ACCELERATION PROCEDURES

Oneonta City Schools adopts the following procedure for the referral, evaluation, and implementation of academic acceleration.

Rationale

The Oneonta City Schools System believes in the philosophy of assisting all students in developing their academic potential. Where potential is concerned, equality resides in providing equally well for the various levels of individual differences. Some of the most cost effective and underutilized interventions to meet the academic needs of high-end learners are the various academic acceleration options such as differentiation, subject acceleration, and grade acceleration. A recent publication entitled, *A Nation Deceived*, is a compilation of fifty years of research on the effects of acceleration. The authors found that when the decision to accelerate was made based on multiple criteria and was data driven, there were great benefits both academically and socially for high-end learners (Colangelo, Assouline, & Gross, eds., 2004). The *Alabama Exceptional Child Education Act* (Act 106) mandates that, “....the State of Alabama and the school district associated therewith shall provide not less than twelve years of appropriate instruction and related services for such exceptional children at public expense ...” and for gifted students that includes the right to progress through course of study objectives at a pace commensurate with their abilities. *The Alabama Administrative Code* lists acceleration as an appropriate service delivery option on page 573.

General Guidelines: Referral for Subject or Grade Acceleration:

- 1) Any student enrolled in the district may be referred for consideration for acceleration by a general education teacher, administrator, gifted specialist, guidance counselor, or parent/guardian.
- 2) The district will follow the written procedures outlined below for any student referred beginning with Level I, which includes differentiation at the current grade level. If at all possible, a student will be subject accelerated (Level II) for a grading period before grade acceleration (Level III) is considered (in most instances subject acceleration coupled with differentiation will be successful in meeting the academic needs of high-end learners). The committee may proceed directly to Level III if the curriculum and instruction has already been differentiated or the committee simply feels that they have enough documentation to consider grade acceleration.
- 3) Principals must ensure that all staff members are aware of the procedures including referral, evaluation, and acceleration options.
- 4) The process of considering acceleration options will take place in a timely and logical fashion. For instance, if subject or grade acceleration is going to be implemented, the best time for the student to make this move is either at the start of school or the beginning of the second semester. Consequently, the process of gathering the necessary information and subsequent committee meetings will be conducted with these dates in mind.
- 5) The referral process for subject/grade acceleration will begin at the school site.
- 6) The principal or special education/gifted coordinator will establish a committee to determine the most appropriate learning environment for the student.
- 7) The committee will include a gifted specialist, the current general education teacher, and at least one other individual. Other appropriate possibilities would be the student’s parent(s), a counselor,

a school and/or central office administrator, a psychometrist, or another teacher in the building who has a proven track record of working with high-ability students. If the school administrator is not on the committee s/he should be kept informed of the committee's recommendations.

Level I : Differentiation Procedures

- 1) The committee will be charged with conducting a fair and thorough evaluation of the student's educational needs.
- 2) The committee will consider the areas of concern (math, reading, etc.) utilizing pre-existing information such as: (1) achievement test results; (2) grades; (3) work samples/products; and (4) aptitude.
- 3) Based on an analysis of the data collected, the committee will provide the general education teacher with differentiation options/strategies (both individual and grouping strategies) to modify the curriculum and instruction in the present grade placement.
- 4) If the differentiation strategies are successful in meeting the student's academic needs, the student will remain in his/her present placement. The committee (including a teacher from the next grade level) will reconvene at the end of the year to develop a differentiation plan for the upcoming school year. The principal will consider the differentiation needs and ensure that the student is assigned to an appropriate teacher. This teacher will be knowledgeable of gifted learners, trained in differentiation, and demonstrate a willingness to address the needs of diverse learners. (Appropriate professional development will be provided if needed.)
- 5) The committee will waive steps 3 and 4 if the student's curriculum and instruction has already been differentiated or the committee simply feels that they have enough documentation to consider subject acceleration.

Level II: Subject Acceleration Procedures

- 1) If the differentiation strategies are implemented (for a reasonable time such as a grading period) and the student's academic needs are still not being met, the committee will reconvene to consider if subject acceleration is appropriate. The possible receiving teacher (in the next grade level) should be added to the committee at this time.
- 2) Parent permission will be documented on a referral form if one has not already been completed. After parent permission has been obtained any additional individual assessments (particularly subject specific) will be conducted if needed. If the student has never been referred for gifted services, a gifted referral will also be initiated.
- 3) If after considering all collected data and information the committee decides that subject acceleration is appropriate, a consideration of the student's desire for accelerated placement will be considered and parents will be notified and permission obtained. If the student or his/her parents are not in favor of the decision the student will not be subject accelerated.
- 4) The committee will reconvene after a grading period to determine if the student's academic needs are being met. If the student's academic needs are being met the plan will remain in place until the end of the year when the committee will reconvene to develop a plan for the next school year. The principal will consider the differentiation needs and ensure that the student is assigned to an appropriate teacher. This teacher will be knowledgeable of gifted learners, trained in differentiation, and demonstrate a willingness to address the needs of diverse learners. (Appropriate professional development will be provided if needed.)

Level III: Grade Acceleration Procedures

- 1) If the committee determines that subject acceleration has not adequately met the student's academic needs and grade acceleration should be considered, the committee will invite a central office staff member (special education coordinator, gifted supervisor, psychometrist, Director of Instruction, etc.) to participate. This individual will ensure that the appropriate steps have been followed.
- 2) Students being considered for whole grade acceleration will be evaluated using an acceleration assessment process (such as the Iowa Acceleration Scales) approved by the Alabama State Department of Education. The acceleration process should include a review of: (1) all previously collected information listed above (aptitude and achievement test scores, grades, and work samples/products), (2) birth date, (3) physical description, (4) social/emotional maturity, (5) documentation of previous attempts to meet academic needs through differentiated curriculum and instruction and subject acceleration, and (6) input from the student, parents, general education teacher and gifted specialist.
- 3) The committee will submit a written decision to the principal who will determine how the parent/guardian will be notified (unless the parent/guardian was a member of the committee). If the committee cannot reach a consensus recommendation, a decision will be determined by a majority vote. The *Acceleration Determination and Approval Form* will be completed.
- 4) If the committee determines not to grade accelerate the student, the parent/guardian will be given the opportunity to review the information considered. If the parent/guardian wishes to appeal the decision to the local Superintendent it should be in writing and within thirty days of the decision. The Superintendent will review the decision and notify the parent of his/her determination within 30 days of receiving the appeal.
- 5) If the committee determines that the student will be grade accelerated, a written plan will be shared with the parent/guardian. This plan will include the decision, strategies to support a successful transition to the accelerated setting, and parent/guardian permission to implement. This plan will become part of the student's permanent record. If the parent or student is not in favor of the committee's recommendation this will be noted on the *Acceleration Determination and Approval Form* and the student will not be grade accelerated.
- 6) The committee will establish an appropriate transition period for the accelerated placement. At any time before or during the transition period, a parent/guardian of the student may request in writing that the student be withdrawn from the accelerated placement without repercussions. If during the transition period, school personnel decide that the accelerated placement is inappropriate, the committee will be reconvened. The parent/guardian will be included, and a consensus will be obtained before changing the placement.
- 7) At the end of the transition period, the accelerated placement will become permanent, and the student's records will be revised to reflect the new placement. A committee consisting of at least a gifted specialist, general educator, counselor, and school administrator will continue to meet regularly (at least annually) to review the student's progress and social/emotional adjustment.
- 8) At an appropriate time, the committee should meet to discuss and plan for any effects a proposed acceleration may have on the student's social-emotional development and academic progression /programming throughout his/her school career. This will include input from the Gifted/Talented Specialist and/or other appropriate representatives from the next level (i.e. Middle School or High School).

DEFINITION OF TERMS

Acceleration Options

Subject Acceleration – Students remain in their normal grade placement for part of the school day, but are assigned to a higher grade level classroom for particular subjects. This practice helps provide access to appropriately challenging learning opportunities in one or more areas. For instance: A first grade student who is reading well above grade level goes to a second grade class for reading instruction.

Whole Grade Acceleration – Students with exceptional abilities are moved ahead of normal grade placement. For instance, a student who has completed first grade is placed in a third grade classroom full time at the beginning of the next school year. In this case he will have skipped second grade.

Grouping Strategies That Facilitate Differentiation and Do Not Require a Special Process

Clustering- Cluster grouping is an administrative procedure in which gifted students are assigned together in groups of 5-8 in one general education classroom instead of being distributed across all classrooms. Every classroom at the grade level remains heterogeneously grouped (having a low, middle, and high group) since the next highest ability students are divided between the rest of the classes. Cluster grouping simply reduces the number of levels in a classroom. Many systems actually cluster according to the strengths of the students. For instance, the highest ability math students are clustered together with the strongest math/science teacher while the highest ability language arts students may be clustered together with another teacher. Cluster teachers should be provided training in differentiation for high-end learners. Research suggests that cluster grouping combined with differentiation will 1) raise standardized test scores for all student groups, 2) appropriately challenge high-end learners, and 3) reduce the strain on teachers who are trying to meet the needs of a diverse student population.

Flexible Skills Grouping – Flexible skills grouping is an administrative procedure in which students are regularly assessed and grouped for instruction according to demonstrated performance of skills. Students are allowed to progress at a rate more appropriate for their ability level. Research suggests that flexible skills grouping results in substantial achievement gains for all readiness groups.

Differentiation Strategies – (Can be implemented without a special process)

Tiered Centers – Learning centers or stations, which allow the student to work at their readiness level and produce a product commensurate with their ability.

Tiered Assignments – Assignments are given to students based on their ability/readiness levels. All tiers are based on the same standard, but are differentiated according to content, process, or product.

Compacting – Students demonstrate mastery over content through a “pre-test” and are compacted out of the normal lessons to pursue topics more in-depth.

Learning Contract- Student enters into an agreement with a teacher to move through required content at his/her own pace (which is at an accelerated rate). Contracts can also be used to guide students through an independent study.

Literature/Socratic Circles – Students read and discuss text of their choosing (within parameters set by a teacher). Students are not assigned traditional literature circle roles. Analysis and discussion of the text at a conceptual level are the primary goals.

Independent Study Projects – Students study topics in their interest areas with guidance from a general education teacher or gifted specialist.

Acceleration Options for Middle and High School That Do Not Require A Special Process

Honors/Advanced Classes - Academic classes taught at a faster pace, and that focus on developing critical thinking, reading, writing, and problem-solving skills.

Advanced Placement Classes (AP) – An academic program of college level courses, which focus on developing critical thinking, reading, writing, and problem-solving skills. Students have the option of taking the College Board AP Exam, which may earn them college credit and/or advanced standing in college based on their scores on the AP Exam.

Distance Learning – This strategy involves transmitting instructional classes via interactive video conferencing (IVC) equipment or via an on-line e-course. Distance Learning provides an opportunity for students to enroll in courses not offered on their home campuses.

Dual Enrollment/Dual Credit – Students take college courses while still enrolled in high school. If the school system has an agreement with a local post-secondary school the students can earn both high school and college credit.

Dual Enrollment – Students take college courses while still in high school, but the student earns only college credit and not high school credit.

Referral Form for Considering Acceleration

(To be completed when considering subject or grade acceleration)

Name _____	Present School _____		
Grade _____	DOB _____	Age _____	Date of Referral _____
Parent/Guardian _____ (Father) _____	Work Phone (Mother) _____		

Specific grade, subject, or course acceleration recommended by this referral:

Reason for acceleration referral:

Documentation of previous enrichment/differentiation opportunities within normal grade sequence:

- 1) _____
- 2) _____
- 3) _____
- 4) _____

Signature of person making referral: _____

Relationship to student: _____

Signature of gifted specialist _____

Signature of Building Administrator _____

I give my permission to school personnel to conduct a comprehensive evaluation to determine if acceleration would be appropriate for my child. I also understand that I will be informed of the results of this evaluation and will be consulted before any subject or grade acceleration is implemented.

Signature of parent/guardian _____ Date _____

Acceleration Determination and Approval Form

Name _____	Present School _____	Grade _____
Parent/Guardian _____	Work Phone _____	Date _____

Level of skill development in math and reading:

_____ Percentile	Test Used: _____
_____ Percentile	Test Used: _____

Based on interviews with the student and information from parent(s)/guardian(s), teachers, and other appropriate personnel, as well as the data listed above, this student:

Yes	No	
___	___	Understands and desires acceleration.
___	___	Has adequate social-emotional development for the accelerated placement.
___	___	Does not have a sibling in the same (current) or next grade level.
___	___	Demonstrates skill proficiency in the top 20% of the subject in question.
___	___	Impact of acceleration on student's long range plan has been explained to parent(s)/guardian(s) and student.

(For Grade Acceleration Only)

___ ___ Student's Full Scale/Composite IQ is at least one standard deviation above the mean.

Other observations by the evaluation team: _____

The committee **DOES/DOES NOT** recommend this student for **SUBJECT/GRADE** acceleration, based on the data collected and the proposed impact on the student's academic, intellectual, and social development.

Committee Members:

_____ Gifted Specialist	_____ Current Classroom Teacher	_____ Parent/Guardian
_____ Receiving Classroom Teacher	_____ Counselor/Psychometrist	_____ Administrator
Other _____	Other _____	Other _____

Agree With Committee Decision _____

Disagree With Committee Decision _____

Parent(s)/Guardian(s) Signature(s) _____

ACCELERATION PLAN

Name _____	Present School _____	Grade _____
Parent/Guardian _____	Work Phone _____	Date _____

Specific grade, subject, or course acceleration recommended:

From _____ to _____

Teachers Involved: _____

Transition Period (If applicable) Begins _____ Ends _____
(This would be appropriate any time that transition issues may arise.)
M/D/Y M/D/Y

Strategies to ensure a successful transition:

Strategies to ensure continuous progress following the transition period:

Staff member assigned to monitor the implementation of this plan:

Oneonta City Virtual School
Oneonta City Schools

Identification and Servicing of Gifted Students

Identification

Virtual students may be recommended for gifted testing by the teacher (virtual), parent, or student. Oneonta City Schools must be notified of the request for testing. The referral for eligibility procedures will be followed as outlined in the LEA Gifted Plan. Arrangements to administer assessment will be made with parent, and transportation is at the expense of the parent.

Professional Development for Virtual Teachers

Teachers will use the Gifted Modules provided by the Alabama State Department of Education for Professional Development. Virtual teachers will be notified of a student's gifted status and advised regarding appropriate instructional strategies for meeting the needs of gifted students. Instructional strategies may include differentiated instruction, enrichment activities, pre-test/post-test acceleration through material, etc.

Servicing Virtual Students

Grades 3-5

Virtual students may receive 3.0-3.5 hours of gifted instruction weekly, but must attend servicing on campus at Oneonta Elementary School at the agreed upon time and date. Transportation is at the expense of the parent.

Grades 6-8

Virtual students will be offered counseling, pre-AP, AP virtual courses, and electives. Robotics Team will be offered after school, and transportation is at the expense of the parent.

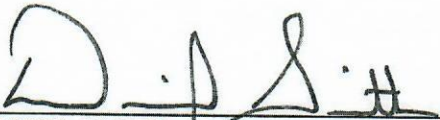

Grades 9-12

Virtual students will be offered counseling, AP virtual courses, and electives. The Scholars Bowl will be offered after school, and transportation is at the expense of the parent.

I. PHILOSOPHY

Intellectually gifted children and youth are those who perform at or have demonstrated the potential to perform at high levels in academic or creative fields when compared with others of their age, experience, or environment. These children and youth require services not ordinarily provided by the regular school program. Children and youth possessing these abilities can be found in all populations, across all economic strata, and in all areas of human endeavor. Gifted students may be found within any race, ethnicity, gender, economic class, or nationality. In addition, some students with disabilities may be gifted.

The Oneonta City School System shall prohibit discrimination against any student on the above basis with respect to his/her participation in the gifted program.

II. PROGRAM GOALS

- I. Goal: To provide training for all staff on the procedures for referring and identifying students for gifted services.**
- Develop training and assemble handouts to include forms, procedures, etc.
 - Schedule training annually to update procedures and inform new staff.
 - Implement training.
 - Maintain documentation of training provided.
 - Evaluate effectiveness of training.
- II. Goal: To continue working towards racial equity in the gifted program.**
- Provide yearly in-service for all elementary and middle school faculties concerning the issues associated with identifying underrepresented groups.
 - Utilize appropriate assessments to make screening/eligibility decisions.
 - Strive to allocate gifted teachers for schools with high numbers of minority or low socio-economic students to conduct child find activities and implement enrichment programs to nurture gifted potential.
- III. Goal: To continue conducting Child Find Activities**
- Implement mandatory Second Grade Child Find Activity
 - Review ACT Aspire or other group aptitude test scores and refer any students who have high aptitude or achievement scores.
 - Provide public notice in the handbook or Code of Conduct.
 - Schedule gifted teachers into second grade classrooms to conduct lessons that yield gifted behaviors and products.
 - Provide yearly staff development for general education teachers concerning the referral process.
- IV. Goal: To ensure that there are comparable services throughout the system.**
- Communicate with principals and check teachers' schedules to make sure that students in the same grade level across the system are receiving the same number of hours of service (e.g. 3rd graders – 3 hours, 4th graders 3-4 hours, etc.)
 - Allocate gifted teachers equitably taking into consideration caseloads and number of schools served.
 - Strive to find classroom space for each gifted teacher that is comparable to other programs.
- V. Goal: To work towards a true continuum of services for high-end learners.**

- Provide pullout services for grades 3-5.
- Provide consultation services for grades K-2
- Provide advanced courses for grades 6, 7, 8, or 9-12.
- Consult, as time will allow, with general education teachers across grade levels concerning meeting the needs of high-end learners in the general education classroom.

- VI. Goal: To provide curriculum for gifted learners that is concept and problem based.**
- Support gifted teachers in attending professional development in the areas of concept and problem-based learning.
 - Support gifted teachers in meeting with other gifted specialists to work on units of study.

III. REFERRALS

- A. **Informing the Public** Each LEA should provide the same level of notice to parents and students regarding information about the gifted program as it does with respect to other significant school activities, policies, or procedures. The notice should include information on the definition of gifted, how to refer a student, the basic eligibility criteria (excluding test scores), and who to contact to make a referral.

The method for providing this notice must be one that reaches all parents and students and should therefore be in the Code of Conduct or Student Handbook.

The notice in the box below or one that is very similar and contains all of the required information as described above is or will be placed in the: (Check one)

- Code of Conduct
 Student Handbook.

Gifted students are those who perform at or who have demonstrated the potential to perform at high levels in academic or creative fields when compared to others of their age, experience, or environment. These students require services not ordinarily provided by the regular school program. Students possessing these abilities can be found in all populations, across all economic strata, and in all areas of human endeavor.

Teachers, counselors, administrators, parents or guardians, peers, self, or any other individuals with knowledge of the student's abilities may refer a student. Additionally, all second grade students will be observed as potential gifted referrals using a gifted behavior checklist.

For each student referred, information is gathered in the areas of Aptitude, Characteristics, and Performance. The information is entered on a matrix where points are assigned according to established criteria. The total number of points earned determines if the student qualifies for gifted services.

To make a referral, contact the Gifted Specialist.

B. Gifted Referrals Screening Team (GRST) Each LEA shall establish a team (or a team at each school) to receive and review referrals for gifted services. Each team should consist of at least three people, and members should include someone knowledgeable about the student and someone knowledgeable about gifted education. It is highly recommended that the gifted specialists serve on the GRST.

The GRST will consist of at least three individuals from the following list:
(Please check all that apply)

- Gifted Specialist(s)
- Counselor
- Administrator
- General Education Teacher
- Special Education Coordinator
- other _____

The duties and responsibilities of this team are to:

- Receive all referrals.
- Collect all required information.
- Schedule meetings in a timely manner to review referrals.
- Notify parents when child has been referred, obtain parental consent, and inform them of their rights.
- Notify parents of team's decision.
- Base decisions on multiple criteria; do not exclude any student on the basis of a single test score.
- Exhibit sensitivity to cultural, economic, and/or linguistic differences.
- Make arrangements for any further assessments.
- Deliver the completed assessment information to the Eligibility Determination Team (EDT).
- Other _____

C. Screening Criteria Check One

LEA automatically accepts each referral for further assessment (administered by psychologist if needed for placement) to determine eligibility.

LEA uses the State Screening/Eligibility Determination Form to screen students to determine if further assessment is necessary.
12 points are required to pass screening.

EVALUATION

The GRST, the psychometrist, or whoever makes decisions about tests that are administered must make those decisions based on their knowledge of the student and the purpose for which the test was intended.

Information about the student can be obtained from the *Aptitude Test Selection* box on the referral form. This checklist will indicate if there is a need to administer alternative assessments (e.g., non-verbal assessments or creativity assessments) due to cultural, economic, environmental, linguistic, or disability differences. If any items are checked in the *Aptitude Test Selection* box both verbal and nonverbal abilities must be assessed (and creativity if appropriate) before determining student ineligible for gifted services.

For information on specific tests, consult the individual test manuals.

Oneonta City School System will select and administer tests and evaluative materials that are sensitive to cultural, economic, and/or linguistic differences and that are appropriate for the special populations such as the sensory impaired, LEP, or physically impaired student. Students from underrepresented groups will have both verbal and nonverbal abilities assessed (and creativity when appropriate) before being determined ineligible.

Independent Evaluation Procedures

There is some evidence to indicate that using test scores from independent evaluators may contribute to racial inequities in gifted populations. School systems must adopt local procedures regarding independent evaluations. Check the statement below that describes the procedures used by Oneonta City School System:

Tests from qualified independent evaluators will be treated the same as tests administered by school system personnel or contract personnel.

Tests from qualified independent evaluators will be considered as a referral but the school system reserves the right to conduct further assessment.

V.
ELIGIBILITY

LEAs must establish an Eligibility Determination Team (EDT) to implement procedures to determine eligibility of students for gifted services. Members must include someone knowledgeable about the student being assessed, someone knowledgeable about gifted students in general, and someone able to interpret the information gathered. There should be at least three members on the team. The EDT may include the same members as the GRST.

The EDT is:
(Check one)

Central Office Based
 School Based

The EDT will consist of at least three individuals from the following list:
(Please check all that apply)

Gifted Specialist(s)
 Counselor
 Administrator
 General Education Teacher
 Psychometrist
 Special Education Coordinator
 Other _____

The duties and responsibilities of the EDT are to:

- Determine if all assessment information has been gathered by the GRST: vision/hearing screening, aptitude/creativity test scores, behavior rating scale for gifted, and any/all of the following available: achievement test scores, product, portfolio, work sample, teacher narrative, or grades from the last semester.
- Complete the eligibility determination process.
- Inform parents of the decision by sending a *Notification of Eligibility Determination Team Decision* form.
- If eligible, get a signed copy of the *Notification of Eligibility Determination Team Decision* form.
- If eligible, inform the teacher of the gifted; if ineligible, inform the person who referred the student (if other than the parent).
- Exhibit sensitivity to cultural, economic, and/or linguistic differences.

VI. SERVICE DELIVERY OPTIONS

Gifted students may receive services through a variety of service delivery options depending on the age of the student and the resources available to the LEA. Services for students of the same grade level on different campuses must be comparable in quality and duration. This means that if third graders at one school receive 3 hours a week pullout services then third graders at all schools should receive 3 hours a week pullout services. The following are examples of appropriate services for various age groups.

Please check all that apply.

Grades K-2

- Consultative services from the gifted specialist provided in the regular classroom setting (e.g., extra materials, learning centers)
 Curriculum compacting
 Cluster grouping with differentiated curriculum in the regular classroom
 Cross-age grouping in areas of strength

Grades 3-6 Grades 3-5

- Traditional pullout services for 3 hours a week
 Cluster grouping with differentiated curriculum in the regular classroom
 Cross-age grouping in areas of strength
 Curriculum compacting

Grades 6-8 Grades 7-8

- Advanced core curriculum classes provided by qualified regular or gifted educators.
 Electives in a variety of talent areas (music [choral and instrumental], technology) taught by qualified instructors.
 Elective class geared for gifted learners taught by a gifted teacher.
 Enrichment clusters for students who compact out of the general education curriculum.
 Robotics Team, Grades 7-8

Grades 9-12

- Advanced core curriculum classes provided by qualified regular or gifted educators.
 Electives in a variety of talent areas (drama, music [choral and instrumental], technology, foreign languages) taught by qualified instructors.
 Elective class geared for gifted learners taught by a gifted teacher.
 Counseling services for college and career preparation.
 Scholars Bowl

ATTACHMENT to Section VI.

If the LEA wants to provide services that are different from the options above a plan must be submitted for approval. The plan should describe how gifted students are served at each grade level or grade level cluster. (K-2, 3-5, 6-8, 9-12). Include a statement of assurance that services to all students at each grade level or grade level cluster are of comparable quality and duration.

VII.

SELF-MONITORING PROCEDURES

Each LEA shall establish and implement a plan for monitoring general education classrooms that are charged with meeting the needs of gifted learners (e.g. K-2 classrooms as well as advanced level/advanced placement classes in the middle school and high schools). In other words, there must be a system in place to monitor the implementation of differentiation in grade levels that utilize indirect services for gifted learners. Monitoring plans should include a review of lesson plans, materials, course offerings, and teaching strategies.

Sample:

- I. Principals will collect evidence of the items listed on the attached *Standards for Gifted Services* response sheets for principals (see attached sheets).
- II. Supervisor of principals will collect evidence/artifacts from principals.
- III. Supervisor of principals will meet with special education coordinator/gifted supervisor and other staff knowledgeable of the nature and needs of gifted students, and evaluate the level of differentiation being provided for high-end learners.
- IV. Recommendations for professional development will be made in response to the evaluation.
- V. A summary report and artifacts will be compiled and ready for review during gifted monitoring.

ATTACHMENT to Section VII
If the LEA wants to provide self- monitoring procedures that are different from the procedures above a plan must be submitted for approval.

VIII. POLICIES/PROCEDURES

Procedures should exist that address flexible grouping strategies implemented to facilitate differentiated curriculum instruction. These practices should match the level, complexity, and pace of the curriculum to the readiness and motivation of the student.

Please code the following that are **P Practiced** in your school system, or **NA Not Allowed**.

P Grade acceleration – Students with exceptional abilities are moved to the next highest grade.

P Fluid movement between grades – Students with exceptional abilities in a particular subject may attend classes at a higher grade level.

P Clustering – When the number of gifted students in a grade level is small, the gifted students are grouped together (no more than eight students in a cluster group) in one or two regular classrooms instead of one gifted student in each classroom.

P Flexible skills grouping – Students are regularly assessed and grouped for instruction according to skill level.

ATTACHMENT to Section VIII

Please attach a copy of any written policy or procedure concerning the above strategies, whether P or NA

IX.
PROFESSIONAL DEVELOPMENT

Each LEA shall establish and implement a plan for professional development concerning the nature and needs of gifted students. A two-year plan should be developed which will include a needs assessment and follow-up evaluation. This plan should include steps for on-going staff development to ensure continuous improvement. All levels--K-12---should be addressed. Progress towards implementing the professional development plan will be evaluated during monitoring visits.

- A. Professional development for gifted specialists
- B. Professional development for general education teachers who are charged with meeting the needs of high-end learners in the regular classroom.
- C. Professional development for general education teachers who are serving in the capacity of advanced level or advanced placement classes in the middle and high schools.
- D. Professional development for counselors concerning the nature and needs of gifted students.

ATTACHMENT to Section IX
A copy of the plan for professional development should be attached.

X.
GRIEVANCE PROCEDURES

Each LEA shall establish grievance procedures consistent with local policy through which parents may resolve concerns regarding identification, evaluation, eligibility, or services for gifted students. Parents are required to follow this procedure before filing a formal complaint or requesting a due process hearing through the SDE.

ATTACHMENT to Section X
Attach a copy of the grievance procedures through which parents may resolve concerns regarding identification, evaluation, eligibility, or services for gifted students.

ONEONTA
CITY BOARD OF EDUCATION

STUDENT/PARENT/GUARDIAN COMPLAINTS AND GRIEVANCES

POLICY 703:

It is the desire of the Board to provide for prompt and equitable resolution of student's and/or parent/guardian complaints and grievances.

Level 1:

Free and informal communication is suggested as soon as possible following the origin of the complaint. A student/parent/guardian with a grievance should first take the grievance to the teacher involved or to the Assistant Principal if that is the person involved.

Level 2:

If dissatisfied at level 1, or if the grievance involves the Principal, the student/parent/ guardian should take the complaint to the Principal.

Level 3:

If dissatisfied at Level 2, the student/parent/guardian may file a written appeal to the Superintendent. Within ten (10) days of receipt of the grievance, the Superintendent shall request a conference with the aggrieved student/parent/guardian or render a written decision.

Level 4:

If resolution is not achieved at Level 3, the student/parent/guardian may request the Superintendent to schedule a brief hearing before the Board at its next regular meeting.

The aggrieved student/parent/guardian may: select a representative to accompany him/her at each level; ask the representative to state the facts in written form; request a written decision at each level.

For the discussion and consideration of the grievance, time and place, which do not interfere with classes or activities, will be selected.

XI.

ALTERNATIVE/ENRICHMENT PROGRAMS

Some LEAs have started programs of their own that provide enrichment opportunities to all students, or to students who meet specific criteria, or to students who do not qualify for gifted services according to state standards. If your LEA has such a program, please provide the following information:

Name of program - Enrichment

Brief description of program (target audience, purpose, type of service provided, etc.)

Location of services (which schools and/or where within a school--regular class, resource room)

Number of students currently being served according to grade and race

Contact person

ATTACHMENT to Section XI

Provide Information on any program that includes enrichment opportunities for students other than the program described in gifted students' GEPs.

Standards for Gifted Services

Response Sheet for Elementary School Principals

Alabama's *Standards for Gifted Services* were modeled after the *National Standards for Gifted Programs* (2002). The standards were selected as *goals* for all gifted services in Alabama. Principals should circle the number of the statement in the *Responses* area that is true for each of the Standards as they relate to the **regular** classroom. Principals should collect artifacts/documentation demonstrating implementation.

Name: Mrs. Julie Talton, Principal

School: Oneonta Elementary School

CURRICULUM AND INSTRUCTION

(These standards refer to regular classroom practices)

STANDARD	RESPONSES
<p><u>POLICIES AND PROCEDURES</u> Procedures should exist that address flexible grouping strategies implemented to facilitate differentiated instruction and curriculum.</p>	<p>Circle the number of all strategies that are used in your school in regular classrooms:</p> <ol style="list-style-type: none"> <input checked="" type="radio"/> 1 Grade acceleration – Students with exceptional abilities are moved to the next highest grade. 2 Fluid movement between grades – Students with exceptional abilities in a particular subject may attend classes at a higher grade level. <input checked="" type="radio"/> 3 Clustering – When the number of gifted students in a grade level is small, the gifted students are grouped together in one or two regular classrooms instead of one gifted student in each classroom. <input checked="" type="radio"/> 4 Flexible skills grouping – Students are regularly assessed and grouped for instruction according to skill level. <p>Circle the number that best describes the level of implementation of these strategies:</p> <ol style="list-style-type: none"> <input checked="" type="radio"/> 1 Written procedures exist and are implemented on a regular basis for the areas circled. 2 District/Building policies/procedures exist that are not supportive of meeting the needs of high- end learners (e.g., it is common knowledge that the administration will not consider any form of grouping or acceleration).
<p><u>GENERAL EDUCATION CLASSROOM</u> General classroom curricula and instruction should be adapted, modified, or replaced to meet the unique needs of high-end learners. Students should be regularly assessed, and instruction should be based on the results.</p>	<p>Circle the number of all strategies that are used in your school in regular classrooms:</p> <ol style="list-style-type: none"> <input checked="" type="radio"/> 1 Students are regularly assessed in at least reading and math, and instructional modifications are based on these assessments (ex. above grade-level curriculum is provided and/or content is compacted, and appropriately differentiated activities are provided such as literature circles for reading). 2 Students are regularly assessed in reading and/or math and instructional modifications are based on these assessments (ex. above grade-level curriculum is provided and/or content is compacted, and appropriately differentiated activities are provided such as literature circles for reading). 3 Students contract with teacher to study only those objectives not already mastered and then complete other assignments related to the general education curriculum or areas of interest. <input checked="" type="radio"/> 4 Students are exposed on a regular basis to instructional strategies that include more than lecture and elicit more than knowledge-level responses (Socratic questioning, purposeful student-dominated discussions, problem-based learning, and other activities that utilize higher levels of Bloom's Taxonomy). <input checked="" type="radio"/> 5 Students are exposed to a variety of materials such as books, audio-visuals, computers, guest speakers, field study experiences, artifacts, primary sources, models, etc. 6 Students can choose topics of study that are not necessarily related to the subject of the class when they have demonstrated mastery over grade-level content. <input checked="" type="radio"/> 7 Students have access to other resource personnel (computer, art, music, media specialist, etc.) on an as-needed basis. <input checked="" type="radio"/> 8 Students' homework assignments are on their instructional level. 9 The same instruction, objectives, and strategies are provided for all students. No differentiation occurs for high-end learners at any grade level.

Standards for Gifted Services

Response Sheet for Middle School Principals

Alabama's *Standards for Gifted Services* were modeled after the *National Standards for Gifted Programs* (2002). The standards were selected as *goals* for all gifted services in Alabama. Principals should circle the number of the statement in the *Responses* area that is true for each of the Standards as they relate to the **Advance** level classrooms. Principals should collect artifacts/documentation demonstrating implementation.

Name: Ms. Leigha Rogers, Principal School: Oneonta Middle School Grades: 6-8

CURRICULUM AND INSTRUCTION

(These standards refer to regular classroom practices)

STANDARD	RESPONSES
<p><u>ACADEMICS AND ELECTIVES</u> Appropriate educational opportunities must be provided to meet the needs of high-end learners. Student should be provided materials and instruction commensurate with their abilities. Electives are an important component of the education of high-end learners.</p>	<p>Circle the number of the statement that best describes the course offerings at your school.</p> <ol style="list-style-type: none"> 1 There are advanced courses in the four academic subjects (or high-end learners are clustered in the four core courses), and the curriculum is appropriately differentiated. There are a variety of electives such as art, band, music, and technology. <input checked="" type="radio"/> 2 There are advanced courses in at least two of the four academic subjects (or high-end learners are clustered in at least two of the four core courses), and the curriculum is appropriately differentiated. There are a variety of electives such as art, band, music, and technology. <input checked="" type="radio"/> 3 There is at least one advanced course in a core academic subject (or high-end learners are clustered in at least one core course), and the curriculum is appropriately differentiated. There are a variety of electives such as art, band, music, and technology. 4 There is no evidence of differentiating the curriculum for high-end learners, but there are a variety of electives offered such as art, band, music, and technology. 5 There is no evidence of differentiating the curriculum for high-end learners, and there are few or no electives offered.
<p><u>CURRICULUM DIFFERENTIATION</u> Curriculum should be differentiated in a variety of ways to meet the needs of high-end learners.</p>	<p>Curriculum is differentiated for learners in the following ways (circle all that are true):</p> <ol style="list-style-type: none"> <input checked="" type="radio"/> 1 Acceleration – content is at least six months accelerated. <input checked="" type="radio"/> 2 Time on task – students spend the majority of their time engaged in higher-order thinking activities (beyond knowledge and comprehension level). <input checked="" type="radio"/> 3 Instructional strategies – simulations, problem solving, Socratic questioning, etc., are the predominant strategies utilized by the teacher rather than lecture or students reading the chapter and answering the questions in the textbook. <input checked="" type="radio"/> 4 Compacting – students are pre-tested and then provided curriculum at their instructional level or are allowed to pursue topics of interest. <input checked="" type="radio"/> 5 Tiered assignments – students are all studying the same topic but different activities are assigned to groups of students based on assessment. 6 Curriculum is not differentiated.

Standards for Gifted Services Response Sheet for High School Principals

Alabama's *Standards for Gifted Services* were modeled after the *National Standards for Gifted Programs* (2002). The standards were selected as *goals* for all gifted services in Alabama. Principals should circle the number of the statement in the *Responses* area that is true for each of the Standards as they relate to the **Advanced level/Advanced Placement** classrooms.

Name: Mrs. Laura Wilson, Assistant Superintendent School: Oneonta High School Grades: 9-12

CURRICULUM AND INSTRUCTION

(These standards refer to regular classroom practices)

STANDARD	RESPONSES
<p>ACADEMICS AND ELECTIVES Appropriate educational opportunities must be provided to meet the needs of high-end learners. There should be a variety of options available at the high school level to meet the needs of high-end learners.</p>	<p>Circle the number of the statements that best describe the course offerings at your school.</p> <ol style="list-style-type: none"> 1. At least three advanced level*/Advanced Placement* courses are offered in every grade level. 2. At least two advanced level/Advanced Placement courses are offered in every grade level. 3. At least one advanced level/Advanced Placement course is offered in every grade level. 4. A wide array of electives is offered. 5. Only basic electives are offered (for example, band, chorus, computer science, and at least one foreign language). 6. One or more dual enrollment* classes are offered. 7. There is a certified gifted staff person who meets on a regular basis (at least once a week) with high-end learners and assists with social-emotional* needs and college planning*. 8. There is a certified gifted staff person who meets at least four times a year with high-end learners and assists with social-emotional needs and college planning. 9. None of the above is true. <p>*Descriptions Advanced Placement—Courses designed to offer students college-level study while in high school with the possibility of obtaining college credit upon examination. Advanced Level/Honors Classes—Courses that do not qualify as Advanced Placement but offer accelerated content. Dual Enrollment—High school students complete coursework at local community colleges and/or universities for college and high school credit. Social-emotional—Students are helped to understand and evaluate their special needs and gifts and to utilize their gifts. College Planning—Students are provided information concerning (1) scholarships and (2) PSAT, SAT, and ACT prep opportunities and deadline dates and vocational aptitude assessments.</p>
