*Superintendent of Schools*

Dear Parents/Guardians,

Our schools may use VR Expeditions or other online virtual reality resources, for virtual and augmented reality lessons. Using virtual reality viewers, these experiences are teaching tools that lets students join immersive virtual trips or other visually exploratory learning. Please read the following disclaimer.

## **Welcome to Expeditions!**

- Please review the guidelines for using virtual reality.
- VR experiences are only for users older than age 7. Students should not use VR equipment without adult supervision.
- Users participating with VR viewers should have enough space to look around freely and should not attempt to walk around.
- Users should take breaks while using VR viewers. If users experience nausea, discomfort, eye strain or disorientation, they should immediately discontinue using Expeditions.
- If any users participating in the VR session have had or could be prone to seizures, they should consult a doctor before using Expeditions.

Teachers and support staff have reviewed and understand these guidelines.
