| <b>Course Description</b>          | App Creators introduces students to the field of computer science and the concepts of computational thinking, through the creation of mobile apps. Students are challenged to be creative and innovative, as they collaboratively design and develop mobile solutions to engaging authentic problems. Students experience the positive impact of the application of computer science to society as well as other disciplines, particularly biomedical science.<br>Additional information about this course may be found on the Alabama Department of Education website at <a href="https://alex.state.al.us/standardAll.php?grade=7&amp;subject=DLIT&amp;summary=2">https://alex.state.al.us/standardAll.php?grade=7&amp;subject=DLIT&amp;summary=2</a>  |
| <b>Course Prerequisites</b>        | Successful completion of PLTW Computer Science for Innovators & Makers (CSIM)  |
| <b>Course Objectives</b>           | <i>Apply computational thinking to solve problems. Recognize that computational thinking can be applied in multiple disciplines. Choose appropriate computational practices when solving a problem. Analyze and create algorithms. Analyze the structure and functionality of a program. Create programs by developing and testing code in a modular, incremental approach. Adapt or improve existing code. Describe the hardware components of an electronic device and how they interact with software and the environment. Analyze the implications of computing in society. Consider accessibility and equity when designing products, creating solutions, and collaborating with others. Describe the role, connections between disciplines, and impact of engineering and computer science on society.</i> |
| <b>Course Goals</b>                | <b>Students Will:</b> <ol style="list-style-type: none"><li>1. Be able to follow the engineering design process</li><li>2. Learn and use standard safety practices</li><li>3. Create algorithms and document the planning process for code</li><li>4. Demonstrate proper Troubleshooting and Code Tracing techniques</li><li>5. Design projects that meet consumer needs in today's world</li><li>6. Create code and download program/apps to a tablet.</li><li>7. Type 35+ words per minute using proper typing techniques.</li></ol>   |

|   |  |
|---|--|
| <p><b>Instructional Delivery Plan, Course Outline &amp; Culminating Project</b></p> | <p><b>Unit 1: LET’S CREATE AN APP</b> <i>Students are introduced to the concept of pair programming, app development, and the MIT App Inventor development tool. They learn about the Model-View-Controller (MVC) design pattern, app graphical design, event-driven programming, debugging, and algorithm creation using variables and conditional logic. They create engaging biomedical science apps and fun interactive games that apply these concepts and use basic user interface features, media, and animation.</i></p> <p><b>Unit 2: GAME DESIGN</b> <i>In Lesson 2, students further explore the concepts they investigated in Lesson 1 and build upon their skills to use, modify, and create games in mobile applications. They are introduced to game design with the user experience in mind. They explore how to use procedures and loops when writing code to reduce redundancy. They analyze static and dynamic lists, and then iterate on an existing app to update the game play. Students apply what they learn about coding and game design to improve an existing game.</i></p> <p><b>Unit 3: THE APP CHALLENGE</b> <i>Students apply all of the knowledge and skills they have acquired to design and create a mobile app solution for a personal or community problem. They apply the design process and computational thinking skills to decompose the problem into smaller modules. Following user-centered design principles, they design and create an appropriate user interface and program the app to produce the desired behavior.</i></p>  |
| <p><b>Credentialing</b></p>   | <p>None</p>  |
| <p><b>CTSO Integration (DMS Career Technical Student Organization is TSA)</b></p>   | <p>Technology Student Association, TSA, is a <b>career technical student organization</b> and a fundamental part of this course. It is a national career and technical student organization of students engaged in science, technology, engineering, and mathematics (STEM). TSA is integrated into the program which includes competitions and leadership opportunities. TSA provides students with activities during their class time and after school with our local TSA Chapter. <i>TSA Based Activities relevant to CSIM include but are not limited to: Lab Safety Posters, Coding Challenges, Career Prep, Cyber Security, Essays on Technology, Challenging Tech Issues.</i></p>   |
| <p><b>Embedded Numeracy</b></p>   | <ul style="list-style-type: none"> <li>● Make sense of problems and persevere in solving them. These students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. These students consider analogous problems and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary.</li> <li>● Use appropriate tools strategically. Mathematically proficient students consider available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and the tools’ limitations.</li> <li>● Attend to precision. These students try to communicate mathematical ideas and concepts precisely. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. Mathematically proficient students are careful about specifying units of measure and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, and express numerical answers with a degree of precision appropriate for the problem context.</li> <li>● Solve multi-step real-world and mathematical problems involving rational numbers (integers, signed fractions and decimals), converting between forms as needed. Assess the reasonableness of answers using mental computation and estimation strategies.</li> <li>● Solve real-world and mathematical problems involving area, volume, and surface area of two- and three dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right rectangular prisms.</li> </ul> |

|  |   |
|--|---|
| <p><b>Embedded Literacy</b></p>                                  | <ul style="list-style-type: none"> <li>• R1. Utilize active listening skills during discussion and conversation in pairs, small groups, or whole-class settings, following agreed-upon rules for participation.</li> <li>• R3. Use digital and electronic tools appropriately, safely, and ethically when researching and writing, both individually and collaboratively.</li> <li>• Expression: 7. Produce clear, coherent narrative, argument, and informative/explanatory writing in which the development, organization, style, and tone are relevant to task, purpose, and audience, using an appropriate command of language.</li> <li>• b. Write informative or explanatory texts with an organized structure and a formal style, incorporating a focused point of view, a clear purpose, credible evidence, and technical word meanings.</li> <li>• 29. Use academic vocabulary in writing to communicate effectively.</li> </ul> |
| <p><b>CTE Lab Safety Guidelines</b></p>                          | <p>Each student in a CTE/PLTW course will be required to complete a lab safety exam and score 100% correct before being allowed to use any tools on projects. We expect students to responsibly and safely use the CTE equipment.</p>   |
| <p><b>Classroom Expectations</b></p>                             | <ol style="list-style-type: none"> <li>1. Be seated and ready for class when the bell rings. <i>Detention for tardies will be assigned per DMS policy.</i></li> <li>2. Come prepared for class.</li> <li>3. Respect your teacher, your classmates, and yourself.</li> <li>4. Listen and follow directions.</li> <li>5. If it's not yours, don't touch it. Keep your hands and feet to yourself.</li> <li>6. Follow all school rules.</li> <li>7. The teacher dismisses the class, not the bell.</li> <li>8. No food or drink around the computers and equipment</li> <li>9. Do not visit gaming websites during class. Remain on our curriculum websites at all times.</li> </ol>   |
| <p><b>Progressive Discipline</b><br/><i>(DMS Policy)</i></p>     | <p><b>Step 1:</b> Verbal warning<br/> <b>Step 2:</b> Student/teacher conference<br/> <b>Step 3:</b> Parent contact<br/> <b>Step 4:</b> Referral to school administration<br/> <a href="#">W</a> Discovery Middle Classroom Management Plan .docx</p>  |
| <p><b>Grading Policy &amp; Scale</b><br/><i>(MCS Policy)</i></p> | <p><b>60%</b> = Assessments (Tests, Mini-Assessment, Projects)<br/> <b>40%</b> = Daily Grades (Homework, Classwork, and Participation)<br/> <b>Grade Scale:</b> 90-100 = A; 80-89 = B; 70-79 = C; 65-69 = D; &lt; 64 = F</p>  |
| <p><b>Late Work Policy</b></p>                                   | <p>For work turned in late, the following policy will apply:</p> <ul style="list-style-type: none"> <li>• The assignment will drop one LETTER grade for each school day that passes. For example, if an assignment is turned in one school day late, the highest a student can receive is 89%; two days late, 79%, etc.</li> </ul> <p>1 day late = maximum credit 89%<br/> 2 days late = maximum credit 79%<br/> 3 days late = maximum credit 69%<br/> 4 days late = maximum credit 59%<br/> 5-10 days late = maximum credit 50%</p> <ul style="list-style-type: none"> <li>• Half credit is always better than no credit! Until work has been made up, “Missing” (which counts as a zero) will be put in the grade book. This will be updated once work is completed and turned in.</li> </ul>   |
| <p><b>Make-up Work/Test Policy</b></p>                           | <p>Students with excused absences will be allowed to make-up all work within three days of returning to school. It is the student’s responsibility to look in Schoology for assignments.. Students can confer with a classmate or ask the teacher for help. Work that is not made up will become a zero (including tests).</p>  |
| <p><b>Technology Policy</b></p>                                  | <p>Student laptops should not be hard-wired to the network or have print capabilities. Use of discs, flash drives, jump drives, or other USB devices will not be allowed on Madison City computers. Neither the teacher, nor the school is responsible for broken, stolen, or lost laptops. Laptops and other electronic devices will be used at the individual discretion of the teacher.</p>  |
| <p><b>Accommodations</b></p>                                     | <p>Requests for accommodations for this course or any school event are welcomed from students and parents.</p>  |

|                                 |  |
|---------------------------------|--|
| <b>Materials &amp; Supplies</b> | School issued Chromebook   |
| <b>Homework</b>                 | All assignments and projects will be completed during class time.  |
| <b>Assignments</b>              | <i>All Student assignments will be posted in Schoology; however, all grades will be posted in PowerSchool.</i> |
