practices, creativity, and

quality craftsmanship are also emphasized.

CERAMICS 2

Semester (10-12)

Prerequisite: Successful completion of Ceramics 1/Instructor Approval

Ceramics II provides students with the opportunity to further develop their skills in ceramics. Students will enhance their practice of hand-building and wheel-throwing methods, glazing, and other techniques. Students explore three dimensional design while creating both original functional and sculptural pieces of art. Ceramic vocabulary, art history, studio practices, creativity, and quality craftsmanship are also emphasized.

CERAMICS 3

Semester (11-12)

Prerequisite: Successful completion of Ceramics 2/Instructor Approval

Ceramics III provides students with the opportunity to further develop technical skills in their practice. Students will be introduced to more complex concepts and vocabulary incorporating artistic perception, creative expression, historical/cultural context and aesthetic valuing, making connections and relationships to students interests and future career opportunities. Students are provided a platform for independent work and will be challenged as artists creatively. Ceramic vocabulary, art history, studio practices, creativity, and quality craftsmanship are also emphasized.

CERAMICS 4

Semester (11-12)

Prerequisite: Successful completion of Ceramics 3/ Instructor Approval

Ceramics IV is designed for the advanced ceramics students who are dedicated to furthering their knowledge, skills, and creative endeavors in clay. Students will explore more complex concepts and vocabulary incorporating artistic perception, creative expression, historical/cultural context and aesthetic valuing, making connections and relationships to students interests and future career opportunities. Students are provided a platform for independent work and will be challenged as artists creatively. Studio practices, planning and reflecting, creativity, and quality craftsmanship are also emphasized. Students will be required to create a body of work throughout the semester. An artist portfolio and artist statement are required upon completion of this course.

SCULPTURE 1

Semester (10-12)

Prerequisite: Successful completion Beginning Drawing or Art 1/Instructor Approval

Sculpture I provides students with the opportunity to develop a basic knowledge of sculpting methods, styles, and different kinds of media. Students will explore three dimensional design while expressing themselves through sculptural forms. A wide range of materials and techniques will be explored and utilized in the sculpture processes to encourage creative problem solving. Sculpture vocabulary, art history, studio practices, creativity, and quality craftsmanship are also emphasized.

SCULPTURE 2

Semester (10-12)

Prerequisite: Successful completion of Sculpture 1

Sculpture II provides students with the opportunity to further develop their skills in sculpture. Students will enhance their practice of creating three dimensional artworks while expressing themselves through quality sculptural forms. A wide range of materials and techniques will be explored and utilized in the sculpture processes to encourage creative problem solving. Sculpture vocabulary, art history, studio practices, creativity, and quality craftsmanship are also emphasized.

INDEPENDENT STUDY ART STUDIO

Semester/Year (11-12)

Prerequisite: Completion of ALL Advanced Art Classes & Instructor Approval.

This class is for the dedicated art student who *may be* planning to continue their art education after high school. The student will choose what their area of emphasis will be (painting, drawing, graphic design, pottery etc.) and will work on their own schedule. They will be expected to turn in projects at a time agreed to by the student and instructor. The student will also

spend time researching art careers to help them decide what to do with their abilities. They will also have the opportunity to participate in exhibitions offered in the other advanced art classes. There *may* be a possibility to spend time with local artisans in the valley. **The specifics of this course will change according to each student's needs.**

Performing Arts

NOTE: Band and Choir rehearsals, concerts, festivals, and music performances which take place outside of scheduled class time are defined as extensions of the formal classroom instructional program and, as such, require student participation and attendance. All courses may be taken for multiple credits.

Band/Orchestra

BAND - CONCERT BAND

Year (9-12)

Prerequisite: None

This is the standard band ensemble at Kuna High School. This year-long course includes marching band in the fall and concert band in the winter and spring. This class requires rehearsal time and performances outside of school hours. Band camp is mandatory and is scheduled for August. Previous experience is not required. This band travels for some performances.

BAND - WIND ENSEMBLE

Year (10-12)

Prerequisite: Auditions and Director Approval

This is the upper level band ensemble at Kuna High School. This year-long course includes marching band in the fall and concert band in the winter and spring. This class requires rehearsal time and performances outside of school hours. Students must be in good academic standing to continue in this class. Band camp is mandatory and is scheduled for August. Wind Ensemble is open to students of any grade, though students must audition in order to be placed in this advanced ensemble. This band travels for some performances.

BAND - PERCUSSION

Year (9-12)

Prerequisite: None

Students who play, or are interested in playing, percussion instruments and want to participate in either the Concert Band or Wind Ensemble should take this class. This year-long course includes marching band in the fall and concert band in the winter and spring. This class requires rehearsal time and performances outside of school hours. Band camp is mandatory and is scheduled for August. Previous experience is not required. This group travels for some performances.

BAND - COLOR GUARD

Fall Semester ONLY (9-12)

Prerequisite: None

Students who are interested in color guard (which includes elements of dance and flag work) should sign up for this class. This exciting group performs along with the music of the marching band. This semester course includes marching band in the fall and other content in the winter. This class requires rehearsal time and performances outside of school hours. Band camp is mandatory and is scheduled for August. Previous experience is not required. This group travels for some performances.

BAND - JAZZ II

Year (9-12)

Co-requisite: Brass, Woodwind and Percussion students must also be a part of Concert Band, Wind Ensemble or Percussion Class in order to participate in this class.

This is the standard jazz band ensemble at Kuna High School. This year-long class requires minimal rehearsal time and performances outside of school hours. Previous experience is not required. Playing opportunities are open for guitar, piano, bass and drums.

BAND - JAZZ I

Year (10-12)

Prerequisite: Auditions and Director Approval

Co-requisite: Brass, Woodwind and Percussion students must also be a part of Concert Band, Wind Ensemble or Percussion Class in order to participate in this class.

This is the upper level jazz band ensemble at Kuna High School. This year-long class requires minimal rehearsal time and performances outside of school hours. Students must be in good academic standing to continue in this class. It is open to students of any grade, though students must audition in order to be placed in this advanced ensemble.

MUSIC THEORY

Spring Semester ONLY (10-12)

Prerequisite: Students should have a basic level of proficiency in reading music.

This course is designed for students with some music background. Students are encouraged to have 1 year of high school experience in a music performance ensemble (ex: choir, band or orchestra). The purpose of this class is to provide an opportunity for students to expand their musical knowledge and prepare for college music classes. Topics covered include: music notation, chord analysis, 4-part writing, rhythmic notation, basic piano skills, ear training, music history, and music composition.

ORCHESTRA

Year (9-12)

Prerequisite: None

Orchestra performs at several concerts and special engagements throughout the academic year and travels to festivals. This group performs a broad range of orchestra literature in varying styles. Students will learn musicianship, theory, and instrumental technique. They will need to either own or rent an instrument.

Choir

TREBLE CHOIR

Year (9-12)

Prerequisite: None

Treble Choir is an entry-level choir for treble voices. All treble-voice freshmen choir students will enroll in this class. Students will perform at various concerts throughout the year. Members of this choir will learn basic music theory, sight-reading, and beginning vocal technique. This is a great class for someone who wants to learn more about music and who enjoys singing.

DOLCE WOMEN'S CHOIR

Year (9-12)

Prerequisite: Audition and Instructor Signature/Approval; Treble Choir Preferred

This is an auditioned Junior Varsity Choir. This group is made up of committed, dedicated singers. Dolce Women's Choir participates in festivals and concerts throughout the year. Students will strengthen sight singing and theory skills and learn intermediate vocal technique.

ADVANCED WOMEN'S CHOIR

Year (10-12)

Prerequisite: Audition and Instructor Approval; Treble/Intermediate Choir Preferred

Advanced Women's Choir is an auditioned varsity choir. This group travels and performs often and is made up of dedicated, committed singers. The Advanced Women's Choir participates in festivals and competitions. Singers will learn advanced techniques and sing technically challenging music of all styles. Advanced Women's choir members will attend a retreat in the fall. Students will have opportunities to perform with the Advanced Men's Choir during the year.

FORZA CHOIR

Year (10-12)

Prerequisite: Audition and Instructor Signature/Approval; Dual enrollment in Adv. Women's/Adv. men's Choir

Forza Choir is a varsity auditioned choir consisting of Members of Advanced Men's and Advanced Women's Choirs. This choir performs a variety of music, from jazz to renaissance. Forza Choir is Kuna High School's ambassador choir, and members will be expected to perform regularly and to represent Kuna High School with the highest music and non-music standards. Members will attend a retreat in the fall and a major tour every other year. ***Forza Choir Members are required to participate in Advanced Men's choir or Advanced Women's choir to be in this group.***

BEGINNING MEN'S CHOIR

Year (9-12)

Prerequisite: None

This Choir is a beginning to intermediate level choir for Male singers. All male freshmen choir students will enroll in this class. Students will perform at various concerts throughout the year. Members of this choir will learn basic music theory, sight-reading, and beginning vocal technique. This is a great class for someone who wants to learn more about music and who enjoys singing.

ADVANCED MEN'S CHOIR

Year (9-12)

Prerequisite: Audition and Instructor Approval; Men's Choir 1 Preferred

Advanced Men's Choir is an auditioned varsity choir. This group travels and performs often and is made up of dedicated, committed singers. Advanced Men's Choir participates in festivals and competitions. Singers will learn advanced techniques and sing technically challenging music of all styles. Advanced Men's Choir members will attend a retreat in the fall. Students will have opportunities to perform with the Advanced Women's choir during the year.

Theater

NOTE: Theater technical rehearsals, festivals, and performances which take place outside of scheduled class time are defined as extensions of the formal classroom instructional program and, as such, require student participation and attendance. All courses may be taken for multiple credits.

THEATER 1

Year (9-12)

Prerequisite: None

A course designed for students interested in exploring theater. Students will explore theater through movement and voice. They will create and perform original pantomimes, delve into character development through monologue and group scene studies, and build a sense of community through collaboration and game play. Emphasis is placed on introducing acting skills and theater games. Through performance and activities including pantomime, improvisation, stage voice, original and scripted scene work; students will strengthen their confidence, cooperation, and critical thinking skills and be introduced to stagecraft through makeup, costuming, and set design.

THEATER 2

Year (9-12)

Prerequisite: Successful completion of Theater 1/Instructor Approval

This course is designed for students continuing in drama. Students will continue the basics and move into higher levels of expectation in all areas covered in Theater 1. They will continue to explore more in depth character development through the exploration of specific acting techniques. Students will continue to hone their acting skills through acting challenges, and they will memorize and prepare monologues and practice the art of cold reading in preparation for the audition process. They will also produce and perform a one-act play.

THEATER 3

Year (10-12)

Prerequisite: Successful completion of Theater 2/Instructor Approval

This course is designed for students continuing in drama. Students will continue the basics and move into higher levels of expectation in all areas covered in Theater 2. They will continue to explore more in depth character development through the exploration of specific acting techniques. Students will continue to hone their acting skills through acting challenges. Students will also explore film and television acting, creating a self produced short film.

ADVANCED ACTING

Year (9-12)

Prerequisite: Instructor Approval/Audition

An advanced class designed specifically for students with a serious interest in various areas of theater. Students will experience all areas of production including acting, directing, publicity, stage-managing, set building, costuming and makeup. Students put on the main stage productions of each school year. Students are NOT guaranteed an acting role and must be willing to assist in any given area. Emphasis is placed on working together as a team and in character development. Students are required to prepare performances for the Idaho High School District and State Drama Competitions in November and December. The competition is not optional and participants' fees will be paid for by the theater department. An audition and instructor approval is required for admittance into this class. A purchase of a spirit pack is highly recommended.

TECHNICAL THEATER

Year (9-12)

Prerequisite: Instructor Approval

A course designed to give students hands-on experience in technical theater design and execution. This course will include costume design and building (patterning, sewing, creative repurposing, etc.), set design and construction, light and sound design, as well as stage and special effect makeup. Emphasis will be placed on collaboration and class projects will be used to support mainstage school productions. Students may also prepare projects for the Idaho High School District and State Drama Competitions in November and December. The competition is optional and participants must pay their entry fees. Instructor approval is required for admittance into this class. A purchase of a spirit pack is highly recommended.

**NOTE: Students may take technical theater and any other level of theater simultaneously.*

DC THEATER APPRECIATION

Year (11-12)

Prerequisite: None

A survey course designed to stimulate an appreciation of theater. Students will be introduced to the study of theater as an art form, backstage elements, and important periods and plays in learning about the development of the theater. Filmed productions, slides, lectures, and discussions will focus on the unique world of the stage. *(This CWI course meets Idaho State Board GEM competency requirements in GEM 5 - Humanistic and Artistic Ways of Knowing.)* **DUAL CREDIT OPTION - CWI Theater Appreciation THEA 101**

World Languages

FRENCH 1

Year (9-12)

Prerequisite: None

This interactive year-long course is taught primarily via the TPRS® (Teaching Proficiency through Reading and Storytelling) method. Regular attendance is vital to a student's success as virtually all French language acquisition occurs in class. Students will learn to communicate in French, not just learn about French grammar. Targeted skills include reading and writing but also listening, speaking, and conversational French at a level of "Novice High" as per the American Council on the Teaching of Foreign Languages (ACTFL). French culture will be explored through authentic media, music, games, films, and food days to

celebrate French holidays. Students, families, and the community at large have the opportunity to travel to Europe during Spring Break.  **NCAA approved course**

FRENCH 2

Year (10-12)

Prerequisite: Successful completion of 2 semesters of French 1 or Instructor approval

This interactive year-long course continues the acquisition of French language and culture primarily via the TPRS® (Teaching Proficiency through Reading and Storytelling) method. Regular attendance is vital to a student's success as virtually all French language acquisition occurs in class. Students will continue to learn to communicate in French, not just learn about French grammar. Targeted skills include higher-level reading and writing but also listening, speaking, and conversational French at a level of "Intermediate Low" as per the American Council of the Teaching of Foreign Languages (ACTFL). French culture will continue to be explored through authentic media, music, games, films, and food days to celebrate French holidays. Students, families, and the community at large have the opportunity to travel to Europe during Spring Break.  **NCAA approved course**

DC FRENCH 3

Year (10-12)

Prerequisite: Successful completion of 2 semesters of French 2 or instructor's permission

For advanced students, this year-long course reviews and strengthens the skills learned in French 1 and 2 to provide a firm foundation of the French language via the *Chez Nous* textbook in use at CWI. Regular attendance is vital to a student's success as virtually all French language acquisition occurs in class. Students will continue to learn to communicate in French, not just learn about French grammar. Targeted skills include higher-level reading and writing but also listening, speaking, and conversational French at a level of "Intermediate Mid-2" (ACTFL). French culture will continue to be explored through authentic media, music, games, films, and food days to celebrate French holidays. Students, families, and the community at large have the opportunity to travel to Europe during Spring Break. **Four dual credits for this course are available through**

CWI (College of Western Idaho) in the form of CWI FREN-101. DUAL CREDIT OPTION - CWI FRENCH 101  **NCAA approved course**

DC FRENCH 4

Year (11-12)

Prerequisite: Successful completion of 2 semesters of DC French 3

For advanced students, this year-long course builds upon the skills learned thus far in French to complete the remaining chapters of the *Chez Nous* textbook in use at CWI. Regular attendance is vital to a student's success as virtually all French language acquisition occurs in class. Students will continue to learn to communicate in French, not just learn about French grammar. Targeted skills include higher-level reading and writing but also listening, speaking, and conversational French at a level of "Intermediate Mid-3" (ACTFL). French culture will continue to be explored through authentic media, music, games, films, and food days to celebrate French holidays. Students, families, and the community at large have the opportunity to travel to Europe during Spring Break. **Eight dual credits for this course are available through CWI (College of Western Idaho) in the form of CWI FREN-102 (Fall) and CWI FREN-201 (Spring). DUAL CREDIT OPTION CWI FRENCH 102 AND CWI**

FRENCH 201  **NCAA approved course**

SPANISH 1

Year (9-12)

Prerequisite: None

Spanish 1 focuses on learning language through fun, oral listening and oral response. Vocabulary and basic grammar are introduced in context through songs, games and videos. Students explore culture through literature, news, music, guest speakers, class discussions, films about Spanish-speaking countries and Internet investigations. Students will research cultural topics that interest them and share their research with the class.  **NCAA approved course**

SPANISH 2

Year (9-12)

Prerequisite: Spanish 1 or Instructor approval

Spanish 2 will help students improve their listening and reading skills through a wide range of activities: storytelling, sustained silent reading, artwork, short conversations, games, etc. These activities will provide comprehensible input that will lead to the development of communicative competence.  **NCAA approved course**

DC SPANISH 3

Year (9-12)

Prerequisite: Spanish 2

Spanish 3 will continue to provide compelling and comprehensible input at a faster pace. Students will also retell stories and write opinions. Students will read a novel about a Latin-American country. Sustained silent reading will be an important part of the class. **DUAL CREDIT OPTION - CWI Elementary Spanish I SPAN 101**  **NCAA approved course**

DC SPANISH 4

Year (9-12)

Prerequisite: Spanish 3

Students will read a novel that will expand their cultural awareness. This novel will be the main source of comprehensible input. Students will retell and write parts of this novel and share their opinions. Students will also read other texts: magazines, children books, textbooks, etc. **DUAL CREDIT OPTION - CWI Elementary Spanish II SPAN 102**  **NCAA approved course**

DC SPANISH 5

Year (9-12)

Prerequisite: Spanish 4

Students will be reading a variety of materials and presenting the information formally. Students will apply the grammar and spelling rules. Students will compare information and develop strategies to their composition skills. **DUAL CREDIT OPTION - CWI Intermediate Spanish I SPAN 201**  **NCAA approved course**

Business/Marketing – Graphic Design/Communication

HSB -Business, Marketing, and Management	KHS	Business Leadership (1 Sem) Wealth Management (1 Sem) Word, PowerPoint (1sem)	Principles of Business (1 Sem) Business Economics (1 Sem) Excel and Access (1 Sem)	Principles of Marketing (1 Sem) Principles of Finance (1 Sem)	Principles of Management (1 Sem) Capstone: Business Strategies (1 Sem)
Graphic Design/Comm.	KHS	Intro to Media Tech (1 Sem)	Graphic Design 1 (2 Sem)	Graphic Design 2 (2 Sem)	Capstone: Graphic Design 3 (2 Sem)
Administrative Assistant	KHS	Word, PowerPoint (1 Sem) Intro to Media Tech (1Sem)	Excel and Access (1 Sem) Principles of Business (1 Sem)	Accounting (1 sem)	Capstone: Business Communications (2 Sem)

BUSINESS LEADERSHIP

Semester (9-10)

Prerequisite: None

Leadership doesn't come naturally to most of us. Fortunately, we can learn leadership skills (or improve them if you're a natural). In this course you will build the leadership skills you need to excel in college and career. You will discuss contemporary leadership and teamwork literature, complete a team-based project, and put your leadership skills into action at school, at home, and in the community.

BUSINESS WEALTH MANAGEMENT

Semester (9-10)

Prerequisite: None

Learn how to take charge of your money to build wealth. In this course, you'll gain the smarts you'll need to make major purchases—such as a car or a house, along with ways to protect your money, such as insurance and investing. And true to the High School of Business™ program, this course isn't just about sitting and listening. You'll do hands-on projects. At the end of the course, your class will get a chance to teach your new skills to others by offering your community a money management course. This project-based financial literacy course develops student understanding and appreciation of the need for personal financial management and investing skills.

PRINCIPLES OF BUSINESS

Fall Semester ONLY: (10-12)

Prerequisite: None

Q: What do your favorite rock group's tour schedule, the logo on a coffee mug, and the Wall Street Journal have in common?

A: Business. It's everywhere. Principles of Business will open your eyes to the world of business. During the course you will be introduced to some of the major areas of business administration through fun, real world projects. This project based business course develops student understanding and skills in areas such as business law, economics, financial analysis, human resources management, information management, marketing, operations, and strategic management.

BUSINESS ECONOMICS

Spring Semester ONLY: (10-12)

Prerequisite: Principles of Business

Ever thought about the choices that the Three Little Pigs made from an economic perspective? In Business Economics, you will consider how decisions (such as work vs. play or sticks vs. straw) affect businesses and individuals in the short and long term. You will also conduct research and examine business problems as you learn about microeconomic, macroeconomic and international economic concepts. Students expand their understanding that businesses are influenced by external factors that are often beyond their control. Consumer spending, government policies, economic conditions, legal issues, and global competition are addressed through practical, current applications to everyday societal and business life. **Counts as a**

graduation requirement for KHS economics credit  **NCAA approved course**

PRINCIPLES OF MARKETING

Fall Semester ONLY: (11-12)

Pre or Corequisite: Principles of Business

A project based business course that develops student understanding and skills in the functional areas of marketing: channel management, marketing-information management, market planning, pricing, product/service management, promotion, and selling. Students acquire an understanding and appreciation of each of the marketing functions and their ethical and legal issues. Decision matrices are employed to aid in market planning.

PRINCIPLES OF FINANCE

Spring Semester ONLY: (10-12)

Pre or Corequisite: Principles of Business

This project based course furthers student understanding of two specific business activities—accounting and finance—that were introduced in an earlier High School of Business course, Principles of Business. Through team activities and a semester-long corporate investment project, students make connections between accounting and finance. Students acquire

an understanding of financial statements, calculate financial ratios, and make corporate financial management decisions based on their analysis of that financial data. In addition, students apply the concepts of operation and overhead costs, internal accounting controls, and budgets to their class business. Lastly, cost/benefit analysis is introduced as an element of financial planning and decision-making.

PRINCIPLES OF MANAGEMENT

Fall Semester ONLY: (11-12)

Pre or Corequisite: Business Econ, Principles of Marketing, and Principles of Finance

Principles of Management furthers student understanding of management that was introduced in an earlier High School of Business™ course, Principles of Business. Through individual and team activities and a semester-long project, students make connections between management and business success. Students acquire an understanding of legal and ethical issues associated with management; initial, plan, implement and control, and close a project; motivate team members; delegate work; develop a chain of command; coordinate work efforts; and interpret statistical findings. accounting

BUSINESS STRATEGIES

Spring Semester ONLY: (12)

Prerequisite: Principles of Management

This project-based business course develops student understanding and skills in such areas as business law, entrepreneurship, financial analysis, human resources management, and strategic management. By planning, organizing, staffing, directing, leading, and controlling business activities, students acquire a realistic understanding of what is required to open and successfully run a business. They conduct situational, market, and competitive analysis; select a target market; develop a business plan; recruit, interview, select, and hire staff; supervise staff; control use of resources; and evaluate the results of the business effort. Throughout the course, students make decisions and use problem solving skills. Formal reflection is an ongoing component of the course.

PERSONAL FINANCE

Semester (11-12)

Prerequisite: None

A course designed to provide students with some personal finance skills and knowledge; to include goal setting, budgeting, saving, investing, borrowing, insuring, identity protection and retirement planning. **Counts as a graduation requirement for KHS economics credit.**

WORD AND POWERPOINT

Semester (9-12)

Prerequisite: None

This course provides students with an introduction to Word and PowerPoint. Students will learn how to use the software to create dynamic and professional documents. Real world projects will be used to demonstrate student understanding. Computer literacy is included as well as learning the career planning process and essential keyboarding skills. The computer skills learned in this class support a student's high school academic career and provide a foundation for after high school.

EXCEL AND ACCESS

Semester (10-12) Spring only

Prerequisite: Successful completion of Word and PowerPoint or instructor approval.

Students learn excel skills including creating charts and using functions. Access will include creating databases and report inquiries. At the end of this course students will have the opportunity to take an industry exam to become Microsoft Office Specialists in Excel and Access.

ACCOUNTING 1

Semester (10-12)

Prerequisite: Word and PowerPoint (recommended)

In this introductory course students learn how to prepare accounting reports for a service business organized as a sole proprietorship. This course will focus on the accounting cycle, recording accounting transactions in a general journal, posting

to the general ledger, completing bank reconciliations, preparing adjusting and closing journal entries and preparing balance sheets and income statements. The course includes hands-on electronic work papers and computerized simulations. Students will experience keeping accounting records for a business and explore accounting and business careers.

INTRODUCTION TO MEDIA TECHNOLOGIES

Semester (9-11)

Prerequisites: None

This course is designed to provide the basic fundamental competencies for media technologies. It includes an introduction to print and electronic media including digital photography, photomanipulation, design layout, and video broadcasting. Students will have access to all Adobe apps for FREE. Students will focus on Adobe Lightroom, PhotoShop, Illustrator and Premiere.

GRAPHIC DESIGN 1

Year (10-12)

Prerequisite: None

This course is an introduction to basic graphics communications and printing. Elements and principles of design are also explored. Students will use Adobe software, PhotoShop and Illustrator, that is commonly used in the Graphic Communications industry to design and execute layouts and illustrations for advertising displays, company identities and logos, packaging, posters, brochures and manuals. Students will have access to all Adobe apps for FREE. Students will test for Adobe Certification Exams in Photoshop (sem 1) and Illustrator (sem 2) for FREE.

GRAPHIC DESIGN 2

Year (11-12)

Prerequisite: Graphic Design 1

This course will expand on the skills learned in Graphic Design 1 and will provide a more in depth study of other graphic design avenues. Students will work in a project-based setting and will have the opportunity to experience many of the responsibilities that industry designers do; including actual client request (from KHS), sketching, designing, developing and testing their designs. Transfer of images from digital processes to paper and other media is included as well as transferring paper images to digital files for modification. An awareness of graphics, communications history and careers is developed. Students will have access to all Adobe apps for FREE. Students will test for the Adobe Certification Exam in InDesign for FREE.

GRAPHIC DESIGN 3

Year (12)

Prerequisite: Graphic Design 2

This course will expand on the skills learned in Graphic Design 2 and will provide a more in depth study of designing and printing work for the Kuna School District and community members. Students will learn some aspects of website design through Adobe Dreamweaver. Students will work in a project-based setting and will be running our school print shop in conjunction with the business strategies class. They will have the opportunity to experience many of the responsibilities that industry designers do; including job bidding, estimating, work, and quality control. Students will have access to all Adobe apps for FREE. Students will test for the Adobe Certification Exam in AfterEffects or Animate for FREE.

GRAPHIC DESIGN WORK BASED LEARNING

Year (11-12)

Pre/Co - requisite: Graphic Design 2 or 3

Students will design and produce client work in an exciting and dynamic environment. Students will run small print shop for internal and external clients. Examples of jobs include: tshirt design and production using cricut and full color vinyl printer as well as large format color printing for posters and banners. Students will also learn skills to run a business. Examples include: equipment maintenance and repair, supply ordering, job costing, production, estimating due dates, invoicing, working with clients, working with teammates, accountability, and creating a welcoming and efficient work environment. Teacher approval may be required as size of class is limited due to physical space.

YEARBOOK

Year (9-12)

Prerequisite: Application & Instructor Approval

This is a production class where the student will produce the school's yearbook. All students will gain useful, real world skills in time management, marketing, teamwork, and design principles. Each student will sell and learn to design business ads; write journalistic style copy and captions; plan a theme and cover; design consistent, double page spread layouts; and select and crop appropriate photos. Students must possess the desire and dedication to meet multiple deadlines. This class will **REQUIRE** students to regularly spend time outside of class in order to meet deadlines or photograph extracurricular activities. Those who are part of the Kay Ach Ess yearbook staff must be detail oriented, mature and trustworthy. Students in the class must be able to work well independently and within groups. Students will become proficient in the use of Digital Cameras, Adobe Photoshop and Adobe Lightroom.

INTRO TO ENGINEERING DESIGN

Year (9-10)

Co-requisite: STEM Research if on STEM Pathway (counts as an elective science credit)

This project-based, hands-on class involves students in safely learning a wide variety of engineering practices while using tools like the Band saw, Table saw, Miter saw, lathe, Drill Press and Router. Projects will include, Bridge Construction, Windmills, Hydraulic Arms, CO₂ cars, Mousetrap cars and Catapults. An increased emphasis will be place on the use of computerized drafting and 3-D modeling software during the design process followed by the actual building and testing of the designs using the tools in the shop. Course follows the Project Lead the Way (PLTW) guidelines.

PRINCIPLES OF ENGINEERING

Year (10-12)

Prerequisite: Intro to Engineering Design

Students in engineering teams apply technology, science, and mathematics concepts and skills to solve engineering design problems and innovative designs. Students research, develop, build, test, and analyze engineering designs. Through problems that engage and challenge, students explore a broad range of engineering topics, including mechanisms, the strength of structures and materials, and automation. An increased emphasis will be place on the use of computerized drafting and 3-D modeling software during the design process followed by the actual building and testing of the designs using the tools in the shop. Projects include a scale model house, solar cars, submarines, Water turbines, motorized airplanes and the construction of a working electrical motor. This course follows the Project Lead the Way (PLTW) guidelines.

Information Technology Programs - Networking, Computer Support, Programming and Gaming, Interactive Media

INTRO TO COMPUTER SYSTEMS

Semester (9-11)

Prerequisite: None

This course is a survey of computer technologies. This course may include ethics of computer and network use, web design, introduction to graphics, animation, computer hardware and operating systems, basic networking, troubleshooting and programming. (The student should have prior knowledge of an "office suite" to include but not be limited to word processing, spreadsheet, database, and presentation software.)

PROGRAMMING FUNDAMENTALS

Year (10-12)

Prerequisites: Intro to Computer Systems

This course provides the beginning programmer with a solid foundation in programming fundamentals, using visualization and application. Designed for beginners with little or no previous programming experience, this course teaches students the fundamentals behind all programming languages. By putting standard concepts, like input, output, selection, and repetition at the forefront, instead of focusing solely on a specific language, students will gain knowledge and insight that is easily transferable to other languages.

COMPUTER SUPPORT ESSENTIALS

Year (10-12)

Prerequisites: Intro to Computer Systems

This course maps to Comptia A+ computer maintenance and repair industry certification. Students may choose to certify in any of the following areas: IT Technician, Remote Support Technician or Depot Technician. Students would receive their PC PRO Certification exam at the end of the year.

COMPUTER SUPPORT ESSENTIALS 2

Year (11-12)

Prerequisites: Computer Support Essentials

Students will continue to work to earn the Comptia A+ computer maintenance and repair industry certification. Students gain real-world experience in hands-on labs where they incorporate their class experiences in interacting with the community. Students actively repair computers, phones, tablets, and game consoles brought to the class by the school community as well from the city of Kuna.

COMPUTER SUPPORT ESSENTIALS 3

Year (11-12)

Prerequisites: Computer Support Essential 2

Students that continue into Computer Support Essentials 3 are placed in positions of authority and trained in small group management to prepare them for the real world. Computer Support Essentials 3 students will also have the opportunity to gain real world experience through working in an internship with local industry leaders. Students may choose to certify in any of the following areas: IT Technician, Remote Support Technician or Depot Technician.

DC COMPUTER SCIENCE PRINCIPLES 1

Year (11-12)

Prerequisites: Programming Fundamentals

Essentials of programming using the Python programming language with a focus on selection statements, loops, arrays, functions, classes, and objects. Includes construction, compilation, and debugging of complete programs that solve simple problems. **DUAL CREDIT OPTION - CWI CPSC 111 Introduction to Python Programming**

DC COMPUTER SCIENCE PRINCIPLES 2

Year (12)

Prerequisites: DC Computer Science Principles 1 and Calculus

This introductory course in computer science addresses object-oriented problem-solving and programming. Topics covered include software development processes, data, expressions, conditionals, loops, arrays, lists, classes, interfaces, graphical user interfaces, and Unified Modeling Languages (UML) Diagrams. PREREQ: [MATH 170](#).
DUAL CREDIT OPTION - CWI CPSC 121 Computer Science I

INTRODUCTION TO MEDIA TECHNOLOGIES

Semester (9-11)

Prerequisites: None

This course is designed to provide the basic fundamental competencies for media technologies. It includes an introduction to print and electronic media including digital photography, photomanipulation, design layout, and video broadcasting. Students will have access to all Adobe apps for FREE. Students will focus on Adobe Lightroom, PhotoShop, Illustrator and Premiere.

BROADCAST/VIDEO TECHNOLOGIES I

Year (10-12)

Recommended: Introduction to Media Technologies

A course designed to introduce students to the basic concepts of the broadcast technology field. This includes an introduction to video production, legal and ethical issues in the video field, cameras, audio, and other video equipment. Students will have an opportunity to receive their Adobe Premiere Pro Certification.

BROADCAST/VIDEO TECHNOLOGIES II

Year (11-12)

Recommended: Introduction to Media Technologies

Prerequisite: Broadcast/Video Technologies I & Adobe Premiere Pro Certification

A course designed to cover the technical aspects of the broadcast technology field, audio, and video equipment. Students will create videos using all stages of production: planning, shooting, audio equipment use, editing, and uploading to various sources. Students will assist in the creation of the daily school announcements.

BROADCAST/VIDEO TECHNOLOGIES III

Year (12)

Prerequisites: Broadcast/Video Technologies I & Broadcast/Video Technologies II & Adobe Premiere Pro Certification

A course designed to further develop the technical skills in the broadcast technology field. Students will create real world videos for clients in the community and create daily school announcements.

---	-----	---	----------------------------	-----	-----

Family And Consumer Sciences - Career and Technical Education (CTE)

FUNDAMENTALS OF ESSENTIAL LIVING

Semester (9-10)

Prerequisite: None

The Fundamentals of Essential Living is the comprehensive body of skills, research, and knowledge that helps people make informed decisions about their well-being, relationships, and resources to achieve optimal quality of life. Topics include time management, human development, personal and family finance, culinary/nutrition, food safety, housing and interior design, textiles and apparel, and consumer issues.

FOUNDATIONS OF FASHION STRATEGIES

Semester (9)

Prerequisite: None

Explores the rapidly growing industry where teens see themselves as active stakeholders. This course reflects on fashion history, exposes students to the science of textiles, basic clothing care and repair, and requires students to demonstrate knowledge and skill in various applications of basic design. Students examine the social and psychological aspects of fashion, understanding how acquisition of clothing has changed over time. The purpose of this course is to introduce students to the skills and knowledge required in the major career fields of the fashion design industry. Course work will be beneficial to students as consumers today and in the future. Provides the preliminary essential component of an occupation sequence in Fashion Design and Merchandising.

PARENTING AND CHILD DEVELOPMENT

Fall Semester (10-12)

Prerequisite: Fundamentals of Essential Living

Emphasis includes families and communication skills, parenting decisions and skills, prenatal and postnatal development of children through the first year, and the emotional, social, physical, and intellectual development of children from birth to age three. Major projects include family ties and child development projects. Projects involve developing life skills through FCCLA (Family, Career, and Community Leaders of America). If students join this organization (not required to join), they have an opportunity to further expand on in-class curriculum and to participate in out-of-classroom conferences and competitions with area schools on a district, state and national level.

WORKING WITH CHILDREN

Spring Semester (10-12)

Prerequisite: Parenting and Child Development

Emphasis is on the process of learning to plan lessons and teach 3 to 5 year olds, and careers involving early childhood. This includes: employability skills and professionalism in working with children, families and the community, development of teamwork, leadership skills, and the emotional, social, physical and intellectual development of 3 to 5 year olds. Students are expected to plan lessons, become proficient in child observation and the handling of daily childcare routines and situations. Students who are planning careers in working with children will find the experiences in this class a valuable introduction to childcare careers or early childhood education. FCCLA (Family, Career, and Community Leaders of America) offers opportunities to students to apply their skills to the community. If students join this organization (not required to join), they have an opportunity to further expand on in-class curriculum and to participate in out-of-classroom conferences and competitions with area schools on a district, state and national level.

FASHION & TEXTILES

Semester (10-12)

Prerequisite: None

Explores the rapidly growing industry where teens see themselves as active stakeholders. This course reflects on fashion history, exposes students to the science of textiles, basic clothing care and repair, and requires students to demonstrate knowledge and skill in various applications of basic design. Students examine the social and psychological aspects of fashion, understanding how acquisition of clothing has changed over time. The purpose of this course is to introduce students to the skills and knowledge required in the major career fields of the fashion design industry. Course work will be beneficial to students as consumers today and in the future. Provides the preliminary essential component of an occupation sequence in Fashion Design and Merchandising.

EDUCATION ASSISTANT

Year (11-12)

Prerequisite: Parent & Child Dev and Working with Children

This course focuses on creating curriculum resources, unit and lesson planning, along with behavioral and management plans for students interested in working in the educational system. Students are also assigned to an elementary or middle school classroom where they assist the teacher and have the opportunity to try out the role of a teacher. This year-long course prepares individuals for further education opportunities at the postsecondary level in paraprofessional or teacher education programs. FCCLA (Family, Community and Career Leaders of America) leadership activities are strongly tied to the Education & Training pathway and are integrated into this course.

DC ADVANCED EDUCATIONAL ASSISTANT

Year (12)

Prerequisite: Education Assistant

This course is the internship that follows Education Assistant. Students will spend the year interning in an elementary school, applying the skills and knowledge gained in Education Assistant in the classroom. Students can also complete the praxis to receive a paraprofessional certification which is beneficial in establishing relationships with a school district should one decide to pursue a career in education. *Students may need to provide their own transportation to off-site clinicals and externships.*

CULINARY 1

Year (10-12)

Prerequisite: Preference given to Culinary pathway and/or those with food handlers certification

Culinary I provides students with a foundation in food preparation with practical application in career opportunities, reinforced basic skills, food safety and sanitation, meal management, preparation, industrial food preparation, business management, service techniques and employability skills. Food safety exam. Family, Career and Community Leaders of America (FCCLA), leadership activities are an integral part of this course. This course will include lectures, labs and academic assessments.

CULINARY 2

Year: (11-12)

Prerequisite: C or better in Culinary 1 or Instructor/Admin/Student agreement

This capstone course prepares students for gainful employment and/or entry into post-secondary education in the food production and service industry. Content provides students the opportunity to apply the marketable culinary arts and food service skills they have acquired by assuming increasingly responsible positions, including participation in a cooperative education experience. FCCLA (Family, Community and Career Leaders of America) leadership activities are strongly tied to this course. FCCLA activities should be integrated into this course.

Government and Public Administration

Government jobs can include Foreign Service, public management, city planning, national security, and politician.

Pathway Name	9th Grade	10th Grade	11th Grade	12th Grade
Military Air Force JROTC	JROTC 100 (2 sem) Includes: Aviation History, Drill and Ceremony, Leadership and Physical Fitness	JROTC 200 (2 sem) Includes: Global Studies, Drill and Ceremony, Leadership and Physical Fitness	JROTC 300 (2 sem) Includes: Exploration of Space, Drill and Ceremony, Leadership and Physical Fitness	JROTC 400 (2 sem) Includes: Survival and Management of Cadet Corps, Drill and Ceremony, Leadership and Physical Fitness
Recommendations: Military pathway should consider coursework in the secondary pathway related to the training area in the military.				

Air Force Junior Reserve Officer Training Corps- AF JROTC

All JROTC Courses consist of 40% Aerospace Science, 40% Leadership Education, and 20% Wellness

JROTC 100

1st Year Cadet

Prerequisite: None

Forty percent of JROTC 100 is an introduction to the history of aviation called ‘Milestones in Aviation.’ This course focuses on the development of flight throughout the centuries. It starts with ancient civilizations, then progresses through modern day flight. Throughout the course there are readings, videos, hands-on activities, and in-text and student workbook exercises to guide in the reinforcement of the materials. Forty percent of this course is Leadership Education, which will start with citizenship, character building, Air Force Traditions, which also includes learning how to march (Drill & Ceremony). The last 20% of the course consists of physical fitness activities.

This course is a military course that requires students in the Cadet Corps to wear an Air Force uniform at least once every week. This is a big part of the student’s grade. While in uniform students are required to adhere to certain military grooming standards to include; haircuts, shaving (males), and restrictions on jewelry wear.

JROTC 200

2nd Year Cadet

Prerequisites: JROTC 100

Forty percent of JROTC 200 is called Cultural Studies: An Introduction to Global Awareness. This is a customized course about the world’s cultures. The course is specifically created for the Air Force Junior ROTC program. It introduces students to the world’s cultures through the study of world affairs, regional studies, and cultural awareness. The course delves into history, geography, religions, languages, culture, political systems, economics, social issues, environmental concerns, and human rights. It looks at major events and significant figures that have shaped each region. Throughout the course, there are readings, video segments, hands-on activities, other optional activities, technology enrichment, and assessments to guide in the reinforcement of the materials. Forty percent of this course is a more advanced Leadership Education, which stresses communications skills and cadet corps activities. Much information is provided on communicating effectively, understanding groups and teams, preparing for leadership, solving conflicts and problems, and personal development. Cadet corps activities include holding positions of greater responsibility in the planning and execution of corps projects which also includes advanced Drill & Ceremony. The last 20% of the course consists of physical fitness activities.

This course is a military course that requires students in the Cadet Corps to wear an Air Force uniform at least once every week. This is a big part of the student’s grade. While in uniform students are required to adhere to certain military grooming standards to include; haircuts, shaving (males), and restrictions on jewelry wear.

JROTC 300

3rd Year Cadet

Prerequisites: JROTC 200

Forty percent of JROTC 300 is a science course called “Exploring Space: The High Frontier.” The course begins with the study of the space environment, then investigates the importance of entering space and discusses manned and unmanned space flights, focusing on concepts surrounding spaceflight, space vehicles, launch systems, and space missions. The section on manned spaceflight focuses on the Space Shuttle, space stations and beyond, covering milestones in the endeavor to land on the Moon and to safely orbit humans and crafts for temporary and prolonged periods. The course also covers the human aspect of spaceflight, focusing on the human experience in space. It also examines the latest advances in space technology, including robotics in space, the Mars Rover, and commercial uses of space. Forty percent of this course is Advanced Leadership Education, which is designed to prepare students for life after high school in the high-tech, globally oriented, and diverse workplace of the 21st century. Students will learn how to become a more confident financial planner and to save, invest, and spend money wisely. They will learn about real-life issues such as understanding contracts, leases, warranties, legal notices, personal bills, practical and money-saving strategies for grocery shopping, apartment selection, and life with roommates. The text also provides information on working for the federal government to include careers in the military, aerospace industry, and public service. Finally, students will consider the most important elements of life skills for all Americans: civic responsibilities, such as volunteering, registering to vote, jury duty, and draft registration. Students will continue to advance in Drill and Ceremony to the point of being able to command a unit themselves. The last 20% of the course consists of physical fitness activities.

This course is a military course that requires students in the Cadet Corps to wear an Air Force uniform at least once every week. This is a big part of the student’s grade. While in uniform students are required to adhere to certain military grooming standards to include; haircuts, shaving (males), and restrictions on jewelry wear.

JROTC 400

4th Year Cadet

Prerequisites: JROTC 300

The cadets learn to manage the entire corps during their fourth year in the Air Force Junior ROTC program. This hands-on experience affords cadets the opportunity to put theories of previous leadership courses into practice. Planning, organizing, coordinating, directing, controlling, and decision-making will be done by cadets. They will put into practice their communication, decision making, personal-interaction, managerial, and organizational skills. The leadership course provides exposure to the fundamentals of management. The text contains many leadership topics that will benefit students as well as provide them with some of the necessary skills needed to put into practice what they have learned during their time in AFJROTC. This course may also incorporate “Survival” training which is fun, but useful lessons that teach basic survival skills such as fire starting, shelter building, food and water collection, land navigation, and first aid.

This course is a military course that requires students in the Cadet Corps to wear an Air Force uniform at least once every week. This is a big part of the student’s grade. While in uniform students are required to adhere to certain military grooming standards to include; haircuts, shaving (males), and restrictions on jewelry wear.

Health Professions - Career and Technical Education (CTE)

INTRODUCTION TO HEALTH PROFESSIONS

Semester (9)

Prerequisite: None

An Introduction to the Allied Health Science Pathway: this course reviews the evolution and current status of health care delivery, introduces the student to the concepts of human anatomy and physiology, safety and the workplace, health care law and ethics, communication and employability skills with strategies for becoming a successful employee and an emphasis placed on medical terminology. **This course does not meet health credit requirements for graduation.**

DC FUNDAMENTALS OF HEALTH PROFESSIONS

Year (10-11)

Prerequisite: **HEALTH PATHWAY ONLY. Successful completion of the full year counts as a Health graduation requirement.**

This course is for students who are interested in the Health Professions pathway and medical field. This course provides the student initial exposure and acquisition of knowledge, skills, and attitudes associated with a broad range of health-related careers. The student will learn medical terminology, infection control, human anatomy and physiology, and other related skills. This course will assist students in making informed decisions regarding their future academic and occupational interests in the health professions industry. **DUAL CREDIT OPTION - BSU Intro to Health Science and Public Health HLTH 110**

DC MEDICAL TERMINOLOGY

Semester (11-12)

Prerequisite: Successful completion of yearlong (2 credits) Fundamentals of Health Professions course

This course presents a study of medical terminology. Prefixes, suffixes, word roots, combining forms, special endings, plural forms, abbreviations, and symbols are included in the content. All body systems, anatomical reference, pharmacology, and medical specialties will be considered. Emphasis is placed on spelling, definition, usage, and pronunciation. This course is a prerequisite requirement for the EMT, CNA, Adv. Sports Med and Dental Assisting programs. **DUAL CREDIT OPTION - BSU Medical Terminology HLTH 101**

DC SPORTS MEDICINE

Year (11-12)

Prerequisite: Successful completion of yearlong (2 credits) Fundamentals of Health Professions,

Co-req: DC Medical Terminology and DC Anatomy I

Application process may be used for entrance into this course.

This course includes training and education as a student athletic training aide. Students will develop skills and pass competencies used in most athletic training settings. The content includes effective communication, practical experience with CPR, first aid, taping, wrapping, stretching, recognition, prevention and rehabilitation of injuries. Students may be expected to complete a minimum of 30 hours per semester of lab/ clinical experience in addition to class time. **DUAL CREDIT OPTION - BSU Intro to Athletic Injuries KINES 220**

DC ADVANCED SPORTS MEDICINE/REHABILITATION SERVICES

Year (12)

Prerequisite: Successful completion of Sports Medicine, DC Medical Terminology and DC Anatomy I. Instructor approval.

Students **MUST** be able to provide transportation to athletic events. Students will be instructed in daily training room management involving modalities (electrical, hot, and cold application), inventory, games/practice preparation and documentation. Students will demonstrate competencies in taping, wrapping, modality application, proper use of rehabilitation equipment and high school sports medicine clinic management. Students may be expected to complete 50 hours of clinical experience in addition to class time. Students will receive a student athletic training aide course completion certificate at the conclusion of the class. **DUAL CREDIT OPTION - BSU Taping and Wrapping KINES 121**

EMERGENCY MEDICAL TECHNICIAN (EMT)

Year (12), double block

Prerequisite: Successful completion of DC Anatomy I and DC Medical Terminology and co-registered in DC Anatomy II. *DC Biology is highly recommended.* EMT Instructor approval; an application process may be used for entrance into course. BLS CPR for Providers Certificate **required prior to 2nd semester.** Students **MUST** provide reliable transportation for the clinical component of this course.

A course designed to prepare students to become an Emergency Medical Technician. This is a comprehensive course that trains the student to be proficient in Basic Life Support, including patient assessment, airway management, oxygen therapy, splinting, and spinal immobilization. Students also study cardiovascular, respiratory and neurological emergencies, trauma, medical, obstetric and behavioral emergencies, in addition to other course related curriculum. Students will be expected to participate in and provide their own transportation to and from clinical site placements. Clinicals may take place in a hospital, emergency care unit or ambulance service. Upon completion of this course, the student is eligible *and expected* to take the National Registry Exam – which will qualify the student to work as an EMT. Students are required to dress appropriately. Lab shirt and clinical uniform will be the student's responsibility. A student must turn 18 years of age within 12 months of completion of this course to take the National Registry Exam. **National Registry Practical Exam - Required. This is a yearlong course. Entry into 2nd semester is contingent on 75% or above first semester and instructor approval.**

NURSING ASSISTANT (CNA)

Year (12), Double Block Spring Semester

Prerequisite: Successful completion of Fundamentals of Health Professions, DC Medical Terminology and either DC Anatomy I or Anatomy. **BLS CPR Certificate required prior to 2nd semester.**

Students **MUST** provide reliable transportation for the clinical component of this course.

This course is designed to prepare students for beginning employment as nursing assistants in nursing homes, hospitals, and other settings. Content includes medical terminology, basic anatomy and physiology, communication, infection control, growth and development, care of the patient, and assisting as a member of the health care team. Students are required to dress appropriately. Scrubs and clean shoes are the responsibility of students. Reliable transportation is required for clinical experience and adjusted class time to meet the state required 120 hours of instruction and clinical time. Students will be eligible to sit for the National Registry CNA exam to become certified upon completion of all coursework and clinical hours.

This course does not meet district graduation requirements for Health.

PHARMACY TECHNICIAN - OFF CAMPUS THROUGH THE WEST ADA SCHOOL DISTRICT

Year (12)

Prerequisite: Successful completion of Health Professions/Sports Medicine. Medical Terminology is highly recommended. Students **MUST** provide reliable transportation for externship at a local pharmacy.

A course designed to prepare students for beginning employment as a Pharmacy Technician under the supervision of pharmacists in pharmacies, hospitals and other settings. Successful completion of the course qualifies the student to take the Pharmacy Technician Certifying Board certification exam once they graduate from high school. **(Students are responsible for the cost of this exam.)** Content includes pharmaceutical terminology, drug identification, measurement techniques, record keeping, business operations, prescription preparation, logistics and dispensing operations and applicable standards and regulations. In order for students to participate in second semester externship, they must complete the first semester with a grade of "B" or higher. **Students will be responsible for the costs of fingerprinting, background check, and the Idaho State board of pharmacy application fees.**

DENTAL ASSISTING

Year (12), double block

Prerequisite: Successful completion of Fundamentals of Health Professions, Anatomy and Medical Terminology.

BLS CPR Certificate required prior to 2nd semester.

This course will educate senior students in the theory and clinical practice of dental assisting. Although this program is not intended as a substitute for a comprehensive dental assisting college program, it will provide students with the training and experience needed for employment in entry-level dental assisting or dental office administration positions. Students will sit for the NELDA (National Entry Level Dental Assistant exam) In addition, this course will provide foundational knowledge and experience to facilitate the pursuit of other dental specialties, including dental hygiene, dentistry, dental laboratory, dental education or dental sales. Students must have current immunizations, black or gray scrubs, clinic students and \$30 to cover the cost of a lab jacket. A 30 hour externship is required and students must provide their own transportation.

ORIENTATION TO POLICE, FIRE & EMERGENCY SERVICES - OFF CAMPUS THROUGH THE WEST ADA SCHOOL DISTRICT

Semester (10)

Prerequisite: None

Fitness readiness is a requirement of this course. Coursework topics include: Ethics and Professionalism, Introduction to Report Writing, Introduction to Criminal Justice, Introduction to Law Enforcement, Firefighting, Introduction to Emergency Medical Services, First Aid, CPR Training, and the National Incident Management System (NIMS). This program is designed to simulate recruit academies for the Law Enforcement and Fire Service. Students will be held to a professional standard that includes ethical decision making, respect, and self-discipline. During simulated drills, students will learn how to react to stressful situations as if they were on-scene of an incident.

Construction Trades	SFHS	Intro To Vehicle/Construction Trades (1 sem)	Construction Trades 1 (2 sem)	Construction Trades 2 (2 sem)	Capstone: Construction Trades 3 (2 sem)

INTRO TO VEHICLE/CONSTRUCTION TRADES

Sem (9th Only)

Prerequisite: None

A course designed to introduce students to the tools and concepts of the vehicle trade. Key concepts of motor components, compression, bearings, torque, gears, gear ratios etc. will be covered in theory and applied in “hands-on” settings. From rebuilding individual parts to bicycle maintenance, small engines and/or larger engines may be used to build foundational knowledge and skills while students explore careers in the industry. Course will also focus on workplace communication, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

WELDING 1

Year (10-12)

Prerequisite: None

SEM 1: Students will learn general shop safety and mechanical theory. They will develop individual skills as they learn to identify and utilize hand tools and power tools through projects like sharpening a twist drill, wood chisel, cold chisel, and screwdriver. They will build a tool sharpening gauge, use a tap & die set, and complete a plumbing project. Students will also learn to prepare and fit metal for welding. They will learn basic safety and operation for shielded metal arc welding (SMAW), gas metal arc welding (GMAW), and oxy-fuel welding/cutting processes.

Sem 2: Students will learn to prepare and fit metal for welding. They will use SMAW to weld in 1F, 2F, 3F, 4F, 1G, 2G, 3G, 4G positions. They will use GMAW to weld in 1F, 2F, 1G, 2G positions. They will use oxy-fuel to weld in 1G, 2G, 3G, 1F positions, to braze in 1G and 1F positions, and to cut. **Shop safety is emphasized and students are required to provide coveralls and leather shoes.**

WELDING 2

Year (11-12)

Prerequisite: Welding 1 or Intro to Ag Mechanics/Welding

Students will continue to learn to identify and utilize hand and power tools. Students will learn to read and draw technical drawings and welding symbols. They will use Mig (GMAW) to weld in multiple positions. They will learn safety procedures and perform welds using flux core wire feed (FCAW). They will learn safety procedures and weld using Tig welding (GTAW) on carbon steel and aluminum. They will learn advanced oxy-fuel cutting procedures, plasma arc cutting, and air carbon arc cutting. Students will learn welding codes, qualifications, certifications, weld inspection, and weld testing. **Students need to provide their own coveralls and leather shoes. College credit and welding certification available for students who complete the welding pathway.**

AUTOMOTIVE TECHNOLOGY 1

Semester (10-12)

Prerequisite: None

A course designed to introduce students to basic automotive technology, leading to professional certification after students complete Level II and Level III in Automotive. Concepts will be covered in theory and then shown again in applied, “hands-on” settings on training aides or actual vehicles. Course will also focus on workplace communication, technical mathematics in the vehicle industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

AUTOMOTIVE TECHNOLOGY 2

Year (10-12)

Prerequisite: Successful completion of Auto/Diesel 1

Students will gain knowledge of the skills related to maintenance and light repairs in engine systems, automatic transmission/transaxle, manual drivetrain and axles, suspension and steering, brakes, electrical, and heating and air conditioning. The course also focuses on safety, proper tool use, employability, and earning ASE industry certifications. Students will also have the opportunity to apply these skills through “live work” situations involving the community.

CAPSTONE: AUTOMOTIVE TECHNOLOGY 3

Year (11-12)

Prerequisite: Successful completion of Automotive Technology 2

Students will deepen their knowledge and skills in Automatic Transmission/Transaxle, Brakes, Electrical/Electronic Systems, Engine Repair, Engine Performance, Heating and Air Conditioning, Manual DriveTrain and Axles, Suspension and Steering, Maintenance and Light Repair, and the principles of diagnosing. The course focuses on earning ASE industry certifications, safety, proper tool use, and employability. Students will also have the opportunity to apply these skills through specialized work and industry internships.

DIESEL TECHNOLOGY 1

Semester (10-12)

Prerequisite: None

A course designed to introduce students to basic diesel technology, leading to professional certification after students complete Level II and Level III in Diesel. Concepts will be covered in theory and then shown again in applied, “hands-on” settings on training aides or actual vehicles. Course will also focus on workplace communication, technical mathematics in the vehicle industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

DIESEL TECHNOLOGY 2

Year (11-12)

Prerequisite: C or better in Automotive Tech 2 or Instructor/Admin/Student agreement

A course designed to provide students with a deepening understanding of heavy equipment/diesel maintenance in the areas of Diesel Engine Service, Preventative Maintenance, Hydraulic, Electric and Brake Systems. Students will also explore career opportunities in the transportation related fields. Course will continue to focus on workplace communication, technical mathematics in the vehicle industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

CAPSTONE: DIESEL TECHNOLOGY 3

Year (11-12)

Prerequisite: C or better in Diesel Tech 2 or Instructor/Admin/Student agreement

A course designed to provide students with teamwork, critical thinking, problem solving, diagnostics, and repairing to industry standards. Students are provided advanced level instruction according to industry standards. **Emphasis on work site skills is expected at this level with the majority of the students participating in off campus work experiences.** Course will continue to focus on workplace communication, technical mathematics in the vehicle industry, safety and interpersonal skills. Students encouraged to participate in SkillsUSA activities to expand and deepen their experiences

CONSTRUCTION TRADES 1

Year (10-12)

Prerequisite: None

This course may be a beginning point or a follow-up to Intro to Construction as students explore up to 20 construction trades areas through project based learning activities. Examples include those listed under Intro class plus HVAC, Tile Setting, Plumbing, Weatherization and many others. Students will apply mathematics and document their progress on a daily basis. Course will also focus on workplace communication, technical mathematics in the construction industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

CONSTRUCTION TRADES 2

Year (11-12)

Prerequisite: Construction Trades 1

This course will provide students with larger project based learning activities that take students from initial design through completion of a community or school based project such as building a “tiny house”, park playhouse, remodel for local seniors etc. Short to long term internship opportunities with area construction companies may also be provided depending on the age of the student. Students who wish to pursue an apprenticeship in a construction area for their senior year will complete the course by completing the application process and working on finding an industry partner. Course will also focus on workplace communication, technical mathematics in the construction industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

CAPSTONE: CONSTRUCTION TRADES 3

Year (12)

Prerequisite: Construction Trades 2

A course designed to provide students with the opportunity to specialize in a construction area(s) of interest. Emphasis will be placed on team work, project management, critical thinking, problem solving, diagnostics, and repairing/building to industry standards. Emphasis on work site skills is expected at this level with the majority of the students participating in off campus work experiences. Course will also focus on workplace communication, technical mathematics in the construction industry, safety and interpersonal skills. Students are encouraged to participate in SkillsUSA activities to expand and deepen their experiences.

Work Based Learning - Career and Technical Education (CTE)

INTRO TO WORK BASED LEARNING / CAREER EXPLORATION AND EMPLOYMENT PREPARATION (OT110)

Semester (10)

Prerequisite: None

A foundation course designed to assist students in establishing career and educational direction, and to prepare them for a work-based learning experience suited to their strengths and motivations. Students are required to pass this course before being allowed into WBL field experience.

WORK BASED LEARNING / CAREER EXPLORATION AND EMPLOYMENT PREPARATION

Semester (11-12)

Acceptance based on: Parent/Guardian Permission Form.

A Career Exploration and Employment Preparation experience in the classroom that provides knowledge through Workplace Readiness Skills curriculum. Work-Based Learning will focus on career exploration and employment preparation skills. Students will gain the skills necessary to participate in a successful worksite experience in subsequent Work-Based Learning classes and for the student’s future world of work. Homework assignments will be both online and hardcopy handouts. All curriculum assignments are connected to Workplace Readiness Skills – Employability Skills for Career Readiness. Students will work with the coordinator to set up the following semester’s Work-Based Learning work site. If the Work-Based Learning Coordinator does not have a site connection students are responsible to locate a site or assist in locating a site. Senior Work-Based Learning students will take a Workplace Readiness Skills Assessment as required by the state Career and Technical Education.

Student Leadership

CAST (Connecting All Students Together)

*** Class may be repeated for credit*

Year (9-12)

Prerequisite: Application/Instructor Approval

CAST is a student leadership class that does the following:

- Empower individuals to be servant leaders and compassionate humans by promoting awareness, understanding, and kindness.

- Plan, organize, advertise, prepare, execute, and evaluate school activities.
 - Perfect the skills of teamwork, leadership, organization, and project planning.
 - Actively see and diligently represent the opinions, ideas, and concerns of the KHS student body.
 - Participate in service learning, community activities, and affairs.
 - Provide support for and coordinate the efforts of the clubs and organizations.
 - Establish and maintain positive working relationships with the administration, faculty, parents, community at large, and other schools in and out of the district on behalf of the students we represent.
 - Unify our school (faculty, staff, and student body) into a solid group, working together to better the community.
- Upon acceptance, students may run for student body office, but students do not have to run for office to be in CAST.
