### **Physical Education**

Physical education is a sequential educational program that teaches students to understand and participate in regular physical activity for developing and maintaining physical fitness throughout their lifetimes, understand and improve their motor skills, enjoy using their skills and knowledge to establish a healthy lifestyle, and understand how their bodies work.

Physical activity is bodily movement that is produced by the contraction of skeletal muscle and that substantially increases energy expenditure, including exercise, sport, dance, and other movement forms.

Moderate physical activity is any activity which generally requires sustained, rhythmic movements and refers to a level of effort a healthy individual might expend while exercising. A person should feel some exertion but should be able to carry on a conversation comfortably during the activity.

Vigorous physical activity is any activity which generally requires sustained, rhythmic movements and refers to a level of effort a healthy individual might expend while. Vigorous physical activity may be intense enough to result in a significant increase in heart and respiration rate.
