## Using RDP to Access your Computer from Windows XP, Vista and Mac OX

Log into VPN System as shown in previous section(s).
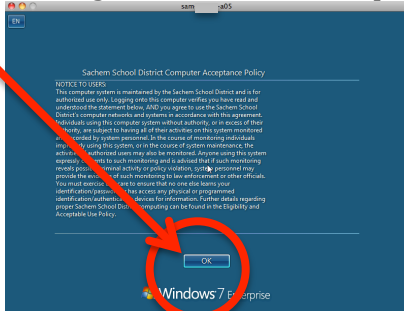

From left menu, choose "**Terminal Servers (Vista**)" ,**type the name of the computer** you wish to access in the address field and press "**enter**" or click "**browse**", as shown below:

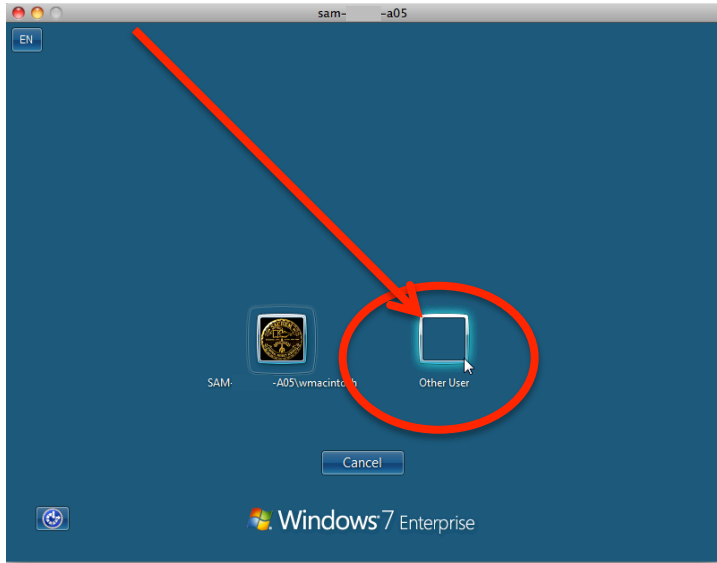

Two pop up windows may follow, choose, "**Trust**" on the first one and "**Allow**" on the second

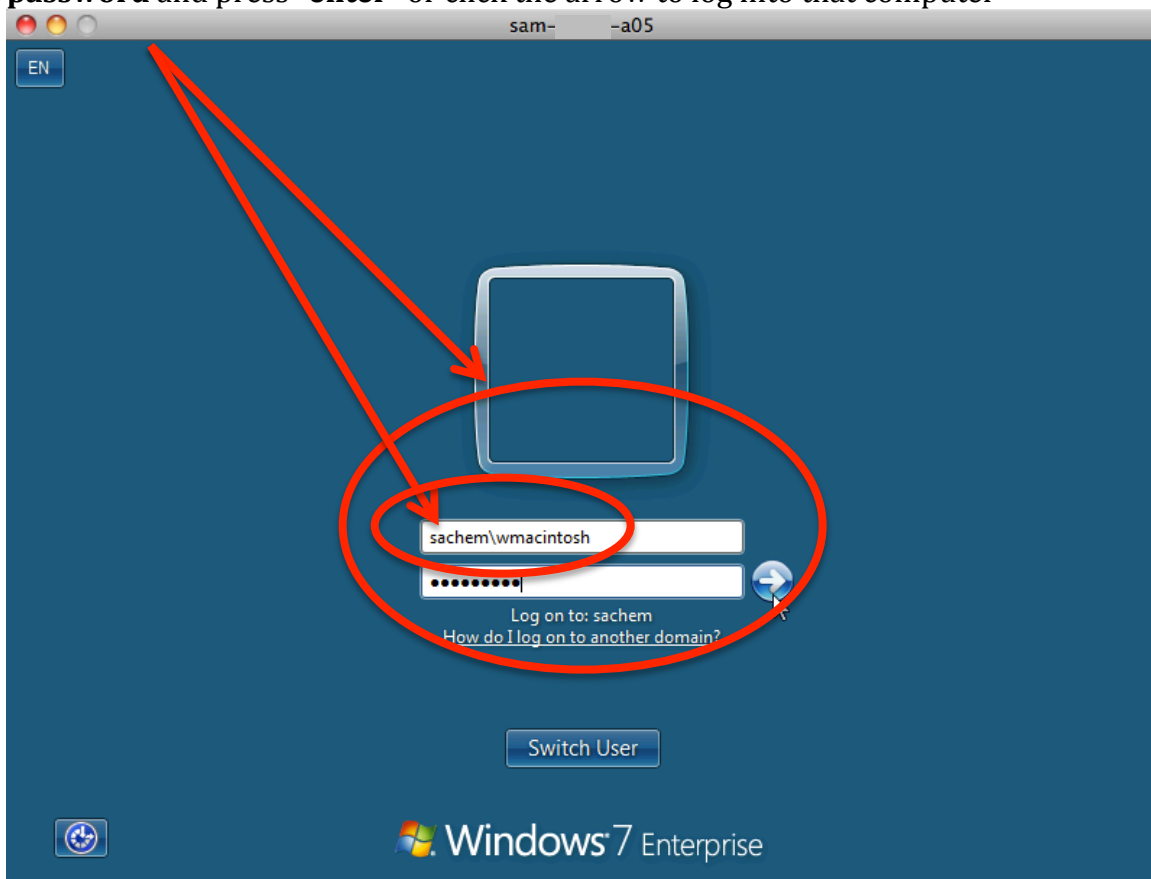

The log on window should pop up, click "**ok**"

Choose "**Other User**" from the choices shown:

Be sure to **type** "**sachem\" then the sign on name** – no spaces, followed by the **password** and press "**enter**" or click the arrow to log into that computer

Use the computer as if you are at school. Remember to log out and close the connection when finished
