

Teacher Leaders in Mineola

October 2021

Team work makes the dream work!

“Find communities and build teams of people who can take up this work. We can’t do it alone. No individual alone can transform our schools into places where all children get what they need every day.”

“Teams have great potential for solving hard problems in challenging contexts. They bring together more skills, knowledge, and experience to work than any single individual can. They can integrate members’ diverse contributions into a creative problem that is what is needed. The challenge is to identify what it takes for teams to maximize their potential.”

A deep blue night sky filled with numerous bright stars of varying colors (white, yellow, blue). A faint grid of white lines is overlaid on the sky. In the background, there are wispy, glowing nebulae in shades of blue and white. The text is centered in the upper half of the image.

The stars we are
given.

The constellations
we create.
