

Secondary Technology Integration 3-Year Plan

MCS 1:1 Initiative Objective: MCS will empower educators and students with transformative digital experiences to promote creativity, communication, collaboration and critical thinking as we build a stronger Global Learning Community.

Secondary Goal: By 2025, all teachers will be able to utilize and incorporate content-specific digital tools and lessons with their students supported by Madison City Schools' Technology Integration frameworks and professional development opportunities.

Year 1 Foundation and Creation	Year 2 Amplify and Experiment	Year 3 Transform and Redefine
<ul style="list-style-type: none"> ● Establish device expectations for students and teachers ● Identify and communicate instructional technology integration framework ● Establish ongoing, relevant, embedded professional development ● Unpack DLCS standards and implement lessons by content areas ● Train administrators and instructional leaders on effective technology usage and expectations 	<ul style="list-style-type: none"> ● Instructional technology support in each secondary school ● Establish student leaders in technology ● Maintain embedded PD, moving to amplification of lessons ● Create more lessons for DLCS ● Develop and implement teacher reflection and personal evaluation 	<ul style="list-style-type: none"> ● Develop district repository of lessons for variety of content areas and integration strategies ● Maintain embedded PD, moving to transformative teaching with technology ● Evaluate DLCS through assessments and modify lessons ● Evaluate current resources and platforms in MCS for technology integration
