

Instruction

Use of Technology in Instruction

The Board of Trustees recognizes the instructional use of computers, videotapes, interactive videodisks, distance learning, cable television and other technologies. These technologies may:

- * Give students new ways to access information and practice skills
- * Help teachers meet a wide range of learning styles
- * Enable teachers to move from whole-class instruction to a mixture of small-group and individualized instruction
- * Help students develop reasoning and problem-solving abilities

The Board recognizes that trained teachers are needed to make the best use of the district's technology. Teachers and instructional aides should receive training in using the technologies available to them. All district schools have the opportunity to obtain computers, software and other equipment.

The district's educational software shall be carefully selected and evaluated so as to meet the teachers' and students' needs and conform with district policy and regulations.
