

# Getting Started with Classroom 2.0

A teacher's guide to the Classroom app for iPad

## Introducing Classroom 2.0

Classroom is a powerful iPad app that helps you guide learning, share work, and manage student devices. It supports both shared and one-to-one environments.

You can launch a specific app, website, or textbook page on any device in the class, share documents between teacher and students, or share student work on a TV, monitor, or projector using Apple TV. You can even see which apps students are working in, mute student devices, assign a specific Shared iPad for each student, and reset a student's password.

This guide will take you through an overview of Classroom. You'll learn how to

get started using the app, and discover creative ways to integrate it into daily classroom workflows.

## Before you get started

Classroom is available in the App Store and is easy to set up. You can now create classes manually and have students join a class from their device.

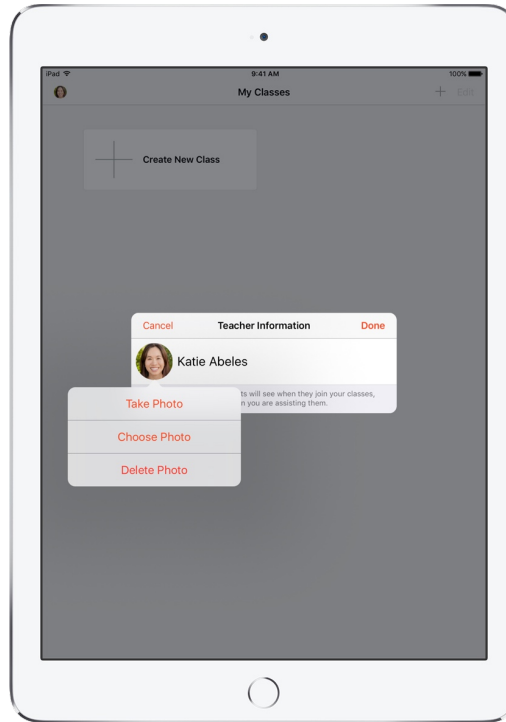

# Create your class.

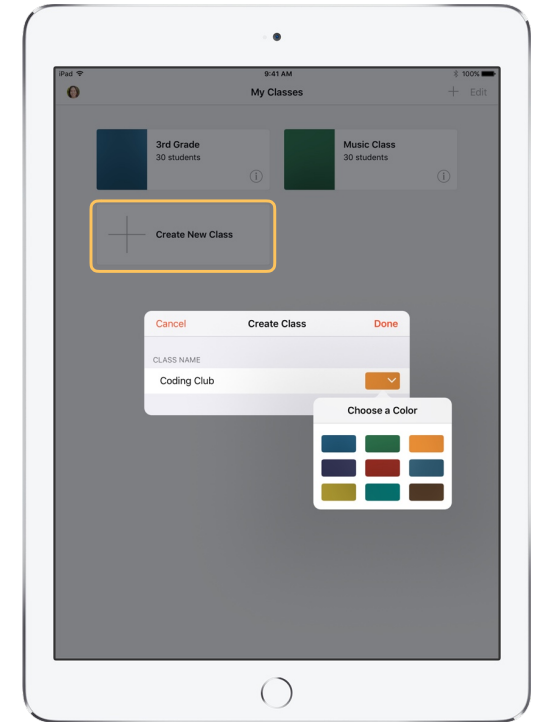

With Classroom 2.0, you can now set up your own classes manually.

After you have downloaded the app to your iPad, begin by launching Classroom.

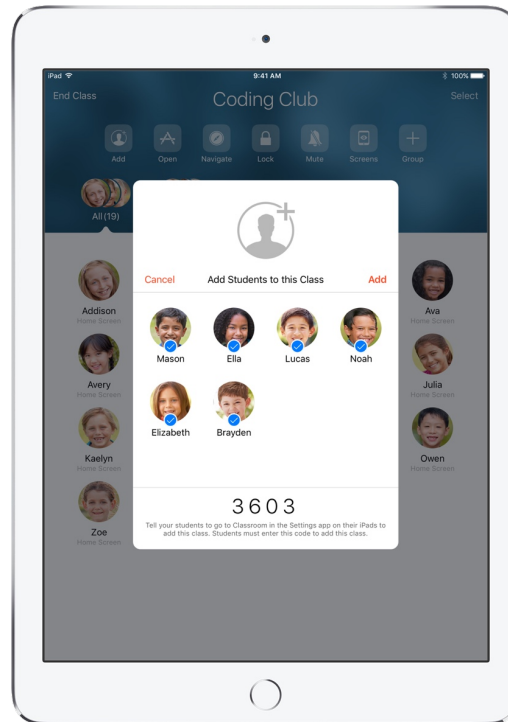

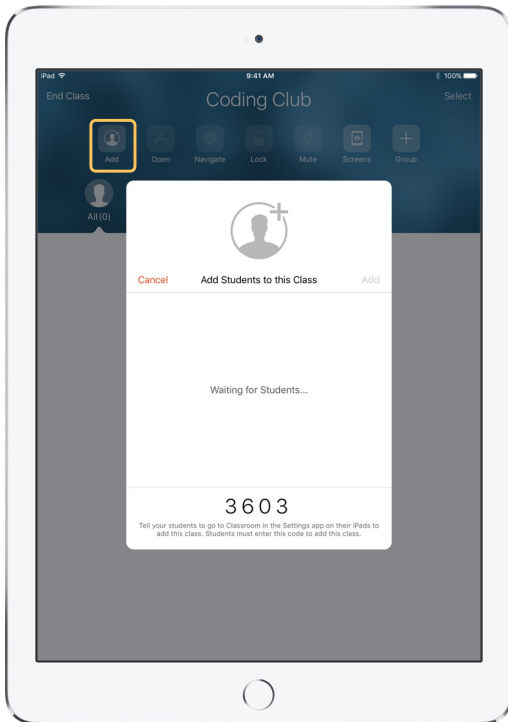

Next, enter your name and add a photo that students will see when they join your class, share files with you, and when you are assisting them.

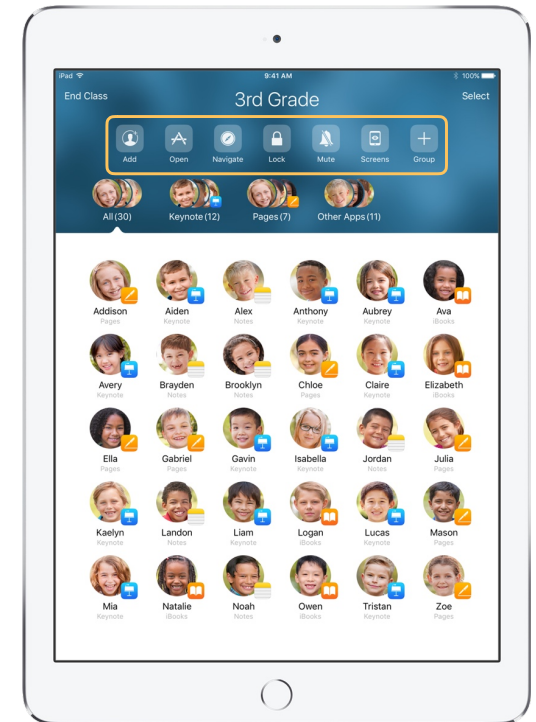

It's easy to rearrange classes, switch from one class to the next, and set up additional classes. Select Create New Class, then name your class and choose a color to represent it. Alternatively, classes can be set up by your school's MDM (see page 6 for more info).

# Invite your students.

Invite students to join your class so everyone can get started right away.

As students join your class, you will see their names and photos appear. Tap Add to add them to your class.

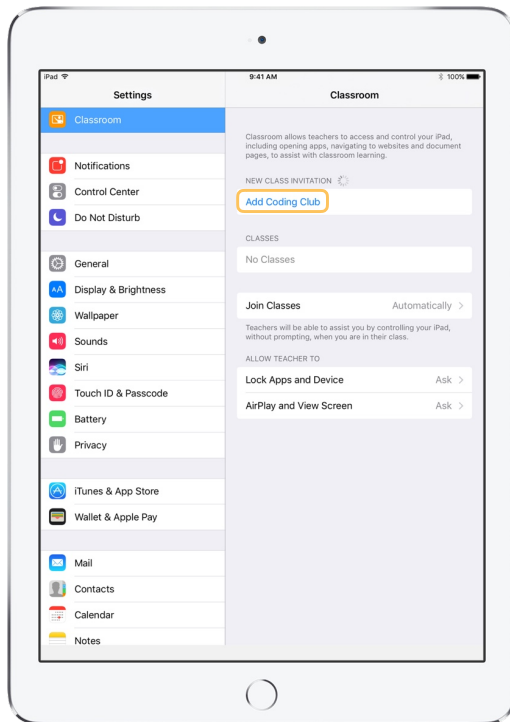

Once inside the class, you'll see a list of your students as well as the Actions list, which contains actions that you can perform on devices in the classroom.

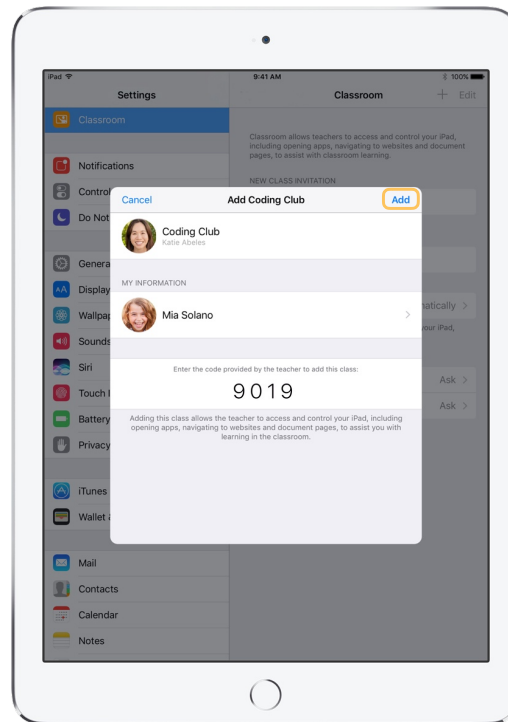

# Have students join a class.

When joining your class, students decide how you can manage and access their iPad — instruct them to use the settings that are most appropriate in your environment.

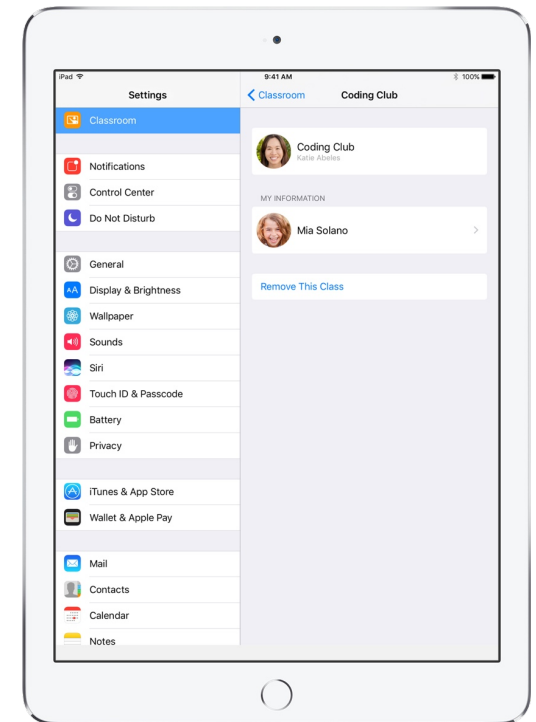

Student View

Student View

Student View

Once you have sent your class invitation, settings for Classroom will appear in the Settings app on each student's iPad. Ask your students to tap the link for your new class invitation.

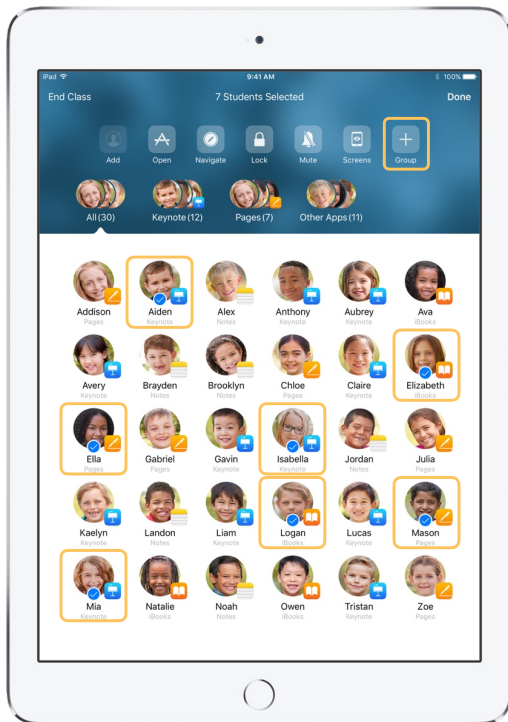

Students can come back to these settings at any time to change how the Classroom app can control their iPad.

Students can tap My Information to edit their name and photo, and then add the class by entering the code you provided.

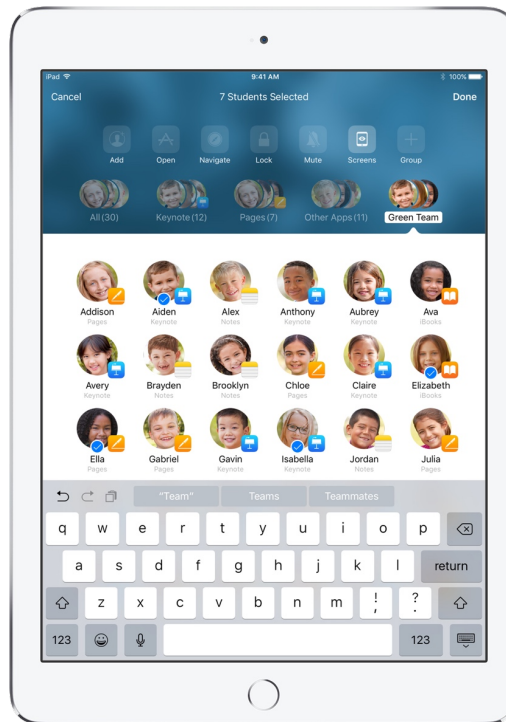

Students will join your class automatically every time they return to your classroom. At the end of the course or school year, they can remove the class.

# Organize your class.

Classroom lets you create custom groups within your class, so you can tailor guidance for a single student, a group of students, or the entire class. You can break the class into groups based on project assignment, and guide each group's experience differently.

Select the students to be placed in a group, then tap Group in the Actions list.

Name the group based on project, skill level, or other categories as appropriate.

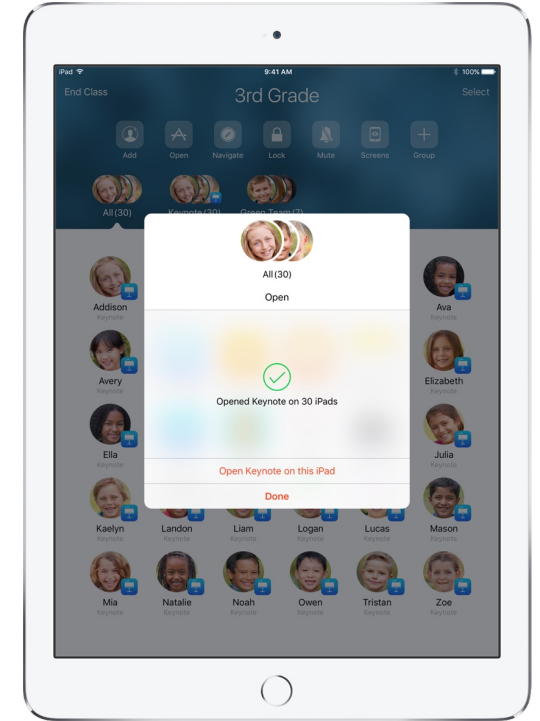

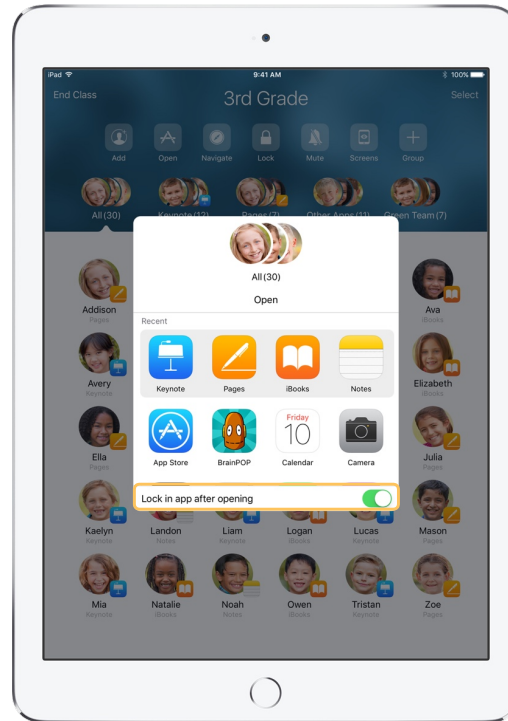

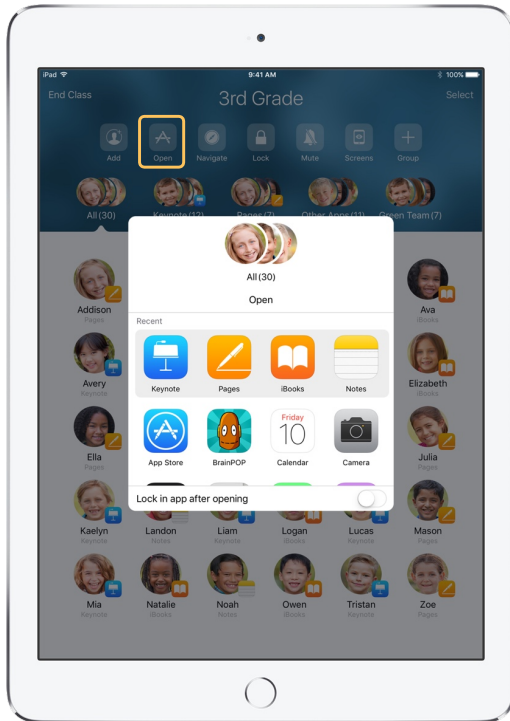

The group is now visible in the group list.

Classroom also creates dynamic groups of students based on which app each student is using.

# Launch and lock apps.

Launch a specific app on each student's iPad at the same time. You can also lock iPad into a single app, so students stay focused on the subject or test at hand.

Tap Open to view the list of available apps, then select the app that you would like to open.

Note that you and your students must both have the app installed for this to work.

If you would like to lock your students into the app, select "Lock in app after opening" in the lower right.

The app now opens on every student's iPad.

Tap Done, or follow along by opening the app on your iPad.

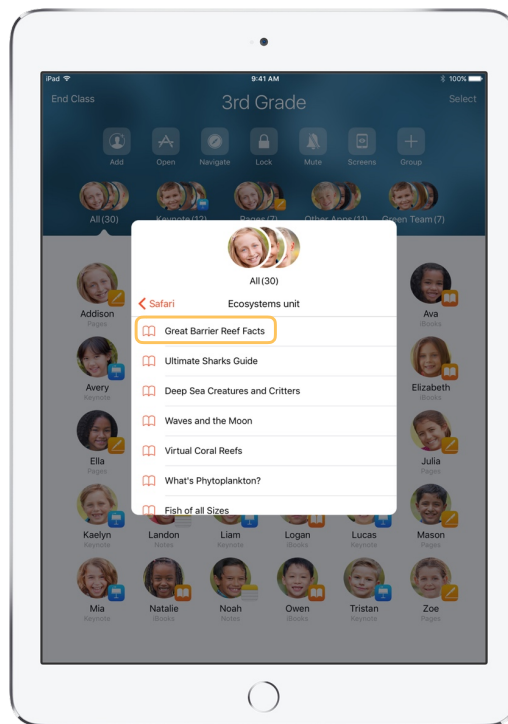

# Navigate to specific content.

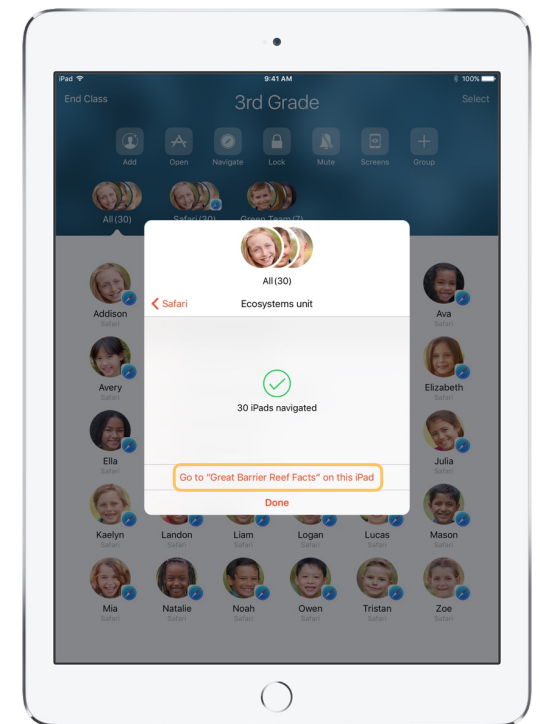

Classroom lets you navigate students to resources within iBooks, iTunes U, and Safari, such as a specific web page using a bookmark, posts and materials in iTunes U courses, or a chapter in a book.

Tap Navigate, then select Safari from the list of options.

Select the bookmark that you'd like the class to view.

The entire class has now been navigated to that bookmark in Safari.

Tap Done, or follow along by opening the web link on your iPad.

# Share documents.

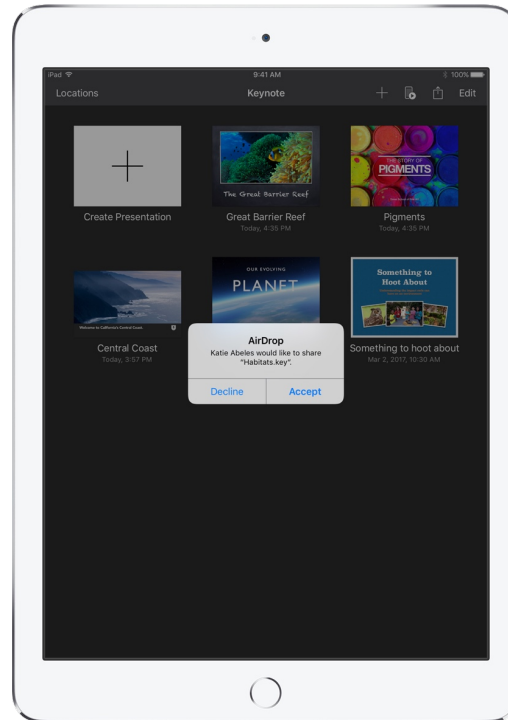

Classroom 2.0 provides an easy way to share files with your students, such as worksheets, presentations, or photos and videos.

Student View

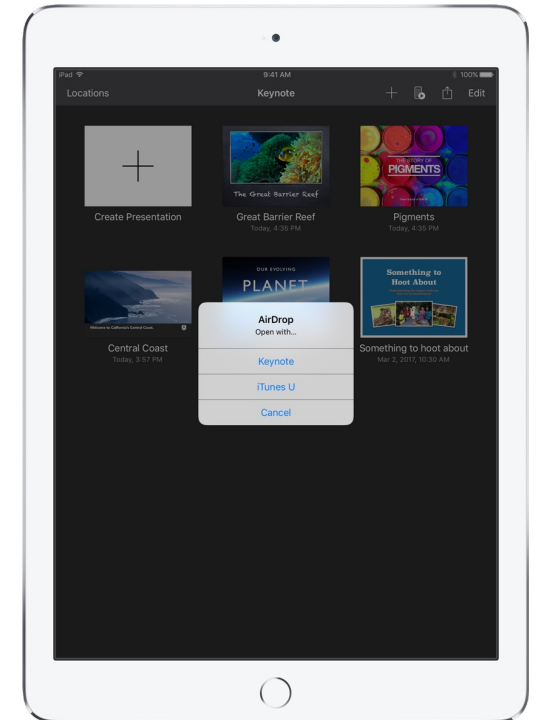

Use the Share Sheet in any app to send documents to groups or to all your students. Select All or select the group you want to share to.

Student View

Instruct your students to accept the document you are sharing.

Student View

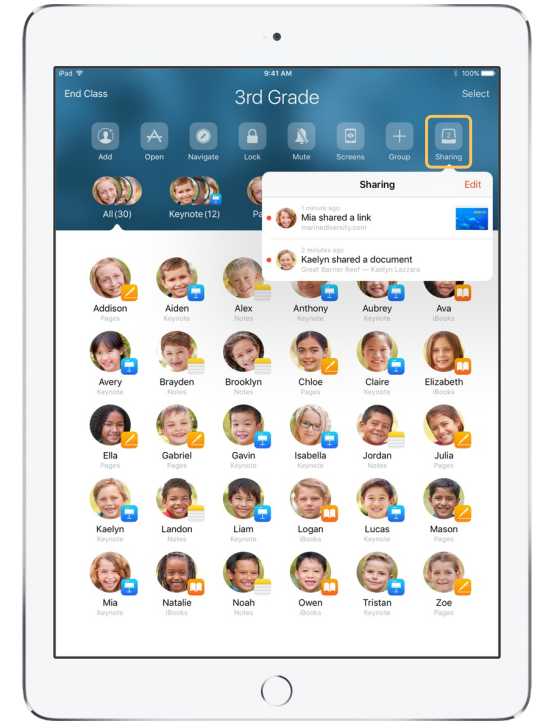

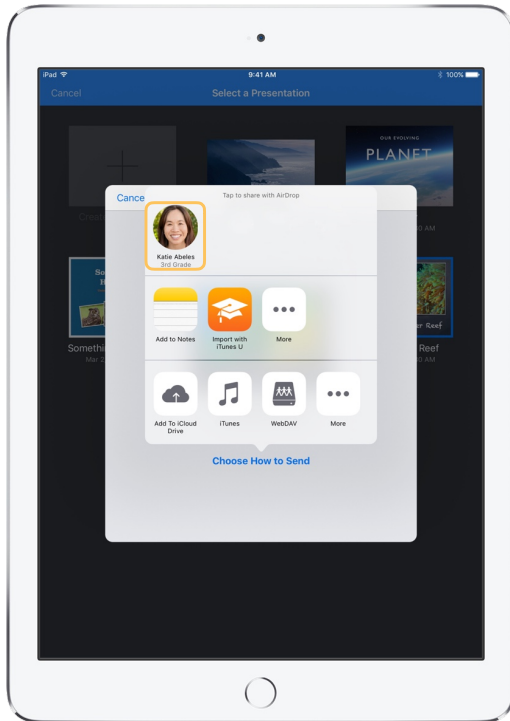

Students can then select the appropriate app to open and save your shared document. The document will be saved on each student's iPad.

# Receive documents.

The Classroom app allows you to see documents and links that students share with you.

Student View

Students can tap your name in the Share Sheet in any app to share documents and links with you directly.

Tap on the notification to open the Classroom app and review the shared documents.

Tap Sharing to see a list of all shared items, then select the item you want to review to open it in the appropriate app.

Shared documents will be saved on your iPad once you open them.

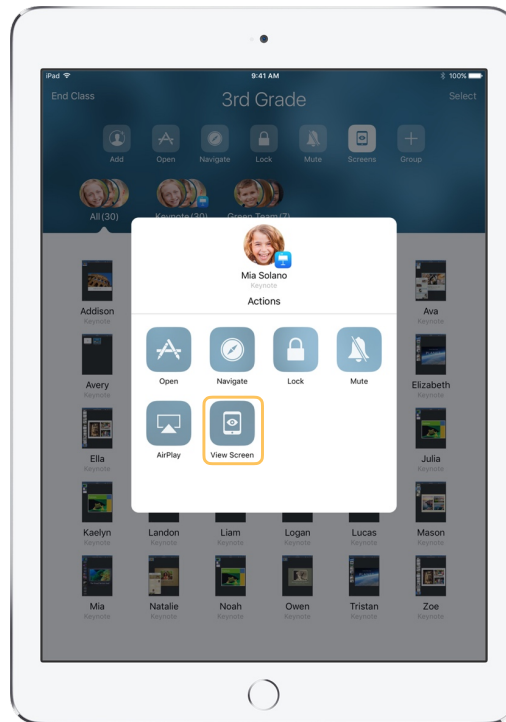

# See what your students see with Screen View.

View any student's screen directly on your device. Check in and see how students are progressing through an assignment or quiz.

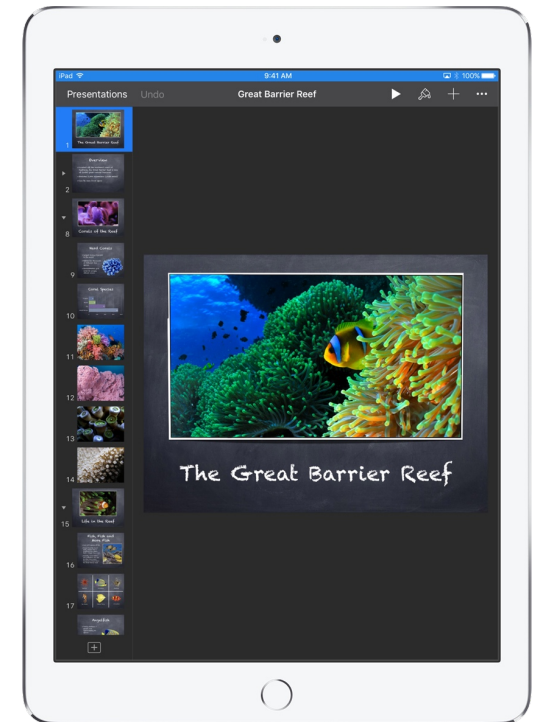

## Student View

Tap Screens to view each student's screen.  
This feature can be disabled if needed.

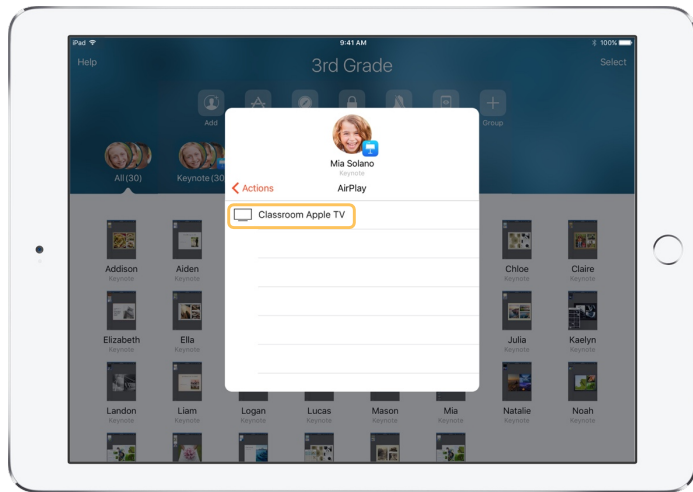

To view a specific student's screen, select the student and tap View Screen.

Students will know that you are monitoring their screen when they see the status bar turn blue.

# Share student work on the big screen.

If your classroom has Apple TV, you can mirror any student's screen to your TV monitor or projector. It's a great way to highlight student work, encourage collaboration, and keep everyone involved.

In the Actions list, select AirPlay to project a student's screen using Apple TV. Then select the appropriate Apple TV from the list.

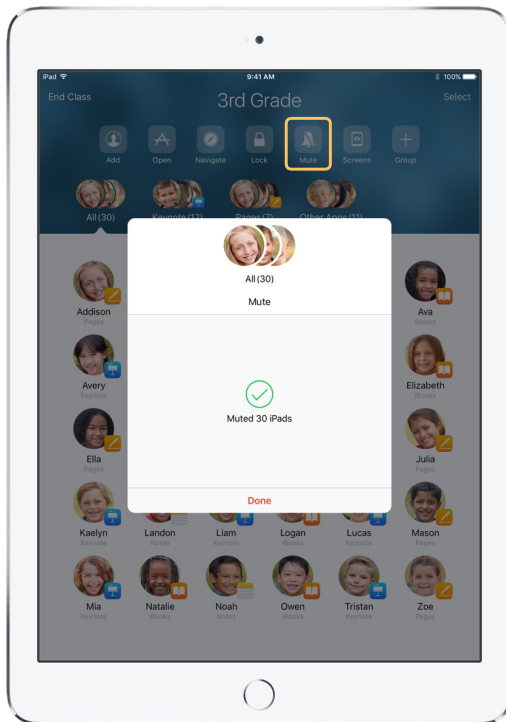

Student View

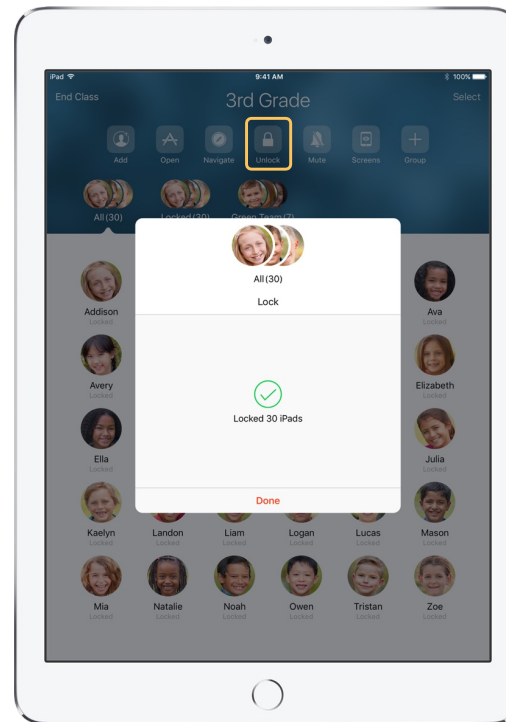

The student's screen will be displayed on the Apple TV that you selected.

## Mute the sound and lock the screen.

If the sound on a student's iPad becomes distracting for the rest of the class, you can mute individual or all devices. To get everyone's attention, you can also lock each iPad in your class, which might be helpful during an important announcement or activity.

Select a student, a group of students, or your entire class, then tap Mute to mute the sound. The sound will be muted on student devices.

To lock devices, select a student, a group of students, or your entire class, then tap Lock. Tap Unlock to unlock devices.

### Student View

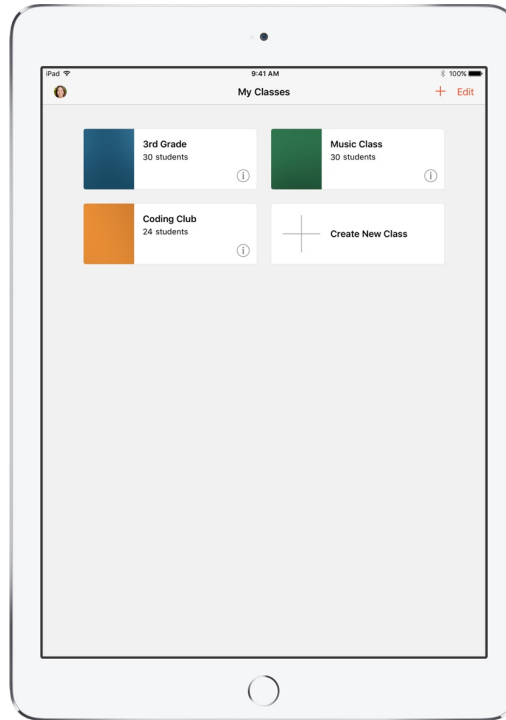

The screen will be locked on all student devices, and students will not be able to access them until the devices are unlocked again.

# End class.

When class ends, you can easily stop controlling student devices and return each iPad to normal use.

Tap End Class.

Classroom app returns to My Classes and you can no longer access student devices.
