

## **CREDITS FOR EIGHTH GRADE STUDENTS**

### **J-46**

It is the policy of the Mountain Brook Schools that a subject area and a Carnegie Unit toward graduation requirements are awarded to students in the eighth grade for the following courses:

Geometry  
Computer Applications  
Level I of any Foreign Language

Credit will be awarded and the course and grade appear on the student's transcript in addition to being calculated into the student's cumulative grade point average. If the student re-enrolls in the same course (geometry, computer applications or any level I of a foreign language) upon entering the 9<sup>th</sup> grade, credit for 8<sup>th</sup> grade is not awarded and the course does not appear on the high school transcript. The credit will be awarded in the 9<sup>th</sup> grade for that course.

Credit for the same level course in two different foreign languages will not count toward the graduation requirements for an Advanced Academic or Advanced Academic with Honors diploma, but they may count as general elective credits.
