

Bonding – General Concepts

Chapters 8 & 9

(Only do odd number questions – answers in back of text)

1. Types of bonds – p. 402 q. 13-27
2. Electronegativity, polarity & configurations – p. 403 q. 29-39
3. Formation of ionic compounds – p. 404 q. 41-45
4. Bond Energies – p. 404 q. 47-59
5. Electron bonding model, Lewis structures – p. 405 q. 61-71
6. Exceptions to octet rule – p. 406 q. 73-81
7. Resonance & VSEPR model – p. 406 q. 83-93
8. Hybridization – p. 407 q. 95-105

Chapter 9

9. Localized electron model – p. 441 q. 11-21
10. Hybrid orbitals – p. 442 q. 31-45
