

Warm Up

LEVEL 0

10/26/16

Fill in the blanks. If you need help use your notes from Monday and yesterday

Copy and solve for x.

The following angle is a Supplementary angle. The sum of these two angles will equal 180°.

To solve for x:

$$\begin{array}{r} \cancel{48} + 6x = 180 \\ -\cancel{48} \quad \quad -48 \\ \hline 6x = 132 \\ \div 6 \\ \hline x = 22 \end{array}$$

$\angle B$, $\angle ABC$, $\angle 4$, acute angle

$\angle E$, $\angle DEF$, $\angle 5$, right angle

$\angle N$, $\angle MNP$, $\angle 1$, obtuse angle

Pg. 539

MP Identify Structure Refer to the diagram at the right. Identify each angle pair as *adjacent*, *vertical*, or *neither*. (Example 2)

4. $\angle 2$ and $\angle 5$ vertical 5. $\angle 4$ and $\angle 6$ neither 6. $\angle 3$ and $\angle 4$ adjacent
7. $\angle 5$ and $\angle 6$ adjacent 8. $\angle 1$ and $\angle 3$ neither 9. $\angle 1$ and $\angle 4$ vertical

Agenda

- Vertical, complementary, and supplementary angles practice

Goal: To be able to apply understanding of vertical, complementary, and supplementary angles to find missing angles.

VOCAB REVIEW

Vertical angles

Angles that are across from each other and have the same measure.

VOCAB REVIEW

Complementary angles

TWO angles whose sum is 90⁰.
C is for 'corner'.

Supplementary angles

TWO angles whose sum is 180⁰. S is for 'straight'.

Lesson 1 and Lesson 2 Worksheet

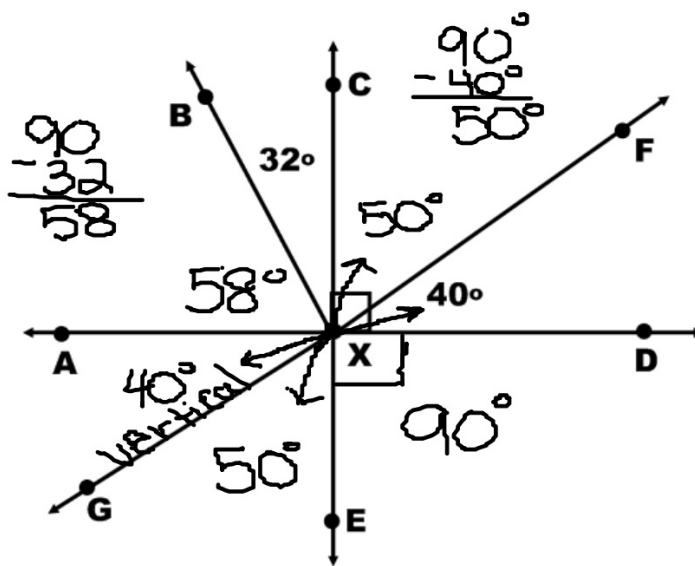

On Lesson 1: CLASSIFY and name the angle 3 ways for #1-6

Vocab Flash Cards

On the WHITE SIDE (without lines) write one of the 11 vocabulary words from your vocab sheet. On the LINED SIDE, write the definition. Create 1 index card for each word.

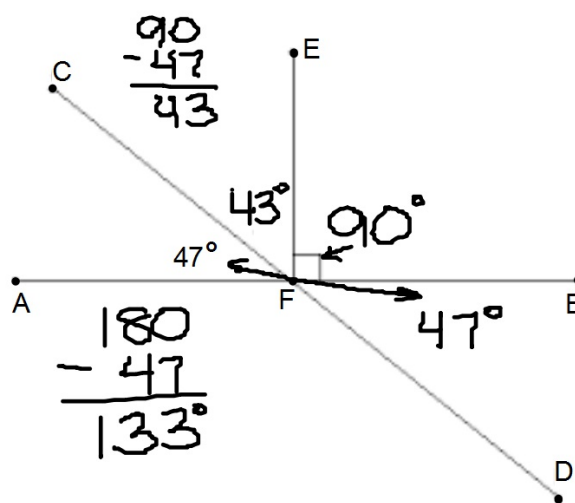

Find the measure of all missing angles.

- $m \angle CXB = 32^\circ$
- $m \angle BXA = 58^\circ$
- $m \angle AXG = 40^\circ$
- $m \angle GXE = 50^\circ$
- $m \angle EXD = 90^\circ$
- $m \angle DXF = 40^\circ$
- $m \angle FXC = 50^\circ$

Find the measure of all missing angles.

- $m \angle CFA = 47^\circ$
- $m \angle AFD = 133^\circ$
- $m \angle DFB = 47^\circ$
- $m \angle BFE = 90^\circ$
- $m \angle EFC = 43^\circ$

Draw the figure. Copy the statements.

In the diagram, \overline{DO} and \overline{TO} are extended as shown.
Determine if the statements are true or false.

- A. $\angle SOC$ and $\angle DOU$ are complementary
- B. $x=8$
- C. $\angle OWU$ and $\angle DWT$ are vertical angles
- D. $\angle SOC$ and $\angle DOS$ are supplementary
- E. $m\angle TOU = 40^\circ$
- F. $\angle COS$ and $\angle TOD$ are equal in measure

Warm Up

LEVEL 0

10/24/16

1. Two angles are vertical angles. One angle is labeled 20° . The other angle is labeled $(2x+10)^\circ$. Find the value of x .

2. From the following angle measures, choose a pair that is complementary and a pair that is supplementary. *Numbers can be reused
 26° 92° 102° 78° 22° 85° 12°
 Complementary: _____ and _____
 Supplementary: _____ and _____

Agenda

- Triangles introduction

Goal:

To be able to classify and construct triangles.

To be able to find the missing angle measure in a triangle.

What we already know about triangles

What we have to remember...

The measure of the interior angles of a triangle is equal to 180° .

$$x^\circ + y^\circ + z^\circ = 180^\circ$$

Ramps Julia practices jumping on a ski ramp. The front of the ramp is a triangle like the one shown below.

1. Draw an X through the type of angle that is not shown in the triangle.
right acute obtuse
2. Measure the unknown angle. Describe the relationship between the 80° angle and the unknown angle. _____

3. Draw a triangle with one obtuse angle.
4. Is it possible to draw a triangle with two obtuse angles? Explain.

Page 555
#1-4

How to Classify Triangles

First, by using the angles...

all acute angles

acute triangle

1 right angle

right triangle

1 obtuse angle

obtuse triangle

How to Classify Triangles

Then, by using the sides...

no congruent sides

scalene triangle

at least 2 congruent sides

isosceles triangle

3 congruent sides

equilateral triangle

**** Congruent means equal**

Classifying triangles

This triangle is...

Look at the angles.

- all acute angles
- one right angle
- one obtuse angle

Look at the sides.

- no congruent sides
- two congruent sides
- three congruent sides

Classifying triangles

This triangle is...

Look at the angles.

- all acute angles
- one right angle
- one obtuse angle

Look at the sides.

- no congruent sides
- two congruent sides
- three congruent sides

Constructing triangles

A triangle with a right angle
and two congruent sides.

Draw the angle.

Draw the sides.

Classify the
triangle:

Find the measure of the missing angle

Find the measure of $\angle Z$

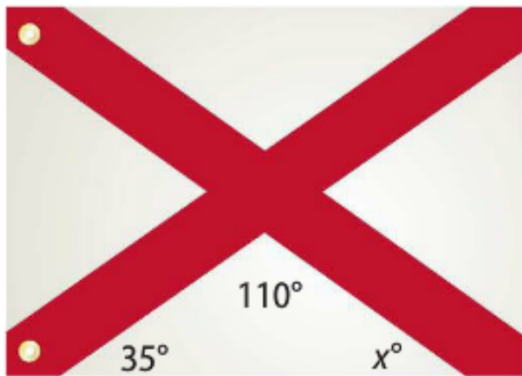

Find the measure of the missing angle

In $\triangle ABC$, if $m\angle A = 25^\circ$ and $m\angle B = 108^\circ$, what is $m\angle C$?

Find the measure of the missing angle

The Alabama state flag is shown. What is the missing measure in the triangle?

Classwork/Homework

Page 558 #1-4 and Rate Yourself

Page 559 #1-8

Warm Up

LEVEL 0

10/25/16

Complete Page 560 #10

The hour and minute hands on the clock shown form a straight line. The location of the second hand on the clock is also shown on the diagram. Find the measures, in degrees, of angle HOS and angle MOS .

Show your work.

Angles Review

1 In the figure, \overleftrightarrow{AE} , \overleftrightarrow{BF} , \overleftrightarrow{DG} , and \overleftrightarrow{HC} intersect at point H , and $\angle FHG$ is a right angle.

Choose *True* or *False* for each statement.

- | | | |
|---|-------------------------------|--------------------------------|
| a. $\angle AHB$ and $\angle AHG$ are vertical angles. | <input type="checkbox"/> True | <input type="checkbox"/> False |
| b. $\angle EHF$ and $\angle DHE$ are adjacent angles. | <input type="checkbox"/> True | <input type="checkbox"/> False |
| c. The measure of $\angle FHG$ is equal to the measure of $\angle DHF$. | <input type="checkbox"/> True | <input type="checkbox"/> False |
| d. The sum of the measures of $\angle BHC$ and $\angle CHD$ is equal to the measure of $\angle FHG$. | <input type="checkbox"/> True | <input type="checkbox"/> False |
