Citing an Image

REMEMBER TO ADD CITATIONS AS YOU ADD IMAGES TO YOUR SLIDES

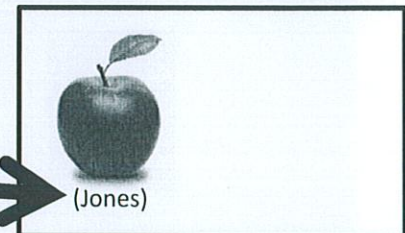

- 1) Go to Google images and find the picture you'd like to use. Click on it.
- 2) Click on the button that says "Visit Page"

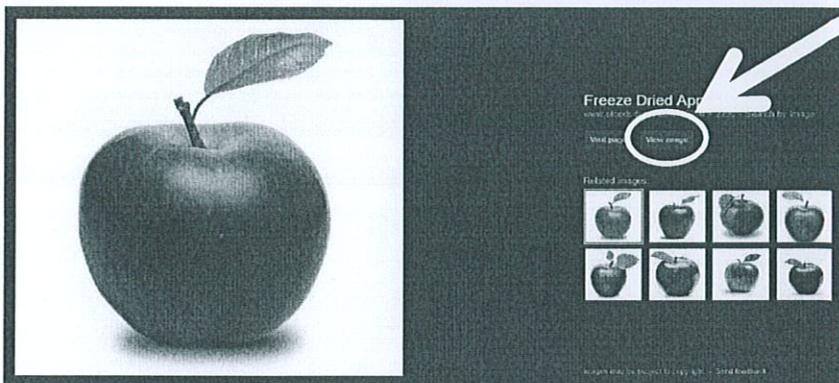

- 3) This will take you to the website. Look for the photographer's name

*If you find a photographer's name, you list their **LAST NAME ONLY** in parentheses under the photograph. The citation on the slide will look like this:*

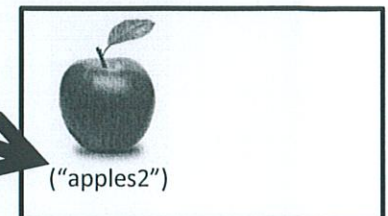

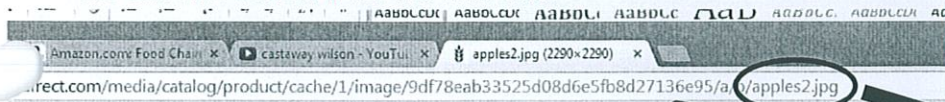

- 4) If you **DO NOT** see a **photographer's name**, hit the back button on the browser, and this time click on "View Image"

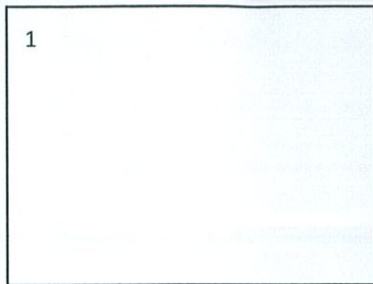

Now you'll need to put the name of the image file in quotes, then parentheses under the photograph. The citation on the slide will look like this:

- 5) This will show you the name of the image file. It's the **VERY LAST** part of the URL that comes **AFTER** the final slash
