

PROGRAMS FOR TALENTED AND GIFTED STUDENTS

The Board of Education acknowledges the uniqueness of talented and gifted students and is committed to providing learning experiences which will afford an opportunity for such students to expand fully their abilities and creativity. The Board also recognizes that further efforts are necessary to extend educationally and in a cost-effective manner the allocation of resources towards appropriate programs for students identified as talented and gifted.

Consistent with District efforts to develop a continuum of learning experiences which addresses the special gifts and talents of students, the Superintendent of Schools, with input from appropriate school personnel, will develop a District plan for education of the talented and gifted.

The Board believes that programs traditionally viewed as for the talented and gifted greatly benefit the entire school program and encourages programs that provide enrichment opportunities for all students.
