LYNBROOK, NEW YORK 11563

Joseph Martillotti
District Director of Athletics,
Physical Education and Health
(516) 887-0236

The Lynbrook School district is proud to offer its students a wide of range of options for athletic involvement, including opportunities for those students in middle school. We encourage the majority of our students at the middle school level to compete at the modified level, but we also recognize that there are a **select few** exceptional student-athletes with the athletic ability and sport specific skill to play at the junior varsity and varsity level. **This is a coach driven process** propelled by the needs of the varsity team. When a need at the varsity level arises and the role cannot be filled by a junior varsity player, a coach will express this need to the Athletic Director. The Athletic Director and the varsity coach will invite those **select few** student-athletes that they believe can have a major contribution (either start or be one of the first off the bench). In order for a middle school student to compete interscholastically at the high school level, these athletes must pass the Athletic Placement Process (APP) as mandated by the New York State Public High School Athletic Association. It is very important to note that successful completion of the Athletic Placement Process simply allows the student-athlete to try out for the high school team and does not guarantee him/her a spot on the final roster.

The Athletic Placement Process utilizes the President's Physical Fitness Test, and student-athletes will need to meet the 85th percentile level for their age in 4 out of 5 test components. This fitness test is designed to assess speed, agility, flexibility, upper body strength, and aerobic conditioning.

Parents/guardians are cautioned that even though their child may be physically ready, it does not mean that he/she will be emotionally or socially ready to handle the stress of high school competition or the social interaction with older athletes. Although coaches in the Lynbrook Public Schools place a high priority on assimilating all students into the team structure, this does not necessarily mean younger student-athletes are comfortable in this environment. If you or the child has any reservations about competing at the high school level, then it is highly recommended that this child remain at the modified level.

The purpose of this statewide program is to determine the level of physical fitness students have when compared to those older athletes your son/daughter will be competing against at the high school level. If your child is seeking to be a member of a junior varsity or varsity high school team, he/she will need to complete every one of the steps outlined below. Please note, this program is designed for the exceptional athlete, the specific talent and conditioning level required will be well above the level of average athletes of a similar age.

The following steps must be completed in order for a middle school student to try out at the high school level:

1. **Sport Skill Evaluation:** The Varsity coach for that particular sport will need to complete an evaluation of the student-athlete.
2. **Administrative Approval:** The Athletic Director will assess the physical, emotional, social, and academic readiness of the student-athlete. Emphasis will be placed on the impact the increased demands of participation in high school sports will place on the student's academic performance as well as the likelihood that he/she will be a starter or be a big contributor to the contest.
3. **Parent/Guardian Permission:** All students who are to be evaluated must first obtain written parent/guardian permission.

4. **Sports Clearance:** A completed Interval Health History form and a current Physical Exam must be submitted to the Nurses Office as well as their approval to participate in sports for the upcoming season.
5. **Medical Clearance:** The nurses office, in conjunction with the district medical director, will determine the student-athlete's physical maturity level and if it is appropriate for the student to compete at a higher level. The nurse's office will compare the physical size of the student in relation to that of the students against whom the student will compete as well as the Tanner Scale when making this decision.
6. **Physical Fitness Testing:** The student-athlete will need to meet the 85th percentile level for their age in 4 out of 5 test components of the President's Physical Fitness Test.
7. **Qualification Determination:** The results of the three evaluations (medical, sport skill, and physical fitness) will be evaluated by the Athletic Director for final approval. Only students who have successfully completed all aspects of the Athletic Placement Process will be allowed to participate in high school tryouts.

Further information about the Athletic Placement Process can be found here:
