

PUBLIC INFORMATION PROGRAM

The Northeastern Clinton Central School District recognizes that an informed public is vital to the success and support of a quality education program. Therefore, the Board of Education, comprised of duly elected citizens, accepts its responsibility to provide the public with reports on those activities it is required to perform and on all matters concerning or having an effect on parents, students, staff, or members of the community.

In order to carry out the foregoing responsibility, the Board establishes the following guidelines:

1. The Board shall provide adequate means to convey information that is accurate, factual, and complete. Such means may include a periodic newsletter, a calendar of events, special bulletins, use of the media, or any other effective method of keeping the community abreast of the district's activities.
2. The Board shall use all reasonable means to ascertain public attitudes about all phases of its operation in the planning of policies and procedures. Additionally, the Board shall invite constructive suggestions and criticisms from members of the community regarding the operation of the Board in fulfilling any of its duties.
3. Every employee of the district shall have a role in the improvement of communication between the schools and the public.
